Reality Check 2022-04-11

the middle east and north africa economies face an uncertain recovery the war in ukraine presents significant challenges to the global economy and the mena region inflationary pressures brought about by the pandemic are likely to be further exacerbated by the conflict the potential for rising food prices is even higher which is likely to hurt the wallets of the poor and vulnerable in the region the covid 19 pandemic continues to cast a shadow as the latest variant sweeps over the region countries grapple with a host of problems depending on initial conditions and policy priorities the region like the rest of the world is not out of the woods yet vaccinations remain the effective path out of the pandemic leading to lower hospitalizations and death rates testing helps curb the spread during times of uncertainty it is important to not be overconfident about the region's growth prospects growth forecasts serve as a significant signpost for policymakers to chart a path forward over the last decade growth forecasts in the mena region have often been inaccurate and overly optimistic which can lead to economic contractions down the road due to ebullient borrowing there is considerable room for the region to improve its forecasts that are largely hindered by opaque data systems growth volatility and conflict the mena region lags considerably in the timely production of credible statistics a key finding of the report is that the best way to improve forecasters is to provide forecasters with as much good quality information as possible

After the Crash 2019-10-08

The Institutional Topology of International Regime Complexes 2023-10-05

the implicit topology of international institutional complexes varies greatly across policy areas in some areas the lion's share of everyday policy cooperation is shaped by a single institution with alternative and more regional institutions operating in its shadow in other policy fields institutional structures appear to be different seeing a range of non-hierarchical decentralized alternative institutions the institutional topology of international regime complexes mapping inter-institutional structures in global governance provides a systematic conceptualization and explanation of the evolution of these varying institutional topologies underlying regime complexes across five issue areas of global governance intellectual property

protection tax avoidance financial stability development aid and energy governance by providing an empirically grounded network based conceptualization and mapping of institutional topologies as well as a theoretical explanation for their variation across policy space and time the book offers a comprehensive analysis of both the empirical manifestation of inter institutional structures across various policy fields of global governance and the issue specific factors that shape the varying institutional trajectories spurring de centralization daßler combines quantitative network analyses with qualitative case studies to trace institutional decentralization processes across five highly relevant issue areas of global governance this volume shows how the nature of issue specific cooperation problems translates into disparate structures among multilateral institutions occupying the same regime complex in light of growing concerns about the future trajectories of global governance in times of heightened geopolitical tensions daßler offers a fresh perspective to comparatively capture the profoundly varying institutional landscapes across different issue areas and their associated challenges and benefits of multilateral cooperation transformations in governance is a major academic book series from oxford university press it is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks it brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance the series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars the series is edited by liesbet hooghe and gary marks of the university of north carolina chapel hill and walter mattli of the university of oxford

Monetary Policy after the Great Recession 2020-11-09

walter bagehot noticed once that john bull can stand many things but he cannot stand two per cent well for several years he has had to stand interest rates well below that in some countries even below zero however despite this sacrifice the economic recovery from the great recession has been disappointingly weak this book s aim is to answer this question the central thesis of the book is that the standard understanding of the monetary transmission mechanism is flawed that understanding adopts erroneous assumptions such as that low interest rates always stimulate economic growth by boosting the credit supply investment and consumption and does not fully take into account several unintended channels of monetary policy such as risk taking high level of debt or zombification of the economy in other words the effectiveness of monetary policy is limited during economic downturns accompanied by the debt overhang and the balance sheet recession and generates negative effects which can make the policy counterproductive the author provides a thorough analysis of the issues related to the interest rates in the conduct of monetary policy such as the risk taking channel of monetary policy the portfolio balance channel and the wealth effect zombie firms in the economy the misallocation of resources as well as the neutral interest rate targeting and the difference between the neutral and natural interest rate and the negative interest rate policy the book is written in an accessible and engaging manner and will be a valuable resource for scholars of monetary economics as well as readers interested in unconventional monetary policy

The Empathy Gap 2021

from the ebook preface this book majors on the presentation of empirical evidence in the form of data the most digestible form for communicating such

material is through the use of tables and figures generally graphs consequently the book has a great many tables and figures and the latter are often in colour viewing on a device capable of rendering colours is therefore recommended although monochrome will be adequate in most cases the empathy gap proposes the thesis that men and boys are extensively disadvantaged across many areas of life including in education healthcare genital integrity criminal justice domestic abuse working hours taxation pensions paternity homelessness suicide sexual offences and access to their own children after parental separation the claim is justified in the book by empirical evidence mostly but not exclusively from the uk involving nearly 1 000 references 179 figures and 49 tables to most people of both sexes this will appear to be a perverse perspective as disadvantage has become the province of women girls and minorities not males yet the empirical case supporting the disadvantages suffered by men and boys is undeniable to the objective mind but if this is so why is the popular perception that males are privileged whereas disadvantage is the province of the opposite sex why do the male disadvantages go largely unremarked by both sexes if they are so pervasive presenting the case for widespread and substantial male disadvantage is also a challenge to the usual hegemonic paradigm of feminist theory these issues are addressed within the empathy gap by presenting an entirely different orientation on the social psychology of relations between the sexes out goes the idea of an oppressive patriarchy instead a man's participation in the human pair bond is seen to be altruistic a phenomenon arising originally from evolution and enacted in the individual via the emotional psyche this is the origin of an asymmetry in the perception of the sexes which normalises the preferencing of females and therefore inevitably disadvantages males as a corollary the successful evolved strategy involves male utility and relative male disposability the latter being facilitated by a muted empathy for males by both sexes the empathy gap rather than working to overcome this male disposability as a true egalitarian movement would have done feminism has fed upon it and amplified it the feminist project relies upon the true state of affairs remaining unacknowledged and the empathy gap is instrumental in its own invisibility in respect of this theory the author makes no claim for originality the ideas presented have been circulating within the sub culture for decades however the focus of the book is to show how these ideas are manifest in practice

this book presents recent research on probabilistic methods in economics from machine learning to statistical analysis economics is a very important and at the same a very difficult discipline it is not easy to predict how an economy will evolve or to identify the measures needed to make an economy

prosper one of the main reasons for this is the high level of uncertainty different difficult to predict events can influence the future economic behavior to make good predictions and reasonable recommendations this uncertainty has to be taken into account in the past most related research results were based on using traditional techniques from probability and statistics such as p value based hypothesis testing these techniques led to numerous successful applications but in the last decades several examples have emerged showing that these techniques often lead to unreliable and inaccurate predictions it is therefore necessary to come up with new techniques for processing the corresponding uncertainty that go beyond the traditional probabilistic techniques this book focuses on such techniques their economic applications and the remaining challenges presenting both related theoretical developments and their practical applications

this paper reviews the relationship between real gdp growth and domestic bank lending to the private sector in croatia after the 2008 global financial crisis gfc drawing on a cross country analysis of european countries croatia s recession was substantially longer compared to peers due to both domestic and external factors bank credit to the private sector was found to be important for economic growth but less than often perceived especially during a boom bust cycle using empirical analysis this paper confirms that the deleveraging of the private sector particularly nonfinancial companies was slow and contributed to croatia s prolonged recession when provisions of nonperforming loans npls improved and the uncertainty following the gfc receded credit supply increased while demand for credit hesitantly picked up with the strengthening of the recovery the paper thus reinforces that npls and how they are handled as well as real growth are important determinants for credit these findings are supported by the cross country analysis and corroborated by other studies

a number of dramatic changes are currently reshaping infrastructure a sector that investors and asset managers have traditionally considered to be a safe harbor in the field of alternative investments understanding the future of infrastructure is indispensable to guaranteeing a sustainable future for our

planet and the welfare of the world's population and enhancing our knowledge of this asset class is one important step we can take toward reaching this crucial goal. This book collects a series of contributions by a group of Bocconi University researchers under the Antinip Associate Professorship in Infrastructure Finance, which cover the key megatrends that are expected to reshape the way we think about infrastructure and the implications for infrastructure investors and asset managers. Its goal is to improve and disseminate the culture of infrastructure among academics, professionals, and policymakers. The main focus is on Europe and the European Union and specifically on three key sectors: power and energy, transportation infrastructure, and telecoms/ICT.

Handbook of Research on Managing Information Systems in Developing Economies 2020-05-27

The core animating feature of administrative justice scholarship is the desire to understand how justice is achieved through the delivery of public services and the actions, inactions, and decision making of administrative bodies. The study of administrative justice also encompasses the redress systems by which people can challenge administrative bodies to seek the correction of injustices. For a long time now, scholars have been interested in administrative justice but without necessarily framing their work as such, rather than existing under the rubric of administrative justice. Much of the research undertaken has existed within sub-categories of disciplines such as law, sociology, public policy, politics, and public administration. Consequently, although aspects of the topic have attracted rich contributions across such disciplines, administrative justice has rarely been studied or taught in a manner that integrates these areas of research more systematically. This handbook signals a major change of approach, drawing together a group of world-leading scholars of administrative justice from a range of disciplines. The Oxford Handbook of Administrative Justice shows how administrative justice is a vibrant, complex, and contested field that is best understood as an area of inquiry in its own right rather than through traditional disciplinary silos.

Disruption in the Infrastructure Sector 2022

The book explores the right to free, prior, and informed consent (FPIC), a highly controversial right, which is mainly discussed in the context of large-scale business projects on indigenous territories but also with respect to the creation of protected areas and communities. Traditional resource rights from a legal-anthropological perspective attempt to disentangle the various coexisting understandings of FPIC and provide an explanation for the multiplicity of FPIC norms, or to put it in other words, its fragmentation. It examines the right or stakeholders of FPIC, the scope of the consent requirement, the respect for self-determined decision making, and the right to FPIC of women in different socio-legal fields. Moreover, it explores the impact of power relations, strategic alliances, and discourses within these fields and shows that the emerging FPIC norms are the result of norm negotiation processes. The fields that are examined include transnational law, more specifically human rights, environmental, and development law. The Liberian post-conflict forest and land legislation and Liberian community forests as fields in which FPIC is operationalized. Liberia is quite unique in this respect; it is not only one of the few countries in Africa recognizing FPIC but has also begun implementing it. The book shows that based on the logic of a socio-legal field, legal identities are discursively created and determine the meaning of FPIC. Moreover, different actors can resort to different legalities, shaping the emerging FPIC norm.

The USA and China, the world's largest economic powers, have been engaging in trade war since January 2018. The impact of this trade war is felt not only by the USA and China but also by other economies who have economic ties with them. This book provides insights into damages caused by this trade war. The first section of the book looks at the impact of the trade war on the global economy; it goes deeper to examine the trade war impact on the South Asian region.

it is well known that any imposition of new tariffs or an increase in existing tariffs would make imports more costly and render the exported goods less competitive yet the book posits that the trade war has provided a window of opportunity to other countries not caught in it the south asian region with countries like bangladesh india and sri lanka has actually reaped benefits from the widening trade dispute between the world s two biggest economies this book will be a useful reference to help policymakers to undertake informed decisions and initiate programs to minimise the trade war impact
