Expert .NET Micro Framework 2009-11-27 environmental groups and legal expertise explores the use and understanding of law and legal expertise by environmental groups rather than the usual focus on the courtroom it scrutinises environmental ngo advocacy during the extraordinarily dramatic brexit process from the referendum on leaving the eu in june 2016 to the debate around the new environment bill in the first half of 2020 there is generally a weak understanding of both the complexity and the potential of legal expertise in the environmental ngo community legal expertise can be more than a tool for campaigners and more than litigation it provides distinctive ways of both seeing the world and changing the world the available legal resource in the sector is not just a practical limit on what can be done but spills into the very understanding of what should be done and what resource is needed mutually reinforcing links between capacity understanding culture and investment affect legal expertise across the board there are however pockets of sophisticated legal expertise in the community and legal expertise was heavily and often effectively used in the anomalously law heavy brexit environment debate the ability to call on thinly spread legal expertise in a crisis was in part due to effective ngo collaboration around brexit environment

The Politics of Expertise 2013-11-07 an intriguing and impressive account of corporate social responsibility and neoliberalism writ large on the ground in action in chemical plant communities in louisiana ottinger effectively illustrates how in complex culturally saturated ways corporate commitment to responsible care has created critical challenges for environmental activism and justice kim fortun renselaer polytechnic institute residents of a small louisiana town were sure that the oil refinery next door was making them sick as part of a campaign demanding relocation away from the refinery they collected scientific data to prove it their campaign ended with a settlement agreement that addressed many of their grievances but not concerns about their health yet instead of continuing to collect data residents began to let refinery scientists assertions that their operations did not harm them stand without challenge what makes a community move so suddenly from actively challenging to apparently accepting experts authority refining expertise argues that the answer rests in the way that refinery scientists and engineers defined themselves as experts rather than claiming to be infallible they began to portray themselves as responsible this work drives home the need for both activists and politically engaged scholars to reconfigure their own activities in response in order to advance community health and robust scientific knowledge about it gwen ottinger is assistant professor in interdisciplinary arts and sciences at the university of washington bothell where she teaches in the science technology society and environmental studies majors she is co editor of technoscience and environmental justice expert cultures in a grassroots
