The Call of the Wild and White Fang 2004

presented together in one volume these are two of the greatest and most popular animal stories ever written even to designate them as animal stories seems to undervalue them because these tremendous works are so much more than mere children's tales although they are admittedly still greatly loved by the young penned by jack london at the beginning of the twentieth century the first the call of the wild tells the story of buck a domestic dog who is kidnapped from his home in california and forced to pull sleds in the arctic wastes in the second white fang a cross breed that is three quarters wolf and one quarter dog endures considerable suffering in the arctic before being tamed by a white american and taken to live in california the two narratives are remarkable for the vividness of their descriptions and the success with which london imagines life from a nonhuman perspective

in the last two decades china has become a dramatically more urban society and hundreds of millions of people have changed residence in the process family and communal bonds have been broken in a country once known as a society of kith and kin there has been a pervasive sense of moral crisis in contemporary china and the new market economy doesn t seem to offer any solutions this book investigates how the chinese have coped with the condition of modernity in which strangers are routinely thrust together haiyan lee dismisses the easy answers claiming that this moral crisis is merely smoke and mirrors conjured up by paternalistic overwrought leaders and scholars or that it can be simply chalked up to the topsy turvy of a market economy on steroids rather lee argues that the perception of crisis is itself symptomatic of a deeper problem that has roots in both the confucian tradition of kinship and the modern state management of stranger sociality this ambitious work is the first to investigate the figure of the stranger foreigner peasant migrant bourgeois intellectual class enemy unattached woman animal across literature film television and museum culture lee s aim is to show that hope lies with a robust civil society in which literature and the arts play a key role in sharpening the moral faculties and apprenticing readers in the art of living with strangers in so doing she makes a historical

comparative and theoretically informed contribution to the on going conversation on china s un civil society

The Morals of Monster Stories 2014-11-12

giorgio prodi 1928 1987 was an important italian scientist who developed an original philosophy based on two basic assumptions 1 life is mainly a semiotic phenomenon 2 matter is somewhat a semiotic phenomenon prodi applies peirce s cenopythagorean categories to all phenomena of life and matter firstness secondness and thirdness they are interconnected meaning that the very ontology of the world according to prodi is somewhat semiotic in fact when one describes matter as made of firstness and secondness this means that matter intrinsically implies semiotics with thirdness also being present in the world at the very heart of prodi s theory lies a metaphysical hypothesis which is an ambitious theoretical gesture that places prodi in an awkward position with respect to the customary philosophical tradition in fact his own ontology is neither dualistic nor monistic such a conclusion is unusual and weird but much less unusual in present time than it was when it was first introduced the actual resurgence of various realisms make prodi s semiotic realism much more interesting than when he first proposed his philosophical approach what is uncommon in prodi perspective is that he never separated semiotics from the materiality of the world prodi does not agree with the standard structuralist view of semiosis as an artificial and unnatural activity on the contrary prodi believed semiosis that is the interconnection between firstness secondness and thirdness lies at the very bottom of life on one hand prodi maintains a strong realist stance on the other a realism that includes semiosis as natural phenomena this last view is very unusual because all forms more or less of realism exclude semiosis from nature but they frequently reduce semiosis to non semiotic elements according to prodi semiosis is a completely natural phenomenon
