the legacy of the modern movement has gained legendary status largely as a result of the appreciation of the masterworks and the visionary architectural concepts in the reality of everyday life however it has been difficult to maintain the architectural creations of the modern movement in such a way that they still reflect the original intentions of their designers many buildings and ensembles of the modern movement have already been saved the icons amongst these have even become so precious that they

are treated like pieces of art rather than as buildings in everyday use but despite the successes that have been achieved many buildings and ensembles are still at risk of demolition or maltreatment the bi annual international conference is one means by which it is possible to continue furthering the aims of docomomo knowing that many modern architects aimed at functionality and changeability the challenge for today is how to deal with the modern heritage in relation to its continuously changing context including physical economic and functional changes as well as socio cultural political and scientific ones it is with this in mind that conservation in general and the conservation of modern architecture in particular has become a new challenge rather than attempting to return a modern building to its presumed original state our challenge is to revalue the essence of the manifold manifestations of modern architecture and redefine its meanings in our changing world of digital revolution worldwide mobility and environmental awareness jacket
