work is constantly reshaped by technological progress new ways of
production are adopted markets expand and societies evolve but some
changes provoke more attention than others in part due to the vast
uncertainty involved in making predictions about the future the 2019
world development report will study how the nature of work is
changing as a result of advances in technology today technological
progress disrupts existing systems a new social contract is needed to
smooth the transition and guard against rising inequality significant
investments in human capital throughout a person s lifecycle are vital
to this effort if workers are to stay competitive against machines they
need to train or retool existing skills a social protection system that
includes a minimum basic level of protection for workers and citizens

can complement new forms of employment improved private sector policies to encourage startup activity and competition can help countries compete in the digital age governments also need to ensure that firms pay their fair share of taxes in part to fund this new social contract the 2019 world development report presents an analysis of these issues based upon the available evidence
