discloses the richness of ideas and sheds light on the controversy that characterized the transition from fascism to democracy examining authors works and memories that were subsequently silenced by cold war politics how a shared memory of fascism and its cultural heritage took shape is still today the most disputed question of modern italy crossing the boundaries between academic and public discourse against redemption concentrates on the historical period in which disagreement was at its highest the transition between the downfall of mussolini in july 1943 and the victory of the christian democrats over the left in the 1948 general elections by dispelling the silence around the range of opinion in the years before the ideological struggle fossilized into cold war oppositions this book points to early postwar literary practices as the main vehicle for intellectual dissent shedding new light on the role of cultural policies in institutionalizing collective memory during italy s transition to democracy competing narratives over the recent traumatic past emerged and crystallized depicting the country s break with mussolini s regime as a political and personal redemption from its politics of exclusion and unrestrained use of violence conversely outstanding authors such as elsa morante carlo levi alberto moravia and curzio malaparte in close dialogue with remarkable but now neglected figures stressed the cultural continuity between the new democracy and fascism igniting heated debates from opposite political standpoints their works addressed questions such as the working through of national defeat italian responsibility in world war ii and the holocaust revealing how the social racial and gender biases that characterized fascism survived after its demise and haunted the newborn democracy

this book pursues the specific case of italian travel narratives in the far east through a focus on the experience of japan in works by writers who visited the land of the rising sun beginning in the meiji period 1868 1912 and during the concomitant opening of japan's relations with the west drawing from the fields of postcolonial and transnational studies analysis of these texts explores one central question what does it mean to imagine japanese culture as contributing to italian culture each author shares in common an attempt to disrupt ideas about dichotomies and unbalanced power relationships between east and west proposing the notion of relational orientalism this book suggests that italian travelogues to japan in many cases pursued the goal of building imaginary transnational communities predicated on commonalities and integration by claiming what they perceived as oriental as their own in contrast with a long history of western representations of japan as inferior and irrational searching for japan identifies a positive overarching attitude toward the far east country in modern italian culture expanding the horizon of italian transnational networks normally situated within the southern european region this book reinstates the existence of an alternative euro asian axis operating across italian history

race as narrative in italian women's writing since unification explores racist ideas and critiques of racism in four long narratives by female authors grazia deledda matilde serao natalia ginzburg and gabriella ghermandi who wrote in italy after national unification starting from the premise that race is a political and socio historical construction melissa coburn makes the argument that race is also a narrative construction this is true in that many narratives have contributed to the historical construction of the idea of race it is also true in that the concept of race metaphorically reflects certain formal qualities of narration coburn demonstrates that at least four sets of qualities are common among narratives and central to the development of race discourse intertextuality the processes of characterization plot and tropes the tension between the projections of individual group and universal identities and the processes of identification and otherness these four sets of qualities become organizing principles of the four sequential chapters paralleling a sequential focus on the four different narrative authors the juxtaposition of these close contextualized readings demonstrates salient continuities and discontinuities within race discourse over the period examined revealing subtleties in the historical record overlooked by previous studies

the nature of fascism has been hotly contested by scholars since the term was first coined by mussolini in 1919 however for the first time since italian fascism appeared there is now a significant degree of consensus amongst scholars about how to approach the generic term namely as a revolutionary form of ultra nationalism seen from this perspective all forms of fascism have three common features anticonservatism a myth of ethnic or national renewal and a conception of a nation in crisis this collection includes articles that show this new consensus which is inevitably contested as well as making available material which relates to aspects of fascism independently of any sort of consensus and also covering fascism of the inter and post war periods this is a comprehensive selection of texts reflecting both the extreme multi faceted nature of fascism as a phenomenon and the extraordinary divergence of interpretations of fascism

in this book julius evola analyzes the fascist movement of italy which he himself had experienced first hand often as a vocal critic throughout its entire history from 1922 until 1945 discussing and dismissing the misuse of the term fascism that has gained widespread acceptance evola asks readers not to allow the fact of italy s defeat in the second world war to distract us from making an objective analysis of the ideology of fascism itself since the defeat was the result of contingent circumstances and the personalities of those who led it rather than flaws that were inherent in fascism as an idea evola praises those aspects of fascism which he believes to have been in accordance with the best traditions of european governance in particular the classical roman tradition while he remains critical of those aspects which ran contrary to this ideal such as its socialist proletarian and totalitarian tendencies as well as what he saw as its petty moralism evola also distinguishes between the fascism of the twenty years between 1922 and mussolini s overthrow in 1943 and the second fascism of the italian social republic which he considered as much more problematic he likewise criticizes the fascist racial doctrine for being based on false principles frequently quoting mussolini s own words evola presents the core of the fascist ideal arguing that for all its flaws it remains superior to the political system which has since arisen to replace it julius evola 1898 1974 was italy s foremost traditionalist philosopher and theorist

what drives terrorists to glorify violence in the revolutionary mystique and terrorism in contemporary italy richard drake seeks to explain the origins of italian terrorism and the role that intellectuals played in valorizing the use of violence for political or social ends drake argues that a combination of socioeconomic factors and the influence of intellectual elites led to a sanctioning of violence by revolutionary political groups in italy between 1969 and 1988 drake explores what motivated italian terrorists on both the left and the right during some of the most violent decades in modern italian history and how these terrorists perceived the modern world as something to be destroyed rather than reformed in 1989 the revolutionary mystique and terrorism in contemporary italy received the howard r marraro prize from the society for italian historical studies it was awarded for the best book that year on italian history the book is reissued now with a new introduction for the light it might shed on current terrorist challenges the italians had success in combating terrorism we might learn something from their example the section of the book dealing with the italian superfascist philosopher julius evola holds special interest today drake's original work takes on new significance in the light of evola's recent surge of popularity for members of america's alt right movement

critical race theory crt is virtually unheard of in european scholarship especially among legal scholars law lawyers and race critical race theory from the united states to europe endeavours to fill this gap by providing an overview of the definition and consequences of crt developed in american scholarship and describing its transplantation and application in the continental european context the crt approach adopted in this book illustrates the reasons why the relationship between race and law in european civil law jurisdictions is far from anodyne law plays a critical role in the construction subordination and discrimination against racial minorities in europe making it comparable albeit in slightly different ways to the american experience of racial discrimination anti semitism islamophobia anti roma and anti black racism constitute a fundamental factor often tacitly accepted in the relationship between law and race in europe consequently the broadly shared anti race and anti racist position is problematic because it acts to the detriment of victims of racism while privileging the white christian male majority this book is an original exploration of the relationship between law and race as such it crosses the disciplinary divide furthering both legal scholarship and research in race and ethnicity studies
