many people associate fashion with style and although it took me many years i realized that they are two different things and serve different purposes if you know anything about my company lady stylistique then you know that i see fashion as a money scheme and believe it hinders you from becoming the best version of yourself i believe it s personal style that not only helps us better connect with ourselves but it also helps us become the best version of ourselves which you ll see by the end of this book so what is style style is anything people can see touch hear smell or speak as it relates to you that reflects who you are it s symbols and clues that allow people to get to know you and for you to know yourself without you saying a word

Frederika Bremer as the Originator of the Swedish Novel 1927

in the general area of style study or stylistics there is no shortage of ideas definitions or published works it is hoped in the present volume to contribute to the prosperity of the discipline mainly by clarifying and exemplifying how pragmatic considerations may be relevant to any study of style in the conviction that pragmastylistics is more interesting and useful than stylistics on its own the starting point must be a brief survey of the definitions and style and stylistics the very form of the latter term suggests a scientific and orderly rather than an intuitive or impressionistic investigation of style there are two separate levels of study one a general methodical and scientific discipline the other an application of its methods or postulates to the analysis of the style of a specific utterance text speaker writer movement or period it is clear that in order to approach either we must first attempt to understand style
