in the summer of 1941 a collective madness overtook adolf hitler and his senior generals they convinced themselves that they could take on and defeat a superpower in the making the soviet union foolishly they thought in a swift campaign they could smash the red army and force stalin to sue for peace despite dire warnings that stalin was amassing a reserve army of more than 1 million men on the volga the end result would be such carnage that it would tear the german forces apart in his major reassessment of the war on the eastern front anthony tucker jones casts new light on the brutal fighting including such astounding german defeats as at stalingrad kursk minsk and finally berlin he controversially contends that from the very start intelligence officers on both sides failed to influence their leadership resulting in untold slaughter he also reveals the shocking blunders by hitler stalin and even churchill that led to the appalling needless destruction of hitler s armed forces as early as the winter of 1941 42 step by step tucker jones describes how the german war machine fought to its very last against a relentless enemy fully aware that defeat was inevitable

on 28 june 1914 two pistol shots shattered the peace of a sunny afternoon in sarajevo those shots reverberated around europe and shattered the peace of the whole world this was the beginning of the great slaughter could it have been avoided alan woods uses the method of marxism to answer this question he explains that actually whilst individuals play an important role in history to explain events such as wars one must look at deeper causes as well as dealing with the origin of the war woods traces the conflict through its development looking at the role of all the major actors and their aims he shows how in the midst of the despair of the trenches and the home front a new consciousness was formed he also makes the case that it was the german revolution that brought the war to an end and how a revolutionary wave swept across europe the book also looks at the treaty of versailles and how the victorious powers imposed the deal not just on germany but

the rest of europe and the middle east given the amount of nationalistic mystification from all sides about the first world war a history of the subject from the standpoint of the world working class is essential and it is provided by this book

of all the places and events in this nation s history gettysburg may well be the name best known to americans millions flock each year to the little town in south central pennsylvania where more than 135 years ago the largest bloodiest and most dramatic battle of the civil war raged across the now peaceful hills and meadows the subject of an epic movie and a best selling work of fiction the battle continues to fascinate americans indeed for most americans gettysburg is the civil war in beneath a northern sky eminent civil war historian steven e woodworth offers a balanced and thorough overview of the entire battle its drama and its meaning from lee s decision to take his heretofore successful

army of northern virginia across the potomac and into pennsylvania to the withdrawal of the battle battered confederate s back across the river into virginia woodworth paints a vivid picture of this pivotal campaign in this day by day account he describes the fierce fighting that left 48 000 men dead or wounded at sites that have now become famous little round top cemetery ridge devil s den this new book provides a realistic sequence of events surrounding the legendary pickett s charge detailing the confederate s magnificent display of courage and the union s stalwart rock hard defense woodworth describes the strategic and tactical decision making and shows how infighting and disagreements among the leaders on both sides impacted the campaign he details the mind set and morale of the soldiers revealing how surprisingly union leaders did not take advantage of their troops high spirits after their victory to finish off the retreating confederates instead of focusing on only one aspect of the gettysburg campaign as most other books do beneath a northern sky tells the tale of the entire battle in a richly detailed but swiftly moving narrative this new approach to a defining battle is sure to fascinate civil war buffs and all those interested in the rich history of the united states

marvin vincent was a 19 century presbyterian minister and professor of new testament at union theological seminary in new york city he is best known for his classic word studies in the new testament vincent opened his word studies by remarking new testament commentaries are so numerous and many of them so good that a new essay requires some explanation the present work is an attempt in a field which so far as i am aware is not covered by any one book though it has been carefully and ably worked by many scholars taking a position midway between the exegetical commentary and the lexicon and grammar it aims to put the reader of the english bible nearer to the stand point of the greek scholar by opening to him the native force of the separate words of the new testament in their lexical sense their etymology their history their inflection and the peculiarities of their usage by different evangelists and apostles

a research focus on hazards risk perception and risk minimizing strategies is relatively new in the social and environmental sciences this volume by a prominent scholar of east african societies is a powerful example of this growing interest earlier theory and research tended to describe social and economic systems in some form of equilibrium however recent thinking in human ecology evolutionary biology not to mention in economic and political theory has come to assign to risk a prominent role in predictive modeling of behavior it turns out that risk minimalization is central to the understanding of individual strategies and numerous social institutions it is not simply a peripheral and transient moment in a group s history anthropologists interested in forager societies have emphasized risk management strategies as a major force shaping hunting and gathering routines and structuring institutions of food sharing and territorial behavior this book builds on some of these developments but through the analysis of quite complex pastoral and farming peoples and in populations with substantial known histories the method of analysis depends

heavily on the controlled comparisons of different populations sharing some cultural characteristics but differing in exposure to certain risks or hazards the central questions guiding this approach are 1 how are hazards generated through environmental variation and degradation through increasing internal stratification violent conflicts and marginalization 2 how do these hazards result in damages to single households or to individual actors and how do these costs vary within one society 3 how are hazards perceived by the people affected 4 how do actors of different wealth social status age and gender try to minimize risks by delimiting the effect of damages during an on going crisis and what kind of institutionalized measures do they design to insure themselves against hazards preventing their occurrence or limiting their effects 5 how is risk minimization affected by cultural innovation and how can the importance of the quest for enhanced security as a driving force of cultural evolution be estimated
