Proceedings of the International Conference on Applications of Machine Intelligence and Data Analytics (ICAMIDA 2022) *2023-05-01*

this is an open access book as on date huge volumes of data are being generated through sensors satellites and simulators modern research on data analytics and its applications reveal that several algorithms are being designed and developed to process these datasets either through the use of sequential and parallel processes in the current scenario of industry 4 0 data analytics artificial intelligence and machine learning are being used to support decisions in space and time further the availability of graphical processing units gpus and tensor processing units tpus have enabled to processing of these datasets some of the applications of artificial intelligence machine learning and data analytics are in the domains of agriculture climate change disaster prediction automation in manufacturing intelligent transportation systems health care retail stock market fashion design etc the international conference on applications of machine intelligence and data analytics aims to bring together faculty members researchers scientists and industry people on a common platform to exchange ideas algorithms knowledge based on processing hardware and their respective application programming interfaces apis
