the first and only book to offer detailed explanations of sap erp sales and distribution as the only book to provide in depth configuration of the sales and distribution sd module in the latest version of sap erp this valuable resource presents you with step by step instruction conceptual explanations

and plenty of examples if you're an SD consultant or are in charge of managing an SAP implementation in your enterprise you'll want this valuable resource at your side SAP is one of the leading enterprise resource planning ERP software products on the market with over 40,000 implementations covers the latest version of SAP ERP ECC 6.0 covers common through advanced configurations so it's helpful no matter what your level of experience with SAP explains the conceptual framework behind the configuration process if your company uses the SD module keep this indispensable guide on hand

EJISE Volume 13 Issue 1 2000-02-22

The Routledge Handbook of Theoretical and Experimental Sign Language Research bridges the divide between theoretical and experimental approaches to provide an up-to-date survey of key topics in sign language research with 29 chapters written by leading and emerging scholars from around the world. This handbook covers the following key areas: on the theoretical side, all crucial aspects of sign language grammar studied within formal frameworks such as generative grammar; on the experimental side, theoretical accounts are supplemented by experimental evidence gained in psycholinguistic and neurolinguistic studies. On the descriptive side, the main phenomena addressed in the reviewed scholarship are summarized in a way that is accessible to readers without previous knowledge of sign languages. Each chapter features an introduction, an overview of existing research, and a critical assessment of hypotheses and findings. The Routledge Handbook of Theoretical and Experimental Sign Language Research is key reading for all advanced students and researchers working at the intersection of sign language research, linguistics, psycholinguistics, and neurolinguistics.
