The influence of clients on the social identities within the audit profession 2020-03-02 the overall purpose of the thesis is to explore the meaning of professionalism and independence for the individuals within the audit arena professionalism is defined as the occupational values that guide auditors professional behaviour and how independence is understood is assumed to be influenced by the social groups the auditors identify with the audit arena consists of several social actors i e the audit profession audit firms and auditors as well as external constituencies of the profession i e accountors and accountees the audit profession both serves the public interest by quality ensuring the information provided by the accountors to the accountees as well as conducts business in a state sanctioned monopoly like market appearing independent and professional is therefore critical for the profession as independence and professionalism is the basis of society s trust in the profession and may particularly influence the profession s ability to recruit and retain staff the audit profession audit firms offices and audit teams are social groups which influence the values attitudes and behaviours of the auditors through the process of socialization into the profession and the audit firm however accountors i e clients and accountees i e stakeholders such as investors are also social actors who may influence the values attitudes and behaviour of auditors if auditors identify with these social actors exploring the social identities at play within the audit arena enables us to more fully understand the values that guide professional work the thesis empirically investigates the social identity audit arena through potential current and former audit employees perceptions of the audit arena where the data is both qualitative interviews and quantitative surveys in nature the empirical material provides both pre socialized and post socialized perspectives on the audit arena where the bulk of the material stems from the pre socialized perspective the thesis suggests that there are two types of auditors namely small client auditors and large client auditors where the small client auditor group dominates the audit arena the role of the small client auditor is described differently from the large public client auditor s role the small client auditor is perceived as a teacher who helps the clients run their businesses better and avoid problems with tax authorities et cetera making it necessary for the auditor

to have a good and close relationship with the client in order to fulfil her his role the large client auditor is described more as having the traditional guardians of the market role hence it seems as the small client auditor is guided by other values and has a different understanding of independence compared to the large client auditor however the large client auditor is also perceived as having a counselling teacher role indicating that some professional values are shared by small client and large client auditors these different roles auditors are perceived to have where independence and working for the public interest seem to mean different things can influence how new audit employees perceive the profession if employees expect to work as large client auditors but instead experience work being guided by small client auditor values or vice versa it may influence the willingness to stay in the profession these two roles are also a potential factor influencing the expectation gap i e the gap between what society thinks the auditor does and what s he does in practice these two roles may therefore influence society s image of the auditor and where the profession may have issues in appearing independent in the relationship with small clients

avhandlingens övergripande syfte är att utforska innebörden av professionalism och oberoende för individerna inom revisionsarenan professionalism definieras som de yrkesrelaterade värderingarna som styr hur man som professionell revisor bör agera och hur oberoende förstås antas påverkas av vilka sociala grupper revisorn identifierar sig med revisionsarenan består av flera sociala aktörer nämligen revisionsprofessionen revisionsbyråer och revisorer och även externa intressenter till professionen nämligen redovisningsskyldiga och redovisningsberättigade revisionsprofessionen har ett viktigt samhällsuppdrag att kvalitetssäkra informationen som de redovisningsskyldiga tillhåller de redovisningsberättigade dock bedriver professionen samtidigt affärer på den monopolmarknad professionen har genom den lagstadgade revisionen för professionen är det därmed av yttersta vikt att framstå som oberoende och professionell då oberoende och professionalism är grunden för samhällets tillit till professionen innebörden av professionalism och oberoende inom revisionsarenan kan speciellt påverka professionens möjligheter att rekrytera och behålla personal revisionsprofessionen revisionsbyråerna arbetskontoren och revisionsteamerna är sociala grupper som påverkar revisorers värderingar attityder och beteende genom socialiseringen in i professionen och revisionsbyrån de redovisningsskyldiga klienter och de redovisningsberättigade intressenter så som investerare är andra sociala aktörer som kan påverka revisorers värderingar attityder och beteende om revisorerna identifierar sig med dessa sociala grupper genom att utforska vilka sociala identiteter som verkar inom revisionsarenan kan vi få större kunskap kring vilka värderingar som styr det professionella arbetet avhandlingen undersöker potentiella nuvarande och före detta revisionsmedarbetares uppfattningar om revisionsarenan där empirin både är av kvalitativ intervjuer och kvantitativ enkäter natur det empiriska materialet ger både ett försocialiserat och eftersocialiserat perspektiv på revisionsarenan där tyngden ligger på det försocialiserade perspektivet avhandlingen tyder på att det finns två typer av revisorer nämligen småbolagsrevisorer och storbolagsrevisorer där småbolagsrevisorer är den största gruppen småbolagsrevisorns roll beskrivs annorlunda jämfört med hur storbolagsrevisorns roll beskrivs småbolagsrevisorn uppfattas som en lärare som hjälper klienterna att driva sina företag bättre och undvika problem med skatteverket med mera vilket innebär att revisorn måste ha en god och nära relation med klienten för att kunna uppfylla sin roll storbolagsrevisorn beskrivs mer som revisorsrollen traditionell beskrivs d v s som en marknadsväktare och en oberoende granskare det verkar alltså som att småbolagsrevisorn utgår ifrån andra professionella värderingar och har en annan förståelse av oberoende jämfört med storbolagsrevisorn dock uppfattas storbolagsrevisorn även ha en rådgivande lärarroll vilket indikerar att småbolagsrevisorer och storbolagsrevisorer delar vissa professionella värderingar dessa olika roller som revisorer upplevs ha där oberoende och arbete för det allmännas intresse verkar betyda

olika saker kan påverka hur nya anställda upplever revision som yrke om anställda förväntar sig att arbeta som en storbolagsrevisor men istället får uppleva yrket som en småbolagsrevisor eller tvärtom så kan det påverka viljan att vara kvar i yrket dessa två roller är även en potentiell aspekt som påverkar förväntansgapet dvs skillnaden mellan vad samhället tror att revisorn gör och vad hen faktiskt gör dessa två roller kan alltså påverka samhällets bild av revisorn där revisionsprofessionen kan ha svårt att hävda sig vara oberoende gentemot dessa mindre klienter

The End of Time 2001-11-29 richard feynman once quipped that time is what happens when nothing else does but julian barbour disagrees if nothing happened if nothing changed then time would stop for time is nothing but change it is change that we perceive occurring all around us not time put simply time does not exist in this highly provocative volume barbour presents the basic evidence for a timeless universe and shows why we still experience the world as intensely temporal it is a book that strikes at the heart of modern physics it casts doubt on einstein s greatest contribution the spacetime continuum but also points to the solution of one of the great paradoxes of modern science the chasm between classical and quantum physics indeed barbour argues that the holy grail of physicists the unification of einstein s general relativity with quantum mechanics may well spell the end of time barbour writes with remarkable clarity as he ranges from the ancient philosophers heraclitus and parmenides through the giants of science galileo newton and einstein to the work of the contemporary physicists john wheeler roger penrose and steven hawking along the way he treats us to enticing glimpses of some of the mysteries of the universe and presents intriguing ideas about multiple worlds time travel immortality and above all the illusion of motion the end of time is a vibrantly written and revolutionary book it turns our understanding of reality inside out

Citizenship, Participation and Democracy 1998-03-01 a comparison of the process of democratization in chile and argentina utilising models of citizenship the book examines the impact of constitutional change institutional development and participation in both political parties and social movements from the perspective of the citizen it finds that citizen participation once dominated by the welfare model has been enhanced by the individualism associated with neo liberalism in relation to local social issues but that elite relationships dominate political activity in the formal political arena

Political Conflict in Western Europe 2012-07-26 analyzes the effects of globalization on the restructuring of politics in western europe over the past three decades

The Search for Political Community 1996-09-19 this book challenges the myth that americans emphasis on personal fulfilment necessarily weakens commitment to the common good drawing on extensive participant observation with a variety of environmentalist groups paul lichterman argues that individualism sometimes enhances public political commitment and that a shared respect for individual inspiration enables activists with diverse political backgrounds to work together this personalised culture of commitment has sustained activists working long term for social change the book contrasts personalised politics in mainly white environmental groups with a more traditional community centred culture of commitment in an african american group the untraditional personalised politics of many recent social movements invites us to rethink common understandings of commitment community and individualism in a post traditional world

Fortress Conservation 2002 many conservationists insist that conservation that ignores local costs cannot be sustained for if conservation is greeted with hostility locally then guards and patrols will simply not prevail against determined and more numerous rural opponents this is welcome thinking it is vital to recognise the problems that conservation policies can pose and it makes sense strategically to build local alliances but this thinking also risks overstating the power of rural groups and under estimating the power of the state

it also fails to realise how some conservation visions can become powerful and the role of international finance and sponsorship in imposing injustice fortress conservation is a detailed look at a dark underbelly of international wildlife conservation by exploring one now famous case of successful conservation the mkomazi game reserve in tanzania it shows how complex and messy the history of conservation initiatives can be how uncertain the ecological theories underpinning particular policies and how problematic the social consequences but it also shows how little all of this matters when the fund raising machines that sustain these fortresses kick in published in association with the international african institute north america indiana u press

Awakening Islam 2011-04-15 amidst the roil of war and instability across the middle east the west is still searching for ways to understand the islamic world stéphane lacroix has now given us a penetrating look at the political dynamics of saudi arabia one of the most opaque of muslim countries and the place that gave birth to osama bin laden the result is a history that has never been told before lacroix shows how thousands of islamist militants from egypt syria and other middle eastern countries starting in the 1950s escaped persecution and found refuge in saudi arabia where they were integrated into the core of key state institutions and society the transformative result was the sahwa or islamic awakening an indigenous social movement that blended political activism with local religious ideas awakening islam offers a pioneering analysis of how the movement became an essential element of saudi society and why in the late 1980s it turned against the very state that had nurtured it though the sahwa insurrection failed it has bequeathed the world two very different and very determined heirs the islamo liberals who seek an islamic constitutional monarchy through peaceful activism and the neo jihadis supporters of bin laden s violent campaign awakening islam is built upon seldom seen documents in arabic numerous travels through the country and interviews with an unprecedented number of saudi islamists across the ranks of today s movement the result affords unique insight into a closed culture and its potent brand of islam which has been exported across the world and which remains dangerously misunderstood

Companion Modelling 1973 byron and hitler were equally entranced by rome s most famous monument the colosseum mid victorians admired the hundreds of varieties of flowers in its crannies and occasionally shuddered at its reputation for contagion danger and sexual temptation today it is the highlight of a tour of italy for more than three million visitors a year a concert arena for the likes of paul mccartney and a national symbol of opposition to the death penalty its ancient history is chock full of romantic but erroneous myths there is no evidence that any gladiator ever said hail caesar those about to die and we know of not one single christian martyr who met his finish here yet the reality is much stranger than the legend as the authors two prominent classical historians explain in this absorbing account we learn the details of how the arena was built and at what cost we are introduced to the emperors who sometimes fought in gladiatorial games staged at the colosseum and we take measure of the audience who reveled in or opposed these games the authors also trace the strange afterlife of the monument as fortress shrine of martyrs church and glue factory why are we so fascinated with this arena of death

Why Decisions Fail (Volume 1 of 2) (EasyRead Super Large 24pt Edition) 2023-05 this book re examines the relationship between language and national identity unlike many previous studies it employs a comparative approach france and sweden have been chosen as case

studies both for their similarities e.g. both are member states of the European Union as well as their important differences e.g. France subscribes in principle to a civic model of national identity whereas the basis of Swedish identity is undeniably ethnic. It is precisely differences such as these which allow for a more comprehensive understanding of the ethnolinguistic implications of some of the major challenges currently facing France, Sweden and other European countries: regionalism, immigration, European integration and globalization. The present volume benefits from the use of a multidisciplinary approach and differs from others on the market because of the variety of methods of inquiry used. A series of societal analyses is complemented by an empirical component bringing a more grounded understanding to the issue of language and national identity.

The Practice of Governance in Conflict 2014-09-11
Katy died three days after the brutal attack. Justice arrived three decades later in the early morning hours of August 29, 1986. Clarkson University sophomore Katy Hawelka, bright, pretty and full of life, strolled back to her upstate New York campus after a night out on the dimly lit path beside the university's ice hockey arena. A stranger emerged from the darkness, the brutal sexual assault and strangulation that followed rocked the campus and the local community. When Katy was declared brain dead three days later, her family's nightmare had only just begun. Terry Connelly soon learned details about her daughter's death that would make her blood boil from the bungling campus guards who could have stopped the murder to mistakes by others that allowed the killer to wander the streets committing violence. Katy's mother became certain of one thing: the criminal justice system only meant justice for the criminals. A stranger killed Katy is the true story of a life cut tragically short and of the fight by a grieving mother and others more than 30 years later to ensure that a killer would spend the rest of his life behind bars.
