

Read free Teaching biological evolution in higher education methodological religious and nonreligious issues biological science jones and bartlett (Read Only)

an important new book by the author of the bestselling text defending evolution a guide to the creation evolution controversy this title examines the controversial issues surrounding this central concept of life science and explores students common scientific misconceptions describes approaches for teaching topics and principles of evolution and offers strategies for handling the various problems some students have with the idea of evolution due to religious influences the 30th volume of research in the social scientific study of religion consists of two special sections as well as two separate empirical studies on attachment and daily spiritual practices the first special section deals with the social scientific study of religion in indonesia indonesia is a predominantly muslim country whose history and contemporary involvement in the study of religion is explored from both sociological and psychological perspectives the second special section is on the pope francis effect the challenges of modernization in the catholic church and the global impact of pope francis while its focus is mainly on the catholic religion the internal dynamics and geopolitics explored apply more broadly this book goes beyond the science versus religion dispute to ask why evolution is so often rejected as a legitimate scientific fact focusing on a wide range of cognitive socio cultural and motivational factors that make concepts such as evolution difficult to grasp this collection presents research based interventions using existing knowledge to produce new pedagogies to teach evolution to learners more successfully whether in schools or elsewhere success here is measured as cognitive gains as acceptance of evolution or an increased desire to continue to learn about it aside from introductory and concluding chapters by the editors each chapter consists of a research based intervention intended to enable evolution to be taught successfully all these interventions have been researched and evaluated by the chapters authors and the findings are presented along with discussions of the implications the result is an important compendium of studies from around the world conducted both inside and outside of school the volume is unique and provides an essential reference point and platform for future work for the foreseeable future this volume reaches beyond the controversy surrounding the teaching and learning of evolution in the united states specifically in regard to the culture politics and beliefs found in the southeast the editors argue that despite a deep history of conflict in the region surrounding evolution there is a wealth of evolution research taking place from biodiversity in species to cultural evolution and human development in fact scientists educators and researchers from around the united states have found their niche in the south where biodiversity is high culture runs deep and the pace is just a little bit slower how is epistemology related to the issue of teaching science and evolution in the schools addressing a flashpoint issue in our schools today this book explores core epistemological differences between proponents of intelligent design and evolutionary scientists as well as the critical role of epistemological beliefs in learning science preeminent scholars

in these areas report empirical research and or make a theoretical contribution with a particular emphasis on the controversy over whether intelligent design deserves to be considered a science alongside darwinian evolution this pioneering book coordinates and provides a complete picture of the intersections in the study of evolution epistemology and science education in order to allow a deeper understanding of the intelligent design vs evolution controversy this is a very timely book for teachers and policy makers who are wrestling with issues of how to teach biology and evolution within a cultural context in which intelligent design has been and is likely to remain a challenge for the foreseeable future the number of nonreligious people has increased dramatically over the past several decades yet scholarship on the nonreligious is severely lacking in response to this critical gap in knowledge the nonreligious provides a comprehensive summation and analysis of existing social scientific research on secular people and societies the authors present a thorough overview of existing knowledge while also drawing upon ongoing research and suggesting ways to improve our understanding of this growing population offering a research and data based examination of the nonreligious this book will be an invaluable source of information and a foundation for further scholarship written in clear accessible language that will appeal to students and the increasingly interested general reader the nonreligious provides an unbiased and thorough account of relevant existing scholarship within the social sciences that bears on lived experiences of the nonreligious the world is confronted with multiple intersecting crises including exploitation inequality political polarization and climate change world repairing work is vitally needed but just at a time when humans most obviously require robust moral imaginaries on which to draw it is no longer clear what kinds of beliefs meanings stories and encounters inspire them to act we know that nonreligious identities are on the rise in numerous countries throughout the world but with so much focus on the non part of nonreligion what we don t know is what nonreligious imaginaries actually look sound and feel like what do nonreligious people believe in what stories inspire them in what moments do they find meaning this book seeks to answer these questions through a series of short essays exploring the nonreligious imaginaries that emerge in a range of world repairing practices including ethical consumption community organizing eating habits and environmental activism in so doing the book provides a crucial contribution to two areas of increasing social and political concern first the need to understand not only what nonreligious people are rejecting but also their sources of meaning and action second the urgent need for cultural tools for mobilizing people towards more compassionate and sustainable practices this edited collection consists of research papers dealing with different interdisciplinary subtopics from the multifaceted interplay between language and the political sphere being intertwined and thus inseparable language and politics have received a lot of scholarly attention in the last 30 years the papers published in this collection are at the intersection of several disciplines including critical discourse studies political science media political psychology and sociology they report on cutting edge empirical research with discursively communicated political ideas and politicians utilization of language to persuade the voters to think behave and vote in a certain way the papers comprise quantitative qualitative or mixed methodological approaches re addressing multiple social theories and perspectives and challenging existing paradigms they contribute to burgeoning discussions of theoretical approaches and nuanced case studies in the field placing language as the central medium of politics this work is a comprehensive survey of one of the oldest and hottest debates in american history the role of religion in the public discourse the relationship between church and state was contentious long before the framers of the

constitution undertook the bold experiment of separating the two sparking a debate that would rage for centuries what is the role of religion in government and vice versa religion and the law in america explores the many facets of this question from prayer in public schools to the addition of the phrase under god to the pledge of allegiance from government investigation of religious fringe groups to federal grants for faith based providers of social services in more than 250 a z entries along with a series of broad thematic essays it examines the groups laws and court cases that have framed this ongoing debate through its careful balanced exploration of the interaction between government and religion throughout the history of the united states the work provides all americans students scholars and lay readers alike with a deep understanding of one of the central enduring issues in our history assessing synthetic biology from a societal and ethical perspective is not only a matter of determining possible harms and benefits of synthetic biology applications synthetic biology also incorporates a specific technoscientific understanding of its research agenda and its research objects that has philosophical and ethical implications this edited volume sets out to explore and evaluate these synthetic biology worldviews and it proposes appropriate governance measures in addition legal challenges are discussed a comprehensive and accessible survey of the major issues at the biology religion interface this book addresses synthetic biology synbio a new and promising biotechnology that has attracted much interest from both a scientific and a policy perspective yet questions concerning the patentability of synbio inventions have not been examined in detail so far as a result it remains unclear whether these inventions are patentable on the basis of current norms and case law the book addresses this question focusing especially on the subject matter s eligibility and moral criteria it provides an overview of the legislation and decisions applicable to synbio patents and examines this new technology in view of the ongoing debate over the patentability of biotechnologies in general the legal analysis is complemented by the practical examination of several patent applications submitted to the european and us patent offices epo and uspto and by an assessment of the patent issues that are likely to be raised by future synbio developments the brief presents a model for happiness based on current knowledge in evolutionary biology and neurobiology briefly the primary purpose of nervous systems is to direct an animal toward behaviour relevant for survival and procreation in primitive animals actions are based on reflexes while in humans the modules directing behaviour engage positive and negative affect good and bad feelings and they are swayed by cognitive processes the reason why evolution opted for this strategy was the improved flexibility in response i e we learn from previous experiences the human capacity for happiness is an accidental consequence an array of brain modules has evolved to care for various pursuits but recent studies suggest that they converge on shared neural circuits designed to generate positive and negative mood happiness can be construed as the net output of the relevant modules the briefs suggests a strategy for how to avoid having negative feelings such as anxiety depression and chronic pain dominate the mind and how to exercise positive feelings in short the book offers both a deeper understanding of what happiness is about and a framework for improving well being an array of brain modules has evolved to care for various pursuits but recent studies suggest that they converge on shared neural circuits designed to generate positive and negative mood happiness can be construed as the net output of the relevant modules the book suggests a strategy for how to avoid having negative feelings such as anxiety depression and chronic pain dominate the mind and how to exercise positive feelings in short the book offers both a deeper understanding of what happiness is about and a framework for improving

well being this important text draws on decades of research arguing that modern nursing germinated and grew an ethics from its own native soil which is rich fulsome and philosophically informed grounded in the tradition and practice of nursing it is an ethics with a positive agenda for the good nurse a good society a healthy people and human flourishing this native nursing ethics was forgotten creating space for a foreign bioethics colonization of nursing in the second half of the twentieth century drawing from a wide range of sources from the usa the uk canada and ireland the book addresses the early and enduring ethical concerns values and ideals of nursing as a profession that engages in direct clinical practice and in developing policy fowler calls for reclaiming and renewing nursing s ethical tradition this systematic and comprehensive book is an essential contribution for students and scholars of nursing ethics this book touches on all of the hot topic issues of masculinity and violence including gun violence sexual assault and the metoo movement violence against women lgbtq people and people of color its unique approach will add to many conversations that should as sumerau explains be focused on masculinity and are far too often focused on something else taking the approach of talking with young college men who are privileged provides a unique look at how manhood and masculinity may not be progressing like many people hope and provides insights from all angles to critically examine the ways men construct and explain relationships between violence manhood and inequality in society praise for clinical case formulations matching the integrative treatment plan to the client secondedition barbara ingram has put a career into the development of thisbook and it is wonderful my students love that it was written withthem in mind and they love the statements designed to reduceanxiety and normalize the learning process this is an excellentbook amy m rees turyn phd associate professor ofcounseling psychology lewis clark college a step by step model for individualized caseconceptualization fully revised and updated the second edition of clinicalcase formulations provides step by step tools and insightfulguidance for moving from first contact with a client to thedevelopment of an effective personalized treatment plan addressing the essential question every therapistfaces how do i create a treatment plan that is the bestmatch for my client this unique resource provides asystematic and thoughtful method for integrating ideas skills andtechniques from different theoretical approaches it combinesempirical research and clinical experience to create a caseformulation that is tailor made for the client this comprehensive resource offers two tools to guide caseformulations a problem oriented framework with a list of 28standards for evaluating its application and a set of 30 coreclinical hypotheses derived from the knowledge bases of psychology psychiatry counseling and social work professions the new edition includes hypotheses on emotional focus trauma and metacognitiveperspective more detailed attention given to empirically supported therapiesuch as dialectical behavior therapy dbt and acceptance andcommitment therapy act discussion on the importance of bringing cultural competence tocase formulation tasks with every client skill building activities throughout the text offering a thorough framework to help clients experienceeffective clinical service practitioners will learn toconceptualize clients needs in ways that lead to strong andindividualized treatment plans as well as advice and guidance onwhat to do when selected interventions fail to produce the expectedbenefits carving nature at its joints in order to map the future of biology we need to understand where we are and how we got there present day biology is the realization of the famous metaphor of the organism as a bete ^ machine elaborated by descartes in part v of the discours a realization far beyond what anyone in the seventeenth century could have im ined until the middle of the nineteenth century that machine was an articulated collection of

macroscopic parts a system of gears and levers moving gasses solids and liquids and causing some parts of the machine to move in response to the force produced by others then in the nineteenth century two divergent changes occurred in the level at which the living machine came to be investigated first with the rise of chemistry and the particulate view of the composition of matter the forces on macroscopic machine came to be understood as the manifestation of molecular events and functional biology became a study of molecular interactions that is the machine ceased to be a clock or a water pump and became an articulated network of chemical reactions until the first third of the twentieth century this chemical view of life as reflected in the development of classical chemistry treated the chemistry of biological molecules in much the same way as for any organic chemical reaction with reaction rates and side products that were the consequence of statistical properties of the concentrations of reactants the current volume explores a variety of topical themes within the general field of religion defined as the search for the truth concerning the nature of one's relationship with being reality among the topics explored are evolution the origins of faith conceptual viruses suffering irreligion the new atheism nihilism sacredness the nature of the self mythology carl jung joseph campbell free will epistemology and spiritual abuse all of the foregoing topics are critically examined against a backdrop that helps orient the discussion more specifically most human beings wonder in one way or another about the nature of reality that is they seek to deal as best they can with the reality problem the final jeopardy challenge refers to the task of trying to work toward providing a best effort final response to the reality problem that resonates with and reflects to varying degrees the character of reality before the sands in the hourglass of time run out in a person's life as recent headlines reveal conflicts and debates around the world increasingly involve secularism national borders and traditional religions cannot keep people in tidy boxes as political struggles doctrinal divergences and demographic trends are sweeping across regions and entire continents and secularity is increasing in society with a growing number of people in many regions having no religious affiliation or lacking interest in religion simultaneously there is a resurgence of religious participation in the politics of many countries how might these diverse phenomena be better understood long reigning theories about the pace of secularization and ideal church state relations are under invigorated scrutiny by scholars studying secularism with new questions better data and fresh perspectives the oxford handbook of secularism offers a wide ranging and in depth examination of this global conversation bringing together the views of an international collection of prominent experts in their respective fields this is the essential volume for comprehending the core issues and methodological approaches to the demographics and sociology of secularity the history and variety of political secularisms the comparison of constitutional secularisms across many countries from america to asia the key problems now convulsing church state relations the intersections of liberalism multiculturalism and religion the latest psychological research into secular lives and lifestyles and the naturalistic and humanistic worldviews available to nonreligious people exam board sqa level higher subject rmps first teaching august 2018 first exam june 2019 the only resource for rmps religious and philosophical questions at higher level written by a bestselling author and expert in the field completely updated for the 2018 sqa specification this book provides comprehensive coverage of the newly designed cfe higher in religious moral and philosophical studies it is also ideal for students across scotland studying key topic areas in religious and philosophical questions as part of the broad general education and the senior phase of rme offers a lively accessible and engaging style with appropriate humour that reflects real life situations and moral issues highlights the

importance of dealing with varieties of belief within religious traditions deals with up to date contemporary and topical issues in a highly sensitive and informative manner a range of views on the morality of synthetic biology and its place in public policy and political discourse synthetic biology which aims to design and build organisms that serve human needs has potential applications that range from producing biofuels to programming human behavior the emergence of this new form of biotechnology however raises a variety of ethical questions first and foremost whether synthetic biology is intrinsically troubling in moral terms is it an egregious example of scientists playing god synthetic biology and morality takes on this threshold ethical question as well as others that follow offering a range of philosophical and political perspectives on the power of synthetic biology the contributors consider the basic question of the ethics of making new organisms with essays that lay out the conceptual terrain and offer opposing views of the intrinsic moral concerns discuss the possibility that synthetic organisms are inherently valuable and address whether and how moral objections to synthetic biology could be relevant to policy making and political discourse variations of these questions have been raised before in debates over other biotechnologies but as this book shows they take on novel and illuminating form when considered in the context of synthetic biology contributors john basl mark a bedau joachim boldt john h evans bruce jennings gregory e kaebnick ben larson andrew lustig jon mandle thomas h murray christopher j preston ronald sandler informed by critical religion perspective in religious studies and postcolonial self reflection in sociology this book interrogates the ideas of religion and the secular in social theory and sociology it argues that as long as social theory and sociological discourse embed the religion secular distinction and locate themselves on the secular side of the binary sociology will continue to serve the very ideologies it tries to subvert namely western modernity coloniality readers general readers college level college university and seminary students theologians and ethicists clergy an innovative and provocative study tackling the main assumptions surrounding israel s claim to jewish identity the journal of biblical and theological studies jbts is an academic journal focused on the fields of bible and theology from an inter denominational point of view the journal is comprised of an editorial board of scholars that represent several academic institutions throughout the world jbts is concerned with presenting high level original scholarship in an approachable way academic journals are often written by scholars for other scholars they are technical in nature assuming a robust knowledge of the field there are fewer journals that seek to introduce biblical and theological scholarship that is also accessible to students jbts seeks to provide high level scholarship and research to both scholars and students which results in original scholarship that is readable and accessible as an inter denominational journal jbts is broadly evangelical we accept contributions in all theological disciplines from any evangelical perspective in particular we encourage articles and book reviews within the fields of old testament new testament biblical theology church history systematic theology practical theology philosophical theology philosophy and ethics a collection of letters from a cross section of japanese citizens to a leading japanese newspaper relating their experiences and thoughts of the pacific war disaster management is a vibrant and growing field driven by government spending in the wake of terrorist attacks and environmental debacles as well as private sector hiring of risk managers and emergency planners an ever increasing number of practicing professionals needs a reference that can provide a solid foundation in all major phases of supervision mitigation preparedness response communications and recovery as climate change leads to further costly catastrophes and as countries around the world continue to struggle with terrorism the demand for solutions will only grow

this revised edition of coppola s revered resource meets said demand head on with more focused current thoughtfully analyzed and effective approaches to disaster relief expanded coverage of global approaches to disaster management with enhanced data and research on disasters around the world including cyclone nargis the h1n1 pandemic and the tsunami in american samoa more material on risk management mitigation myths that affect behavior during crises and post disaster evaluation of the response up to date information on the role of aid organizations and international financial institutions like the world bank in disaster response as well as commentary on the latest research in disaster management and policy studies it is now generally accepted that the structure and function of the human body deeply influence the nature of human thought as a consequence our religious experiences are at least partially determined by our sensory organs emotional programs sexual sensibilities and the neural framework of our brains in spirituality in the flesh robert c fuller investigates how studying the body can help us to answer the profoundest spiritual questions why is it that some religious traditions assign spiritual currency to pain how do neurochemically driven emotions such as fear shape our religious actions what is the relationship between chemically altered states of consciousness and religious innovation using recent biological research to illuminate religious beliefs and practices fuller delves into topics as diverse as apocalypticism nature religion native american peyotism and the sexual experimentalism of nineteenth century communal societies in every case seeking middle ground between the arguments currently emanating from scientists and humanists he takes most scientific interpreters to task for failing to understand the inherently cultural aspects of embodied experience even as he chides most religion scholars for ignoring new knowledge about the biological substrates of human thought and behavior comfortable with the language of scientific analysis and sympathetic to the inherently subjective aspects of religious events fuller introduces the biological study of religion by joining together this era s unprecedented understanding of bodily states with an expert s knowledge of religious phenomena culling together insights from scientific observations historical allusions and literary references spirituality in the flesh offers a bold look at the biological underpinnings of religion and opens up new and exciting agendas for understanding the nature and value of human religiosity keeping up with the rapidly growing research base the leading graduate level psychology of religion text is now in a fully updated fifth edition it takes a balanced empirically driven approach to understanding the role of religion in individual functioning and social behavior integrating research on numerous different faith traditions the book addresses the quest for meaning links between religion and biology religious thought belief and behavior across the lifespan experiential dimensions of religion and spirituality the social psychology of religious organizations and connections to coping adjustment and mental disorder chapter opening quotations and topical research boxes enhance the readability of this highly instructive text new to this edition new topics cognitive science of religion religion and violence and groups that advocate terrorist tactics the latest empirical findings including hundreds of new references expanded discussion of atheism and varieties of nonbelief more research on religions outside the judeo christian tradition particularly islam state of the art research methods including techniques for assessing neurological states the handbook of religion and mental health is a useful resource for mental health professionals religious professionals and counselors the book describes how religious beliefs and practices relate to mental health and influence mental health care it presents research on the association between religion and personality coping behavior anxiety depression psychoses and successes in psychotherapy and includes discussions

on specific religions and their perspectives on mental health provides a useful resource for religious and mental health professionals describes the connections between spirituality religion and physical and mental health discusses specific religions and their perspectives on mental health presents research on the association between religion and personality coping behavior anxiety depression psychoses and successes in psychotherapy from the united states to the middle east asia and africa religion has become an increasingly important factor in political activity and organisation this handbook provides a definitive global survey of the interaction of religion and politics featuring contributions from an international team of experts it examines the political aspects of all the world s major religions including such crucial contemporary issues as religious fundamentalism terrorism the war on terror the clash of civilizations and science and religion four main themes addressed include the world religions and politics religion and governance religion and international relations religion security and development references at the end of each chapter guide the reader towards the most up to date information on various topics in addition large amounts of information make this book an indispensable source of information for students academics and the wider public interested in the dynamic relationship between politics and religion this is one volume library of information on molecular biology molecular medicine and the theory and techniques for understanding modifying manipulating expressing and synthesizing biological molecules conformations and aggregates the purpose is to assist the expanding number of scientists entering molecular biology research and biotechnology applications from diverse backgrounds including biology and medicine as well as physics chemistry mathematics and engineering religion and worldviews the triumph of the secular in religious education provides the first serious analysis and review of the commission on religious education s proposed worldviews framework for the subject it argues that religious education has an important contribution to make to the aims of liberal education and examines whether the shift to a worldview framework is capable of overcoming current weaknesses and initiating a new positive direction for the future chapters explore the role of worldviews in religious education covering key debates including whether there is need for new legislation on re the nature of professionalism and the role of experts the extent to which there is educational value in study of the personal worldviews of students the role of the religious voice in re the relation of religions to religious worldviews the aims of re the relationship between the state and religion consideration of the nature of a worldview the personal reflections of a member of the commission on its proposals the chapters provide all that is necessary to understand and to evaluate the current debate on the appropriateness of a worldviews approach to re bringing together leading names in the field this is essential reading for trainee and practising teachers of religious education re advisers and schools leaders responsible for curriculum development parish nursing is a handbook on health promotion and care within faith communities sections of the book address the context for parish or congregational nursing models roles and settings for practice issues for parish nursing practice the parish nurse s collaboration with other health team and spiritual care professionals and international perspectives of parish nursing while the project had its initial roots in the lutheran general care system it has been written so that nurses of all faiths should find it an extremely useful shelf reference or advanced level text parish nursing will be of interest to scholars students and advanced practitioners in community and public health nursing psychiatric mental health nursing and primary care nursing originally published as parish nursing the developing practice

Teaching Biological Evolution in Higher Education 2005 an important new book by the author of the bestselling text defending evolution a guide to the creation evolution controversy this title examines the controversial issues surrounding this central concept of life science and explores students common scientific misconceptions describes approaches for teaching topics and principles of evolution and offers strategies for handling the various problems some students have with the idea of evolution due to religious influences

Research in the Social Scientific Study of Religion, Volume 30 2019-12-16 the 30th volume of research in the social scientific study of religion consists of two special sections as well as two separate empirical studies on attachment and daily spiritual practices the first special section deals with the social scientific study of religion in indonesia indonesia is a predominantly muslim country whose history and contemporary involvement in the study of religion is explored from both sociological and psychological perspectives the second special section is on the pope francis effect the challenges of modernization in the catholic church and the global impact of pope francis while its focus is mainly on the catholic religion the internal dynamics and geopolitics explored apply more broadly

Evolution Challenges 2012-04-25 this book goes beyond the science versus religion dispute to ask why evolution is so often rejected as a legitimate scientific fact focusing on a wide range of cognitive socio cultural and motivational factors that make concepts such as evolution difficult to grasp

Evolution Education Re-considered 2019-07-16 this collection presents research based interventions using existing knowledge to produce new pedagogies to teach evolution to learners more successfully whether in schools or elsewhere success here is measured as cognitive gains as acceptance of evolution or an increased desire to continue to learn about it aside from introductory and concluding chapters by the editors each chapter consists of a research based intervention intended to enable evolution to be taught successfully all these interventions have been researched and evaluated by the chapters authors and the findings are presented along with discussions of the implications the result is an important compendium of studies from around the world conducted both inside and outside of school the volume is unique and provides an essential reference point and platform for future work for the foreseeable future

Evolution Education in the American South 2017-03-08 this volume reaches beyond the controversy surrounding the teaching and learning of evolution in the united states specifically in regard to the culture politics and beliefs found in the southeast the editors argue that despite a deep history of conflict in the region surrounding evolution there is a wealth of evolution research taking place from biodiversity in species to cultural evolution and human development in fact scientists educators and researchers from around the united states have found their niche in the south where biodiversity is high culture runs deep and the pace is just a little bit slower

Epistemology and Science Education 2012-03-28 how is epistemology related to the issue of teaching science and evolution in the schools addressing a flashpoint issue in our schools today this book explores core epistemological differences between proponents of intelligent design and evolutionary scientists as well as the critical role of epistemological beliefs in learning science preeminent scholars in these areas report empirical research and or make a theoretical contribution with a particular emphasis on the controversy over whether intelligent design deserves to be considered a science alongside darwinian evolution this pioneering book coordinates and provides a complete picture of the intersections in the study of evolution epistemology and science education in order to allow a deeper

understanding of the intelligent design vs evolution controversy this is a very timely book for teachers and policy makers who are wrestling with issues of how to teach biology and evolution within a cultural context in which intelligent design has been and is likely to remain a challenge for the foreseeable future

Reports of the National Center for Science Education 2005 the number of nonreligious people has increased dramatically over the past several decades yet scholarship on the nonreligious is severely lacking in response to this critical gap in knowledge the nonreligious provides a comprehensive summation and analysis of existing social scientific research on secular people and societies the authors present a thorough overview of existing knowledge while also drawing upon ongoing research and suggesting ways to improve our understanding of this growing population offering a research and data based examination of the nonreligious this book will be an invaluable source of information and a foundation for further scholarship written in clear accessible language that will appeal to students and the increasingly interested general reader the nonreligious provides an unbiased and thorough account of relevant existing scholarship within the social sciences that bears on lived experiences of the nonreligious

The Nonreligious 2016-02-01 the world is confronted with multiple intersecting crises including exploitation inequality political polarization and climate change world repairing work is vitally needed but just at a time when humans most obviously require robust moral imaginaries on which to draw it is no longer clear what kinds of beliefs meanings stories and encounters inspire them to act we know that nonreligious identities are on the rise in numerous countries throughout the world but with so much focus on the non part of nonreligion what we don't know is what nonreligious imaginaries actually look sound and feel like what do nonreligious people believe in what stories inspire them in what moments do they find meaning this book seeks to answer these questions through a series of short essays exploring the nonreligious imaginaries that emerge in a range of world repairing practices including ethical consumption community organizing eating habits and environmental activism in so doing the book provides a crucial contribution to two areas of increasing social and political concern first the need to understand not only what nonreligious people are rejecting but also their sources of meaning and action second the urgent need for cultural tools for mobilizing people towards more compassionate and sustainable practices

Nonreligious Imaginaries of World Repairing 2021-08-12 this edited collection consists of research papers dealing with different interdisciplinary subtopics from the multifaceted interplay between language and the political sphere being intertwined and thus inseparable language and politics have received a lot of scholarly attention in the last 30 years the papers published in this collection are at the intersection of several disciplines including critical discourse studies political science media political psychology and sociology they report on cutting edge empirical research with discursively communicated political ideas and politicians utilization of language to persuade the voters to think behave and vote in a certain way the papers comprise quantitative qualitative or mixed methodological approaches re addressing multiple social theories and perspectives and challenging existing paradigms they contribute to burgeoning discussions of theoretical approaches and nuanced case studies in the field placing language as the central medium of politics

Languages of Politics 2023-05-25 this work is a comprehensive survey of one of the oldest and hottest debates in american history the role of religion in the public discourse the relationship between church and state was contentious long before the framers of the constitution

undertook the bold experiment of separating the two sparking a debate that would rage for centuries what is the role of religion in government and vice versa religion and the law in america explores the many facets of this question from prayer in public schools to the addition of the phrase under god to the pledge of allegiance from government investigation of religious fringe groups to federal grants for faith based providers of social services in more than 250 a z entries along with a series of broad thematic essays it examines the groups laws and court cases that have framed this ongoing debate through its careful balanced exploration of the interaction between government and religion throughout the history of the united states the work provides all americans students scholars and lay readers alike with a deep understanding of one of the central enduring issues in our history

Religion and the Law in America [2 volumes] 2007-05-18 assessing synthetic biology from a societal and ethical perspective is not only a matter of determining possible harms and benefits of synthetic biology applications synthetic biology also incorporates a specific technoscientific understanding of its research agenda and its research objects that has philosophical and ethical implications this edited volume sets out to explore and evaluate these synthetic biology worldviews and it proposes appropriate governance measures in addition legal challenges are discussed

Synthetic Biology 2015-11-26 a comprehensive and accessible survey of the major issues at the biology religion interface

Biology, Religion, and Philosophy 2021-04-08 this book addresses synthetic biology synbio a new and promising biotechnology that has attracted much interest from both a scientific and a policy perspective yet questions concerning the patentability of synbio inventions have not been examined in detail so far as a result it remains unclear whether these inventions are patentable on the basis of current norms and case law the book addresses this question focusing especially on the subject matter s eligibility and moral criteria it provides an overview of the legislation and decisions applicable to synbio patents and examines this new technology in view of the ongoing debate over the patentability of biotechnologies in general the legal analysis is complemented by the practical examination of several patent applications submitted to the european and us patent offices epo and uspto and by an assessment of the patent issues that are likely to be raised by future synbio developments

The Patentability of Synthetic Biology Inventions 2020-09-29 the brief presents a model for happiness based on current knowledge in evolutionary biology and neurobiology briefly the primary purpose of nervous systems is to direct an animal toward behaviour relevant for survival and procreation in primitive animals actions are based on reflexes while in humans the modules directing behaviour engage positive and negative affect good and bad feelings and they are swayed by cognitive processes the reason why evolution opted for this strategy was the improved flexibility in response i e we learn from previous experiences the human capacity for happiness is an accidental consequence an array of brain modules has evolved to care for various pursuits but recent studies suggest that they converge on shared neural circuits designed to generate positive and negative mood happiness can be construed as the net output of the relevant modules the briefs suggests a strategy for how to avoid having negative feelings such as anxiety depression and chronic pain dominate the mind and how to exercise positive feelings in short the book offers both a deeper understanding of what happiness is about and a framework for improving well being an array of brain modules has evolved to care for various pursuits but recent studies suggest that they converge on

shared neural circuits designed to generate positive and negative mood happiness can be construed as the net output of the relevant modules the book suggests a strategy for how to avoid having negative feelings such as anxiety depression and chronic pain dominate the mind and how to exercise positive feelings in short the book offers both a deeper understanding of what happiness is about and a framework for improving well being

Cambridge Introductions to Philosophy and Biology: Biology, Religion, and Philosophy 2012-03-30 this important text draws on decades of research arguing that modern nursing germinated and grew an ethics from its own native soil which is rich fulsome and philosophically informed grounded in the tradition and practice of nursing it is an ethics with a positive agenda for the good nurse a good society a healthy people and human flourishing this native nursing ethics was forgotten creating space for a foreign bioethics colonization of nursing in the second half of the twentieth century drawing from a wide range of sources from the usa the uk canada and ireland the book addresses the early and enduring ethical concerns values and ideals of nursing as a profession that engages in direct clinical practice and in developing policy fowler calls for reclaiming and renewing nursing s ethical tradition this systematic and comprehensive book is an essential contribution for students and scholars of nursing ethics

The Biology of Happiness 2024-04-15 this book touches on all of the hot topic issues of masculinity and violence including gun violence sexual assault and the metoo movement violence against women lgbtq people and people of color its unique approach will add to many conversations that should as sumerau explains be focused on masculinity and are far too often focused on something else taking the approach of talking with young college men who are privileged provides a unique look at how manhood and masculinity may not be progressing like many people hope and provides insights from all angles to critically examine the ways men construct and explain relationships between violence manhood and inequality in society

Nursing Ethics, 1880s to the Present 2020-08-21 praise for clinical case formulations matching the integrative treatment plan to the client second edition barbara ingram has put a career into the development of this book and it is wonderful my students love that it was written with them in mind and they love the statements designed to reduce anxiety and normalize the learning process this is an excellent book amy m rees turyn phd associate professor of counseling psychology lewis clark college a step by step model for individualized case conceptualization fully revised and updated the second edition of clinical case formulations provides step by step tools and insightful guidance for moving from first contact with a client to the development of an effective personalized treatment plan addressing the essential question every therapist faces how do i create a treatment plan that is the best match for my client this unique resource provides a systematic and thoughtful method for integrating ideas skills and techniques from different theoretical approaches it combines empirical research and clinical experience to create a case formulation that is tailor made for the client this comprehensive resource offers two tools to guide case formulations a problem oriented framework with a list of 28 standards for evaluating its application and a set of 30 core clinical hypotheses derived from the knowledge bases of psychology psychiatry counseling and social work professions the new edition includes hypotheses on emotional focus trauma and metacognitive perspective more detailed attention given to empirically supported therapies such as dialectical behavior therapy dbt and acceptance and commitment therapy act discussion on the

importance of bringing cultural competence to case formulation tasks with every client skill building activities throughout the text offering a thorough framework to help clients experience effective clinical service practitioners will learn to conceptualize clients needs in ways that lead to strong and individualized treatment plans as well as advice and guidance on what to do when selected interventions fail to produce the expected benefits

Violent Manhood 2011-11-01 carving nature at its joints in order to map the future of biology we need to understand where we are and how we got there present day biology is the realization of the famous metaphor of the organism as a *bête à machine* elaborated by descartes in part v of the *discours* a realization far beyond what anyone in the seventeenth century could have imagined until the middle of the nineteenth century that machine was an articulated collection of macroscopic parts a system of gears and levers moving gasses solids and liquids and causing some parts of the machine to move in response to the force produced by others then in the nineteenth century two divergent changes occurred in the level at which the living machine came to be investigated first with the rise of chemistry and the particulate view of the composition of matter the forces on macroscopic machine came to be understood as the manifestation of molecular events and functional biology became a study of molecular interactions that is the machine ceased to be a clock or a water pump and became an articulated network of chemical reactions until the first third of the twentieth century this chemical view of life as reflected in the development of classical chemistry treated the chemistry of biological molecules in much the same way as for any organic chemical reaction with reaction rates and side products that were the consequence of statistical properties of the concentrations of reactants

Clinical Case Formulations 2009-02-26 the current volume explores a variety of topical themes within the general field of religion defined as the search for the truth concerning the nature of one's relationship with being reality among the topics explored are evolution the origins of faith conceptual viruses suffering irreligion the new atheism nihilism sacredness the nature of the self mythology carl jung joseph campbell free will epistemology and spiritual abuse all of the foregoing topics are critically examined against a backdrop that helps orient the discussion more specifically most human beings wonder in one way or another about the nature of reality that is they seek to deal as best they can with the reality problem the final jeopardy challenge refers to the task of trying to work toward providing a best effort final response to the reality problem that resonates with and reflects to varying degrees the character of reality before the sands in the hourglass of time run out in a person's life

Mapping the Future of Biology 2018-11-06 as recent headlines reveal conflicts and debates around the world increasingly involve secularism national borders and traditional religions cannot keep people in tidy boxes as political struggles doctrinal divergences and demographic trends are sweeping across regions and entire continents and secularity is increasing in society with a growing number of people in many regions having no religious affiliation or lacking interest in religion simultaneously there is a resurgence of religious participation in the politics of many countries how might these diverse phenomena be better understood long reigning theories about the pace of secularization and ideal church state relations are under invigorated scrutiny by scholars studying secularism with new questions better data and fresh perspectives the oxford handbook of secularism offers a wide ranging and in depth examination of this global conversation bringing together the views of an international collection of prominent experts in their respective fields this is the essential

volume for comprehending the core issues and methodological approaches to the demographics and sociology of secularity the history and variety of political secularisms the comparison of constitutional secularisms across many countries from america to asia the key problems now convulsing church state relations the intersections of liberalism multiculturalism and religion the latest psychological research into secular lives and lifestyles and the naturalistic and humanistic worldviews available to nonreligious people

The Oxford Handbook of Secularism 2019-07-08 a range of views on the morality of synthetic biology and its place in public policy and political discourse synthetic biology which aims to design and build organisms that serve human needs has potential applications that range from producing biofuels to programming human behavior the emergence of this new form of biotechnology however raises a variety of ethical questions first and foremost whether synthetic biology is intrinsically troubling in moral terms is it an egregious example of scientists playing god synthetic biology and morality takes on this threshold ethical question as well as others that follow offering a range of philosophical and political perspectives on the power of synthetic biology the contributors consider the basic question of the ethics of making new organisms with essays that lay out the conceptual terrain and offer opposing views of the intrinsic moral concerns discuss the possibility that synthetic organisms are inherently valuable and address whether and how moral objections to synthetic biology could be relevant to policy making and political discourse variations of these questions have been raised before in debates over other biotechnologies but as this book shows they take on novel and illuminating form when considered in the context of synthetic biology contributors john basl mark a bedau joachim boldt john h evans bruce jennings gregory e kaebnick ben larson andrew lustig jon mandle thomas h murray christopher j preston ronald sandler

Higher RMPS: Religious & Philosophical Questions, Second Edition 2013-07-26 informed by critical religion perspective in religious studies and postcolonial self reflection in sociology this book interrogates the ideas of religion and the secular in social theory and sociology it argues that as long as social theory and sociological discourse embed the religion secular distinction and locate themselves on the secular side of the binary sociology will continue to serve the very ideologies it tries to subvert namely western modernity coloniality
