Notes on the Importance of Private Legal Documents for the Writing of Biography and Literary History

2011-07-01 the phenomenon of complaints was a central tenet in the ideology of the ottoman empire an obsession it inherited from former middle eastern empires islamic and pre islamic attention was directed in particular to the tendency of state officials to overstep the bounds of their authority exploiting vast areas of the countryside to enrich themselves at the expense of the poor citizens and as a consequence to undermine the legitimacy of the ruler himself on the other hand so many complaints of harsh abuses might give the impression that the ottoman empire in its entirety should have collapsed as a consequence 0in the first place the sikayet defteri is a legal document because many of the complaints stem from the point of departure that a certain shari a law has been broken violating the natural rights of certain groups of citizens more important than this however the sikayet is a legal document from an additional methodological perspective the document provides a perspective on the kadi his court and his position in the state which are unlikely to be obtained from any other source
