its kind to give a complete coverage of textiles for protection covers a wide variety of themes from materials and design through protection against specific hazards to specific applications the first book of its kind to give a complete coverage of textiles for protection written by leading protective textiles experts from around the world coronary artery disease is the most commonly encountered problem in adult cardiology in the world echocardiography is the most commonly used imaging modality encountered in cardiology practice in the world even though there are many acute coronary syndrome acs reference books and echocardiography reference books there is no single practical book so far in the literature with focus on the combined topics the authors believe that this will be the first book to provide information on how echocardiography can be used in prevention diagnosis and treatment of acs neuromuscular disorders presents a multi disciplinary approach to the management and therapeutic treatment of the full range of neuromuscular disorders and resulting complications dr tulio bertorini and a contributing team of the world s leading authorities in the field provide the latest tools and strategies for minimizing disability and maximizing quality of life effectively treat your patients using the latest management tools and targeted therapeutic strategies manage all neuromuscular disorders as well as resulting complications through comprehensive coverage of diagnosis and evaluations treatments and outcomes apply the multi disciplinary approach of an expert in clinical neuromuscular care and a team of world renown contributors easily refer to tools for diagnosis treatment algorithms and drug tables included throughout the text this comprehensive handbook of consent in surgical subspecialties is dedicated to the risks and complications that a child needs to be consented for in the vast majority of pediatric surgical procedures with evidence base and outcomes the chapters address common and rare complications encountered in pediatric subspecialty practice which clinicians need to be aware of to allow them to take fully informed consent the contributors are renowned for their expertise in pediatric urology and provide evidence and outcome based areas for consent in the first book of the series consent in pediatric urology engineering analytics is becoming a necessary skill for every engineer areas such as operations research simulation and machine learning can be totally transformed through massive volumes of data this book is intended to be an introduction to engineering analytics that can be used to improve performance tracking customer segmentation for resource optimization patterns and classification strategies and logistics control towers basic methods in the areas of visual descriptive predictive and prescriptive analytics and big data are introduced industrial case studies and example problem demonstrations are used throughout the book to reinforce the concepts and applications the book goes on to cover visual analytics and its relationships simulation from the respective dimensions and machine learning and artificial intelligence from different paradigms viewpoints the book is intended for professionals wanting to work on analytical problems for engineering students researchers chief technology officers and directors that work within the areas and fields of industrial engineering computer science statistics electrical engineering operations research and big data in chapters written by authors on the cutting edge of investigative research biological degradation and bioremediation of toxic chemicals thoroughly covers the range of such organisms and the use of such pathways also described are genetic and molecular biological techniques to improve the ability of microorganisms to degrade harmful compounds including the conversion of wastes into useful products the book provides a comprehensive basis for further research indicating future directions for biotechnological applications this book explores the factors behind and the implications of the

2006 coup it brings together contributions from leading scholars local personalities civil society activists union leaders journalists lawyers soldiers and politicians including deposed prime ministers laisenia qarase and mahendra chadhry the 2006 military takeover in fiji a coup to end all coups is essential reading for those with an interest in the contemporary history of fiji politics in deeply divided societies or in military intervention in civilian politics the middle east has for a long time been at the centre of global trade as well as political interest demographic and social change shifts in global economic power rapid urbanisation climate change and resource scarcity and significant technological development make this region both complex and hugely important doing business in the middle east highlights both the opportunities and constraints confronting foreign investors in the region and proposes strategies on how best to overcome them the book explores the existing and emerging political and legal frameworks sociocultural patterns national infrastructures regulatory environment conflict resolution and how to negotiate in the middle east it also provides useful insights into how to approach advertising and marketing promotion and distribution and also at the strategies for investing in the region and appropriate modes of entry with a number of features such as case studies examples of effective and ineffective practices clear takeaways and a note on a future agenda on each given topic this book is highly practical based on robust research this comprehensive guide to doing business in the middle east is an ideal reference tool for potential foreign investors those who are already doing business or intend to do so in the region and for a range of business and policy decision makers the book is also suitable for students and researchers in the fields of international management and business international and strategic hrm cross cultural management and business communication the covid 19 pandemic has created chaos in the business world and forced leaders to rethink their operational status quo though the benefits outweigh the risks the challenges in digitalised economies are as sophisticated as the solutions they offer prayag shukla s poems in hindi have enchanted young and old alike this collection of poems translated into english brings the joy of his writing to a new set of readers siraj saxena s innovative artwork adds to the appeal of this classic collection this story is an unfinished one the story of a man dying in slow motion he clings to flashes of memory and grapples with his reality as he chases the mirage of his memory his world disappears fragment by fragment it is not just his being his self that disintegrates every moment it is the universe as he knew it that fades into oblivion this is a tale of a man building bridges to nowhere everything around you changes when you take care of a parent with dementia this person who had been bedrock of your strength to whom you looked up to and who was always there for you is now nothing close to his former self his enquiring glances puzzlement doubts and demand for answers signal a total shift in relationship the despair also reveals the person you are temperamental and escapist but this journey has life lessons too when drama of life ends you will have nothing today is all you have so enjoy life with tears there is laughter and amidst confusion there is clarity that life goes on and we must flow with it here is a world within sona is smarter than ever you may have read how she helped her father this time she finds her motherâ s work very interesting access to food with enough calories and nutrients is a fundamental right of every human the global population has exceeded 7 8 billion and is expected to pass 10 billion by 2055 such rapid population increase presents a great challenge for food supply more grain production is needed to provide basic calories for humans thus it is crucial to produce 60 110 more food to fill the gap between food production and the demand of future generations meanwhile food nutritional values are of increasing

interest to accommodate industrialized modern lives the instability of food production caused by global climate change presents another great challenge the global warming rate has become more rapid in recent decades with more frequent extreme climate change including higher temperatures drought and floods our world faces various unprecedented scenarios such as rising temperatures which causes melting glaciers and the resulting various biotic and abiotic stresses ultimately leading to food scarcity in these circumstances it is of utmost importance to examine the genetic basis and extensive utilization of germplasm to develop climate resilient cultivars through the application of plant breeding and biotechnological tools future crops must adapt to these new and unpredictable environments crop varieties resistant to biotic and abiotic stresses are also needed as plant disease insects drought high and low temperature stresses are expected to be impacted by climate change thus we need a food production system that can simultaneously satisfy societal demands and long term development since the green revolution in the 1960s farming has been heavily dependent on high input of nitrogen and pesticides this leads to environmental pollution which is not sustainable in the long run therefore a new breeding scheme is urgently needed to enable sustainable agriculture including new strategies to develop varieties and crops that have high yield potential high yield stability and superior grain quality and nutrition while also using less consumption of water fertilizer and chemicals in light of environmental protection while we face these challenges we also have great opportunities especially with flourishing developments in omics technologies high quality reference genomes are becoming available for a larger number of species with some species having more than one reference genome the genome wide re sequencing of diverse varieties enables the identification of core and pan genomes an integration of omics data will enable a rapid and high throughput identification of many genes simultaneously for a relevant trait this will change our current research paradigm fundamentally from single gene analysis to pathway or network analysis this will also expand our understanding of crop domestication and improvement in addition with the knowledge gained from omics data in combination with new technologies like targeted gene editing we can breed new varieties and crops for sustainable agriculture paris 1989 alone in her luminous apartment on Île saint louis sylvie discovers a mysterious letter among her late lover julien s possessions launching her into a decades old search for a child who vanished in the turbulence of the second world war she is unaware that she is watched over by julien s ghost his love for her powerful enough to draw him back to this world though doomed now to remain a silent observer sylvie s quest leads her deep into the secrets of julien s past shedding new light on the dark days of nazi occupied paris a timeless story of love and loss haunting paris matches emotional intensity with lyrical storytelling to explore grief family secrets and the undeniable power of memory volume 1 of this edited book covers basics of endothelial keratoplasty and various surgical techniques currently in use chapters on dsaek dmek big bubble air pump assisted and endoilluminator assisted dmek pdek pre descemet s endothelial keratoplasty pdek and descemet s membrane endothelial transfer dmet complete the topics on various surgical procedures complex situations and complications have been covered in volume 2 of mastering endothelial keratoplasty endothelial keratoplasty is a field of great interest to all corneal surgeons it is an exciting and evolving field in corneal transplantation as the newer techniques of dsaek dmek e dmek and pdek have inherent advantages that make them supersede the older techniques by far hence in today s scenario with the clearly superior results that these techniques offer it is imperative for all corneal surgeons to learn them and know everything about managing the

patient from the pre operative to the postoperative period this two volume book is a must read for the beginner as well as the established ophthalmologist with interest in corneal transplantation it is also a must have for educational institutions hospital based libraries and for post graduate students fellows and residents who want to expand their knowledge food preservation volume six the latest in the nanotechnology in the agri food industry series discusses how nanotechnology can improve and control the growth of pathogenic and spoilage compounds to improve food safety and quality the book includes research information on nanovesicles nanospheres metallic nanoparticles nanofibers and nanotubes and how they are capable of trapping bioactive substances to increase and maintain the stability of compounds often sensitive under typical food processing and storage conditions this book will be useful to a wide audience of food science research professionals and professors and students doing research in the field describes the effective utilization of nanostructured antimicrobials in toxicological studies and real food systems offers research strategies for understanding opportunities in antimicrobial nanostructures and the potential challenges of their toxicity presents diverse applications of nanostructured antimicrobials in food preservation covers the potential benefits of nanotechnology and methods of risk assessment that ensure food safety open channel flow 2nd edition is written for senior level undergraduate and graduate courses on steady and unsteady open channel flow the book is comprised of two parts part i covers steady flow and part ii describes unsteady flow the second edition features considerable emphasis on the presentation of modern methods for computer analyses full coverage of unsteady flow inclusion of typical computer programs new problem sets and a complete solution manual for instructors

Knowledge Management in Practice 2008 this is the third entry in an ambitious highly regarded km book series edited by t kanti srikantiah and michael e d koenig where knowledge management for the information professional 2000 offered information professionals an introduction to km and knowledge management lessons learned 2004 assessed km applications and innovations knowledge management in practice looks at how km can be and is being implemented in organizations today featuring the contributions of more than 20 experts in the field the book is unique in surveying the efforts of km specialists to extend knowledge beyond their organizations and in providing a framework for understanding user context the result is a must read for any professional seeking to connect organizational km systems with increasingly diverse and geographically dispersed user communities

Business Law, 5th Edition 2020-01-21 business law 5th edition james et al is written for business students to provide a clear and accessible introduction to the legal system business law courses are the first exposure to law for many business students and the first time they are obliged to think deeply about the discipline this updated edition presents business law in a practical context rather than the doctrinal context that many major legal publishers use the business law interactive e text features a range of instructional media content designed to provide students with an engaging learning experience this includes practitioner videos from herbert smith freehills animated work problems and questions with immediate feedback this new edition is a unique resource that can form the basis of a blended learning solution for lecturers

Gas Well Testing Handbook 2003-09-24 this title deals exclusively with theory and practice of gas well testing pressure transient analysis techniques and analytical methods required to interpret well behavior in a given reservoir and evaluate reservoir quality simulation efforts and forecast producing capacity a highly practical edition this book is written for graduate students reservoir simulation engineers technologists geologists geophysicists and technical managers the author draws from his extensive experience in reservoir simulation well testing pvt analysis basics and production operations from around the world and provides the reader with a thorough understanding of gas well test analysis basics the main emphasis is on practical field application where over 100 field examples are resented to illustrate basic methods for analysis simple solutions to the diffusivity equation are discussed and their physical meanings examined each chapter focuses in how to use the information gained in well testing to make engineering and economic decisions and an overview of the current research models and their equations are discussed in relation to gas wells homogenous heterogeneous naturally and hydraulically fractured reservoirs handy portable reference with thousands of equations and procedures there is currently no other reference or handbook on the market that focuses only on gas well testing offers one stop shopping for the drilling and reservoir engineer on gas well testing issues

Postcolonial Star Wars 2020-05-15 this collection of twenty short essays draws upon postcolonial theories established by Edward Said, Frantz Fanon, and Albert Camus to help readers better understand the power structures in Star Wars. Divided into five sections: Rebellion, Racism, Feminism, The Subaltern, and The Gothic, the text considers the narrative and technical aspects of various Star Wars films, animated television series, comics, and short stories. While this collection will be of interest to any Star Wars fan wishing to deepen their knowledge of the literature, history, and politics that influenced the creators of the galaxy far, far away, it will also be compelling reading for undergraduates enrolled in first-year writing courses and those taking seminars on science fiction, postcolonial literature, or media studies.

Fundamentals of Clinical Medicine 2004 this new edition is fully updated to address and include significant changes in hospital environments including managed care, delivery methodologies, how Medicare and Medicaid work, and the role of nurse practitioners, physician assistants, and other ancillary hospital personnel. Patient screening recommendations from agencies such as the U.S. Preventive Services Task Force and the American Cancer Society, convenient lists of common drug reactions, and commonly used alternative and complementary medicine treatment modalities are included. Expanded commonly used medical abbreviations and acronyms are provided. Students benefit from a convenient handbook that offers a crucial link between basic sciences years and the hospital experience and are aided in achieving mastery of proper physical diagnosis and medical workup. For accurate diagnosis, concise disease pathophysiology reviews, *Synopsis of Biochemistry with Question Bank & Mnemonics* 2023-03-25 synopsis of biochemistry may be a boon for medical PG aspirants, medical students, dental students, and students of allied medical courses.

Synopsis of Physiology with Question Bank & Mnemonics 2011 synopsis of physiology may be a boon for medical PG entrance aspirants, MBBS students, and students of allied medical sciences. Easy to remember mnemonics are used to memorize long and small lists. Each chapter ends with multiple-choice questions. 1000 multiple-choice questions (MCQ) are listed at the end.

Advanced Technology for Smart Environment and Energy 2017-02-03 this book presents smart energy management in the context of energy transition. It presents the motivation, impacts, and challenges related to this hot topic. Then it focuses on the use of techniques and tools based on artificial intelligence (AI) to solve the challenges related to this problem. A global diagram presenting the general principle of these techniques is presented. Then these techniques are compared according to a set of criteria in order to show their advantages and disadvantages with respect to the conditions and constraints of intelligent energy management applications in the context of energy transition. Several examples are used throughout the white paper to illustrate the concepts and methods presented. An intelligent electrical network (smart grid, SG) includes heterogeneous and distributed electricity production, transmission, distribution, and consumption components. It is the next generation of electricity network, able to manage electricity demand, consumption, production, distribution in a sustainable, reliable, and economical way, taking into account the penetration of renewable energies (solar, wind, etc.). Therefore, a SG smart grid also includes an intelligent layer that analyzes the data provided by consumers as well as that collected from the production side in order to optimize consumption and production according to weather conditions, the profile, and habits of the consumer. In addition, this system can improve the use of green energy through renewable energy penetration and demand response.

Geriatric Anesthesia: A Practical Guide 2023-05-04 geriatric anesthesia a practical guide is a comprehensive reference on geriatric anesthesia the book is divided into three sections the first section covers the basics of both anatomical and physiological changes in

senescence and important polypharmacy considerations common in elderly patients the next section covers anesthesia for cardiac and non surgical patients various controversies and legal ethical issues that are particularly significant in the elderly such as advance directives code status discussions specific patient groups and shared decision making prior to surgical interventions are covered in the final section key features 20 referenced chapters covering basic geriatric anesthesia considerations cardiac and non surgical patients and special topics respectively contributions and references from experienced anesthesiologists emphasis on tailoring perioperative management depending on specific circumstances of patients addresses novel and commonly overlooked topics related to the geriatric population this book is a guide for both anesthesia providers and non anesthesia medical providers trainees and students it equips them with necessary information to understand and devise anesthetic plans while being aware of postoperative complications and the respective treatment and management options

Textiles for Protection 2023-05-29 in today s climate there is an increasing requirement for protective textiles whether for personal protection protection against the elements chemical nuclear or ballistic attack this comprehensive book brings together the leading protective textiles experts from around the world it covers a wide variety of themes from materials and design through protection against specific hazards to specific applications this is the first book of its kind to give a complete coverage of textiles for protection covers a wide variety of themes from materials and design through protection against specific hazards to specific applications the first book of its kind to give a complete coverage of textiles for protection written by leading protective textiles experts from around the world [Echocardiography in Acute Coronary Syndrome](#) 2014-08-01 coronary artery disease is the most commonly encountered problem in adult cardiology in the world echocardiography is the most commonly used imaging modality encountered in cardiology practice in the world even though there are many acute coronary syndrome acs reference books and echocardiography reference books there is no single practical book so far in the literature with focus on the combined topics the authors believe that this will be the first book to provide information on how echocardiography can be used in prevention diagnosis and treatment of acs

Neuromuscular Disorders: Management and Treatment E-Book 2023-01-01 neuromuscular disorders presents a multi disciplinary approach to the management and therapeutic treatment of the full range of neuromuscular disorders and resulting complications dr tulio bertorini and a contributing team of the world s leading authorities in the field provide the latest tools and strategies for minimizing disability and maximizing quality of life effectively treat your patients using the latest management tools and targeted therapeutic strategies manage all neuromuscular disorders as well as resulting complications through comprehensive coverage of diagnosis and evaluations treatments and outcomes apply the multi disciplinary approach of an expert in clinical neuromuscular care and a team of world renown contributors easily refer to tools for diagnosis treatment algorithms and drug tables included throughout the text *Consent in Pediatric Urology* 1999 this comprehensive handbook of consent in surgical subspecialties is dedicated to the risks and complications that a child needs to be consented for in the vast majority of pediatric surgical procedures with evidence base and outcomes the chapters address common and rare complications encountered in pediatric subspecialty practice which clinicians need to be aware of to allow them to take fully informed consent the contributors are renowned for their expertise in pediatric urology and

provide evidence and outcome based areas for consent in the first book of the series consent in pediatric urology

Engineering Analytics 2019-06-18 engineering analytics is becoming a necessary skill for every engineer areas such as operations research simulation and machine learning can be totally transformed through massive volumes of data this book is intended to be an introduction to engineering analytics that can be used to improve performance tracking customer segmentation for resource optimization patterns and classification strategies and logistics control towers basic methods in the areas of visual descriptive predictive and prescriptive analytics and big data are introduced industrial case studies and example problem demonstrations are used throughout the book to reinforce the concepts and applications the book goes on to cover visual analytics and its relationships simulation from the respective dimensions and machine learning and artificial intelligence from different paradigms viewpoints the book is intended for professionals wanting to work on analytical problems for engineering students researchers chief technology officers and directors that work within the areas and fields of industrial engineering computer science statistics electrical engineering operations research and big data

Biological Degradation and Bioremediation of Toxic Chemicals 2016-08-08 in chapters written by authors on the cutting edge of investigative research biological degradation and bioremediation of toxic chemicals thoroughly covers the range of such organisms and the use of such pathways also described are genetic and molecular biological techniques to improve the ability of microorganisms to degrade harmful compounds including the conversion of wastes into useful products the book provides a comprehensive basis for further research indicating future directions for biotechnological applications

The 2006 Military Takeover in Fiji 2016-08-31 this book explores the factors behind and the implications of the 2006 coup it brings together contributions from leading scholars local personalities civil society activists union leaders journalists lawyers soldiers and politicians including deposed prime ministers laisenia qarase and mahendra chaudhry the 2006 military takeover in fiji a coup to end all coups is essential reading for those with an interest in the contemporary history of fiji politics in deeply divided societies or in military intervention in civilian politics

Doing Business in the Middle East 1995 the middle east has for a long time been at the centre of global trade as well as political interest demographic and social change shifts in global economic power rapid urbanisation climate change and resource scarcity and significant technological development make this region both complex and hugely important doing business in the middle east highlights both the opportunities and constraints confronting foreign investors in the region and proposes strategies on how best to overcome them the book explores the existing and emerging political and legal frameworks sociocultural patterns national infrastructures regulatory environment conflict resolution and how to negotiate in the middle east it also provides useful insights into how to approach advertising and marketing promotion and distribution and also at the strategies for investing in the region and appropriate modes of entry with a number of features such as case studies examples of effective and ineffective practices clear takeaways and a note on a future agenda on each given topic this book is highly practical based on robust research this comprehensive guide to doing business in the middle east is an ideal reference tool for potential foreign investors those who are already doing business or intend to do so in the region and for a

range of business and policy decision makers the book is also suitable for students and researchers in the fields of international management and business international and strategic hrm cross cultural management and business communication

Smart Analytics, Artificial Intelligence and Sustainable Performance Management in a Global Digitalised Economy

2022-06-15 the covid 19 pandemic has created chaos in the business world and forced leaders to rethink their operational status quo though the benefits outweigh the risks the challenges in digitalised economies are as sophisticated as the solutions they offer

Here Comes the Camel and Other Poems prayag shukla s poems in hindi have enchanted young and old alike this collection of poems translated into english brings the joy of his writing to a new set of readers siraj saxena s innovative artwork adds to the appeal of this classic collection

A World Within this story is an unfinished one the story of a man dying in slow motion he clings to flashes of memory and grapples with his reality as he chases the mirage of his memory his world disappears fragment by fragment it is not just his being his self that disintegrates every moment it is the universe as he knew it that fades into oblivion this is a tale of a man building bridges to nowhere everything around you changes when you take care of a parent with dementia this person who had been bedrock of your strength to whom you looked up to and who was always there for you is now nothing close to his former self his enquiring glances puzzlement doubts and demand for answers signal a total shift in relationship the despair also reveals the person you are temperamental and escapist but this journey has life lessons too when drama of life ends you will have nothing today is all you have so enjoy life with tears there is laughter and amidst confusion there is clarity that life goes on and we must flow with it here is a world within

Smart Sona Helps Her Mother sona is smarter than ever you may have read how she helped her father this time she finds her motherâ s work very interesting

Sustainable Agriculture in the Era of the OMICs Revolution access to food with enough calories and nutrients is a fundamental right of every human the global population has exceeded 7.8 billion and is expected to pass 10 billion by 2055 such rapid population increase presents a great challenge for food supply more grain production is needed to provide basic calories for humans thus it is crucial to produce 60-110% more food to fill the gap between food production and the demand of future generations meanwhile food nutritional values are of increasing interest to accommodate industrialized modern lives the instability of food production caused by global climate change presents another great challenge the global warming rate has become more rapid in recent decades with more frequent extreme climate change including higher temperatures drought and floods our world faces various unprecedented scenarios such as rising temperatures which causes melting glaciers and the resulting various biotic and abiotic stresses ultimately leading to food scarcity in these circumstances it is of utmost importance to examine the genetic basis and extensive utilization of germplasm to develop climate resilient cultivars through the application of plant breeding and biotechnological tools future crops must adapt to these new and unpredictable environments crop varieties resistant to biotic and abiotic stresses are also needed as plant disease insects drought high and low temperature stresses are expected to be impacted by climate change thus we need a food production system that can simultaneously satisfy societal demands and long term development since the green revolution in the 1960s farming has been heavily

dependent on high input of nitrogen and pesticides this leads to environmental pollution which is not sustainable in the long run therefore a new breeding scheme is urgently needed to enable sustainable agriculture including new strategies to develop varieties and crops that have high yield potential high yield stability and superior grain quality and nutrition while also using less consumption of water fertilizer and chemicals in light of environmental protection while we face these challenges we also have great opportunities especially with flourishing developments in omics technologies high quality reference genomes are becoming available for a larger number of species with some species having more than one reference genome the genome wide re sequencing of diverse varieties enables the identification of core and pan genomes an integration of omics data will enable a rapid and high throughput identification of many genes simultaneously for a relevant trait this will change our current research paradigm fundamentally from single gene analysis to pathway or network analysis this will also expand our understanding of crop domestication and improvement in addition with the knowledge gained from omics data in combination with new technologies like targeted gene editing we can breed new varieties and crops for sustainable agriculture

Journal of Engineering Mechanics paris 1989 alone in her luminous apartment on Île saint louis sylvie discovers a mysterious letter among her late lover julien s possessions launching her into a decades old search for a child who vanished in the turbulence of the second world war she is unaware that she is watched over by julien s ghost his love for her powerful enough to draw him back to this world though doomed now to remain a silent observer sylvie s quest leads her deep into the secrets of julien s past shedding new light on the dark days of nazi occupied paris a timeless story of love and loss haunting paris matches emotional intensity with lyrical storytelling to explore grief family secrets and the undeniable power of memory

Haunting Paris volume 1 of this edited book covers basics of endothelial keratoplasty and various surgical techniques currently in use chapters on dsaek dmek big bubble air pump assisted and endoilluminator assisted dmek pdek pre descemet s endothelial keratoplasty pdek and descemet s membrane endothelial transfer dmet complete the topics on various surgical procedures complex situations and complications have been covered in volume 2 of mastering endothelial keratoplasty endothelial keratoplasty is a field of great interest to all corneal surgeons it is an exciting and evolving field in corneal transplantation as the newer techniques of dsaek dmek e dmek and pdek have inherent advantages that make them supersede the older techniques by far hence in today s scenario with the clearly superior results that these techniques offer it is imperative for all corneal surgeons to learn them and know everything about managing the patient from the pre operative to the postoperative period this two volume book is a must read for the beginner as well as the established ophthalmologist with interest in corneal transplantation it is also a must have for educational institutions hospital based libraries and for post graduate students fellows and residents who want to expand their knowledge

Mastering Endothelial Keratoplasty food preservation volume six the latest in the nanotechnology in the agri food industry series discusses how nanotechnology can improve and control the growth of pathogenic and spoilage compounds to improve food safety and quality the book includes research information on nanovesicles nanospheres metallic nanoparticles nanofibers and nanotubes and how they are capable of trapping bioactive substances to increase and maintain the stability of compounds often sensitive under typical food

processing and storage conditions this book will be useful to a wide audience of food science research professionals and professors and students doing research in the field describes the effective utilization of nanostructured antimicrobials in toxicological studies and real food systems offers research strategies for understanding opportunities in antimicrobial nanostructures and the potential challenges of their toxicity presents diverse applications of nanostructured antimicrobials in food preservation covers the potential benefits of nanotechnology and methods of risk assessment that ensure food safety

Food Preservation open channel flow 2nd edition is written for senior level undergraduate and graduate courses on steady and unsteady open channel flow the book is comprised of two parts part i covers steady flow and part ii describes unsteady flow the second edition features considerable emphasis on the presentation of modern methods for computer analyses full coverage of unsteady flow inclusion of typical computer programs new problem sets and a complete solution manual for instructors
