collection for analysing the discourse of social media in providing a thorough review of the field to date the opening chapter considers some of the common and divergent interests and priorities that of multicultural discourses during his campaign against racism in south africa and his involvement in the congress led nationalist struggle against british colonial rule in india mahatma gandhi developed a new form of political struggle based on the idea of satyagraha or non violent protest he ushered in a new era of nationalism in india by articulating the nationalist

protest in the language of non violence or ahimsa that galvanized the masses into action focusing on the principles of satyagraha and non violence and their evolution in the context of anti imperial movements organized by gandhi this fascinating book looks at how these precepts underwent changes reflecting the ideological beliefs of the participants assessing gandhi and his ideology the text centres on the ways in which gandhi took into account the views of other leading personalities of the era whilst articulating his theory of action concentrating on gandhi s writings in harijan the weekly newspaper he founded this volume provides a unique contextualized study of an iconic man s social and political ideas this book covers a broad range of issues in the studies of text and discourse it combines a theoretical framework with empirical engagement and brings together various approaches to these two phenomena from the structural functional and cognitive perspectives while this topic has been widely discussed in recent years such studies have mostly focused on specific language and discourse types this work however presents the analysis of texts from american british azerbaijani french and russian discourses across various types and genres and adopts an exclusive focus on pragmatic and cognitive aspects the study of these two aspects can help reveal not only global and local cultural identities but also the specific features of their discourse types and genres as such the book also pays extensive attention to the role the studies of text and discourse can play in exploring globalization and intercultural communication rabindranath tagore and mohandas karamchand gandhi constitute the key pillars of indian nationalist thought in this book bidyut chakrabarty demonstrates how tagore and gandhi drew on each other as they articulated their unique mode of thinking which led to an innovative discourse tagore and gandhi agreed on many ideas but also had serious differences on quite a few for instance on whether to support the british during the boer war confluence of thought brings out the compatibility as well as the differences in their thoughts by asserting that both of them despite their differences in approach are essentially informed and shaped by western and indigenous discourses as well as by colonial rule the chapters in the volume dwell on their views on nationalism civilisation religion rural construction and religion these ideas and arguments moulded the freedom struggle and shaped the future of a free india this book uses a postcolonial lens to question development s dominant cultural representations and institutional practices investigating the possibilities for a transformatory postcolonial politics ilan Kapoor examines recent development policy initiatives in such areas as governance human rights and participation to better understand and contest the production of knowledge in development its cultural assumptions power implications and hegemonic politics the volume shows how development practitioners and westernized elites intellectuals are often complicit in this neo colonial knowledge production noble gestures such as giving foreign aid or promoting participation and democracy frequently mask their institutional biases and economic and geopolitical interests while silencing the subaltern marginalized groups on whose behalf they purportedly work in response the book argues for a radical ethical and political self reflexivity that is vigilant to our reproduction of neo colonialisms and amenable to public contestation of development priorities it also underlines subaltern political strategies that can and do lead to greater democratic dialogue political discourse argues that a post positivistic critical theory of politics is needed to understand the ideological distortions which are hidden in discourse about human needs and potentialities the contributors analyse the modes of critical discourse in the works of major western and indian philosophers this book examines how the contemporary indian situation poses a strict theoretical challenge to habermas s theorization of the public sphere and employs the method of samvāda to critically analyse and dissect its universalist claims it invites the reader to consider the possibility of imagining a normative indian public sphere that is embedded in the indian context in a native and not nativist sense to get past the derivative language of philosophical and political discourses prevalent within indian academia the book proposes that the dynamic cooperative space between indian political theory and contemporary indian philosophy is effectively suited to theorize the native idea of the indian public sphere it underlines the normative need for a natively theorized indian public sphere to further the multilayered democratization of public spheres within diverse communities that constitute indian society the book will be a key read for contemporary studies in philosophy political theory sociology postcolonial theory history and media and communication studies a present day continuation of the
