during the period 1964-1972 Stephen L. Adler wrote seminal papers on high energy neutrino processes, current algebras, soft pion theorems, sum rules, and perturbation theory anomalies that helped lay the foundations for our current standard model of elementary particle physics. These papers are reprinted here together with detailed historical commentaries describing how they evolved, their relation to other work in the field, and their connection to recent literature. Later important work by Dr. Adler on a wide range of topics in fundamental theory, phenomenology, and numerical methods, and their related historical background, is also covered in the commentaries and reprints. This book will be a valuable resource for graduate students and researchers in the fields in which Dr. Adler has worked, and for historians of science studying physics in the final third of the twentieth century, a period in which an enduring synthesis was achieved.

Among the most prevalent and personally devastating psychological disorders, the development of a cognitive approach to obsessive compulsive disorder (OCD) has transformed our understanding and treatment of it. In this highly practical and accessible book, Jonathan Abramowitz presents a model of OCD grounded in the most up-to-date research that incorporates both cognitive and behavioral processes. He then offers a step-by-step guide to psychological treatment that integrates psychoeducation, cognitive techniques, and behavioral therapy, exposure, and response prevention. Unlike other manuals for the treatment of OCD, this book teaches the reader how to tailor the choice of techniques and delivery modes for individuals presenting with a wide range of specific OCD symptoms, such as contamination fears and cleaning rituals, fears of harm, and compulsive checking, symmetry, and ordering, and severe obsessions with mental rituals. The techniques are illustrated with numerous case examples. Clinical forms and handouts are provided for use with patients. A final chapter suggests strategies for overcoming common obstacles in treatment.

Grade school teacher and aspiring author Peregrine Long sees a Chinese family on board a ship in his morning tea. The image inspires him to write the story of this family, but then a woman turns up at his door claiming that he's writing her family history exactly as it happened. She doesn't like it, but she has one question: what happened to the little boy of the family, her long-lost uncle, throughout the course of a month-long tempest that begins to wash the peninsula out from beneath them? Peregrine searches modern-day San Francisco and its surroundings, and through his continued writing of Southern China and the Pacific immigration experience of a century ago for the missing boy, the clues uncovered lead Peregrine to question not only the nature of his writing but also his knowledge of his own past and his understanding of his identity.
