Neutrosophic Physics: More Problems, More Solutions (Collected Papers) 2010 in this concern neutrosophic logics and neutrosophy in general established by prof smarandache is one of the promising research instruments which could be successfully applied by a theoretical physicist naturally neutrosophic logics being a part of modern logics states that neutralities may be between any physical states or states of space time in particular this leads sometimes to paradoxical situations when two opposite states are known in physics while the neutral state between them seems absolutely impossible from a physical viewpoint meanwhile when considering the theoretically possible neutralities in detail we see that these neutral states indicate new phenomena which were just discovered by the experimentalists in the last decade or shows a new field for further experimental studies as for example unmatter which is a state between matter and antimatter research papers presented in this collection manifest only a few of many possible applications of neutrosophic logics to theoretical physics d rabounski the multi space with its multi structure is a theory of everything it can be used for example in the unified field theory that tries to unite the gravitational electromagnetic weak and strong interactions in physics f smarandache
