1□□□□□□□□□□□□□□□ □□1□□lua□□□□□□□□□ this thoroughly updated fourth edition of critical theory today offers an accessible introduction to contemporary critical theory providing in depth coverage of the most common approaches to literary analysis today including feminism psychoanalysis marxism reader response theory new criticism structuralism and semiotics deconstruction new historicism and cultural criticism lesbian gay and queer theory african american criticism and postcolonial criticism and ecocriticism this new edition features a brand new chapter on ecocriticism including sections on deep ecology eco marxism ecofeminism including radical marxist and vegetarian ecofeminisms and postcolonial ecocriticism and environmental justice considerable updates to the chapters on feminist theory african american theory postcolonial theory and lgbtq theories including terminology and theoretical concepts an extended explanation of each theory using examples from everyday life popular culture and a variety of literary texts a list of specific questions critics ask about literary texts an interpretation of f scott fitzgerald s the great gatsby through the lens of each theory a list of questions for further practice to guide readers in applying each theory to different literary works updated and expanded bibliographies both engaging and rigorous this is a how to book for undergraduate and graduate students new to critical theory and for college professors who want to broaden their repertoire of critical approaches to literature the long awaited update to the practitioner s guide to gnu autoconf automake and libtool the gnu autotools make it easy for developers to create software that is portable across many unix like operating systems and even windows although the autotools are used by thousands of open source software packages they have a notoriously steep learning curve autotools is the first book to offer programmers a tutorial based guide to the gnu build system author john calcote begins with an overview of high level concepts and a hands on tour of the philosophy and design of the autotools he then tackles more advanced details like using the m4 macro processor with autoconf extending the framework provided by automake and building java and c sources he concludes with solutions to frequent problems encountered by autotools users this thoroughly revised second edition has been updated to cover the latest versions of the autotools it includes five new chapters on topics like pkg config unit and integration testing with autotest internationalizing with gnu tools the portability of gnulib and using the autotools with windows as with the first edition you ll focus on two projects jupiter a simple hello world program and flaim an existing complex open source effort containing four separate but interdependent projects follow along as the author takes jupiter s build system from a basic makefile to a full fledged autotools project and then as he converts the flaim projects from complex hand coded makefiles to the powerful and flexible gnu build system learn how to master the autotools build system to maximize your software s portability generate autoconf configuration scripts to simplify the compilation process produce portable makefiles with automake build cross platform software libraries with libtool write your own autoconf macros this detailed introduction to the gnu autotools is indispensable for developers and programmers looking to gain a deeper understanding of this complex suite of tools stop fighting against the system and make sense of it all with the second edition of autotools the gnu autotools make it easy for developers to create software that is portable across many unix like operating systems although the autotools are used by thousands of open source software packages they have a notoriously steep learning curve and good luck to the beginner who wants to find anything beyond a basic reference work online autotools is the first book to offer programmers a tutorial based guide to the gnu build system author john calcote begins with an overview of high level concepts and a quick hands on tour of the philosophy and design of the autotools he then tackles more advanced details like using the m4 macro processor with autoconf extending the framework provided by automake and building java and c sources he concludes the book with detailed solutions to the most frequent problems encountered by first time autotools users you ll learn how to master the autotools build system to maximize your software s portability generate autoconf configuration scripts to simplify the compilation process produce portable makefiles with automake build cross platform software libraries with libtool write your own autoconf macros autotools focuses on two projects jupiter a simple hello world program and flaim an existing complex open source effort containing four separate but interdependent subprojects follow along as the author takes
