Contrast Analysis 1985-04-26

this book first published in 1985 is for those seeking appropriate statistical approaches to research data that is devoted entirely to the topic of contrasts contrast analysis permits us to ask more focused questions of our data in return for a small amount of simple computation we get greater statistical power and can make clearer substantive interpretations of the research results contrast analysis should be employed in the context of the analysis of variance whenever the numerator degrees of freedom are greater than one which is probably most of the time unfortunately it is employed relatively rarely by behavioural and social scientists this book makes it possible for non mathematical data analysts to avail themselves of contrasts and thereby simply and efficiently to address the focused questions posed by their theories hypotheses and hunches a wide range of researchers in the behavioural and social sciences education and business will find this book an invaluable resource

intersubjectivity and usage play central roles in figurative language and are pivotal notions for a cognitively realistic research on figures of thought speech and communication this volume brings together thirteen studies that explore the relationship between figurativity intersubjectivity and usage from the cognitive linguistics perspective the studies explore

the impact of figurativity on areas of lexicon and grammar on real discourse and across different semiotic systems some studies focus on the psychological processes of the comprehension of figurativity other studies address the ways in which figures of thought and language are socially shared and the variation of figures through time and space moreover some contributions are established on advanced corpus based techniques and experimental methods there are studies about metaphor metonymy irony and puns about related processes such as humor empathy and ambiguation and about the interaction between figures overall this volume offers the advantages and the opportunities of an interactional and usage based perspective of figurativity embracing both the psychological and the intersubjective reality of figurative thought and language and empirically emphasizing the multidimensional character of figurativity its central function in thought and its impact on everyday communication
