

## **Catalysis and Automotive Pollution Control III**

1995-11-02

these proceedings are based on the third of a series of symposia devoted to the use of catalysis for the depollution of exhaust gases of motor vehicles although catalysts have been used for this purpose for some thirty years the subject is still very topical because of its economic impact the increasing number of submitted accepted and published papers amply attests to this fact

## **Proceedings of the 1997 Noise and Vibration Conference**

1997

a choice outstanding academic title the encyclopedia of automotive engineering provides for the first time a large unified knowledge base laying the foundation for advanced study and in depth research through extensive cross referencing and search functionality it provides a gateway to detailed but scattered information on best industry practice engendering a better understanding of interrelated concepts and techniques that cut across specialized areas of engineering beyond traditional automotive subjects the encyclopedia addresses green technologies the shift from mechanics to electronics and the means to produce safer more efficient vehicles within varying economic restraints worldwide the work comprises nine main parts 1 engines fundamentals 2 engines design 3 hybrid and electric powertrains 4 transmission and driveline 5 chassis systems 6 electrical and electronic systems 7 body design 8 materials and manufacturing 9 telematics offers authoritative coverage of the wide ranging specialist topics encompassed by automotive engineering an accessible point of reference for entry level engineers and students who require an understanding of the fundamentals of technologies outside of their own expertise or training provides invaluable guidance to more detailed texts and research findings in the technical literature developed in conjunction with fisita the umbrella organisation for the national automotive societies in 37 countries around the world and representing more than 185 000 automotive engineers 6 volumes automotive reference com an essential resource for libraries and information centres in industry research and training organizations professional societies government departments and all relevant engineering departments in the academic sector
