no detailed description available for national elections in western europe this work casts light on contemporary arguments over social catholicism and the believer s role in society by illuminating a similar dispute among french catholics during the modernist crisis 1909 1914 after being dominant during about a century since its invention by baudouin de courtenay at the end of the nineteenth century morpheme is more and more replaced by lexeme in contemporary descriptive and theoretical morphology the notion of a lexeme is usually associated with the work of p h matthews 1972 1974 who characterizes it as a lexical entity abstracting over individual inflected words over the last three decades the lexeme has become a cornerstone of much work in both inflectional morphology and word formation or as it is increasingly been called lexeme formation the papers in the present volume take stock of the descriptive and theoretical usefulness of the lexeme but also adress many of the challenges met by classical lexeme based theories of morphology reprint of the original first published in 1883 a groundbreaking history of the last days of the french empire in africa as the french public debates its present diversity and its colonial past few remember that between 1946 and 1960 the inhabitants of french colonies possessed the rights of french citizens moreover they did not have to conform to the french civil code that regulated marriage and inheritance one could in principle be a citizen and different too citizenship between empire and nation examines momentous changes in notions of citizenship sovereignty nation state and empire in a time of acute uncertainty about the future of a world that had earlier been divided into colonial empires frederick cooper explains how african political leaders at the end of world war ii strove to abolish the entrenched distinction between colonial subject and citizen they then used their new status to claim social economic and political equality with other french citizens in the face of resistance from defenders of a colonial order africans balanced their quest for equality with a desire to express an african political personality they hoped to combine a degree of autonomy with participation in a larger franco african ensemble french leaders trying to hold on to a large french polity debated how much autonomy and how much equality they could concede both sides looked to versions of federalism as alternatives to empire and the nation state the french government had to confront the high costs of an empire of citizens while africans could not agree with french leaders or among themselves on how to balance their contradictory imperatives cooper shows how both france and its former colonies backed into more national conceptions of the state than either had sought france ranks as the world s third largest arms exporter and supplies arms and military technology to over a hundred countries this book exposes the compelling aims and interests national independence security economic welfare foreign influence grandeur that explain the nation s successes in arms production and transfers originally published in 1987 the princeton legacy library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of princeton university press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the princeton legacy library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by princeton university press since its founding in 1905 reprint of the original first published in 1883 why is the french international relations ir discipline different from the transnational american discipline by analysing argument structures in research articles across time this book shows how the discipline in france is caught between the american character of the discipline and the french state as regulator of legitimate forms of expression concretely french research arguments are less explicit about what their propositions are and what academic discussions they draw on and add to than their transnational american counterparts based on a comparative case study of french and american ir research from 1950 to 2011 the book is a major contribution to the meta ir literature on global regional and national traditions of ir the challenge to the french discipline of whether and how to position itself in relation to the evolving american discipline is in many ways exemplary for other non american national ir disciplines and the choices as well as the structural conditions underlying the french case are relevant to all non western disciplines the comparative analysis moreover reveals that the modern american discipline what is considered as recognisable social science takes shape only during the 1970s the book thus offers new knowledge about the discipline s international development as such both case and methodology are interesting to larger audiences outside ir in the history and sociology of social science contrastive rhetoric as well as french and cultural studies lexicon grammaticorum is a biographical and bibliographical reference work on the history of all the world s
