Handbook for Evaluating Infrastructure Regulatory Systems

2006-01-01

more than 200 new infrastructure regulators have been created around the world in the last 15 years they were established to encourage clear and sustainable long term economic and legal commitments by governments and investors to encourage new investment to benefit existing and new customers there is now considerable evidence that both investors and consumers the two groups that were supposed to have benefited from these new regulatory systems have often been disappointed with their performance the fundamental premise of this book is that regulatory systems can be successfully reformed only if there are independent objective and public evaluations of their performance just as one goes to a medical doctor for a regular health checkup it is clear that infrastructure regulation would also benefit from periodic checkups this book provides a general framework as well as detailed practical guidance on how to perform such regulatory checkups

Regulation of Infrastructure and Utilities

2017-10-24

this book provides a comprehensive discussion of the public policy and management issues that are encountered in the regulation of infrastructure and utilities drawing from theoretical arguments and several case studies the book is divided into three parts namely devising regulation installing regulation and making regulation work the first part covers theories of regulation regulatory policies strategies and tools and regulatory reforms the second part deals with the politics of regulation and regulatory capacity the third part discusses regulatory commitment and investments the performance of regulated industries and the design of regulatory systems case studies pay attention to various sectors including water electricity telecommunications highways railways district heating and airports from countries in every region of the world

Governing Infrastructure Regulators in Fragile Environments

2019-07-30

countries exiting conflict and fragility face many urgent priorities and almost invariably suffer from substantial infrastructure deficits there is typically very little infrastructure investment during periods of fragility and conflict and existing installations are often damaged or destroyed the purpose of this manual is to contribute to improvements in the quality of infrastructure regulation it does so by identifying key principles for the governance of infrastructure regulators and by suggesting how these principles can be introduced successfully and maintained over time the introduction of cross cutting governance principles for regulators is based on the assumption that a uniform set of governance principles can be less costly and complex for governments to implement and enforce and will provide potential investors with a more consistent and predictable regulatory environment to navigate the manual also discusses the process of implementing regulatory governance reforms in fragile contexts improvements in governance frameworks for infrastructure regulators will support better and accountable regulatory decision making as well as increased investment and overall economic development case studies from relevant country experience complement and provide context to the discussion on principles

Regulatory Structure and Risk and Infrastructure Firms

1996

a very high portion of the seafood we eat comes from abroad mainly from china and southeast asia and most of the active ingredients in medicines we take originate in other countries many low and middle income countries have lower labor costs and fewer and less stringent environmental regulations than the united states making them attractive places to produce food and chemical ingredients for export safe foods and medical products through stronger regulatory systems abroad explains that the diversity and scale of imports makes it impractical for u s food and drug administration fda border inspections to be sufficient to ensure product purity and safety and incidents such as american deaths due to adulterated heparin imported from china propelled the problem into public awareness the institute of medicine committee on

strengthening core elements of regulatory systems in developing countries took up the vital task of helping the fda to cope with the reality that so much of the food drugs biologics and medical products consumed in the united states originate in countries with less robust regulatory systems ensuring safe foods and medical products through stronger regulatory systems abroad describes the ways the united states can help strengthen regulatory systems in low and middle income countries and promote cross border partnerships including government industry and academia to foster regulatory science and build a core of regulatory professionals this report also emphasizes an array of practical approaches to ensure sound regulatory practices in today s interconnected world

Political Accountability And Regulatory Performance In Infrastructure Industries

2009

this manual is intended to provide clear operational guidance on the benchmarking of regulatory systems for medical products and the development of institutional development plans idps to address areas for improvement the manual is integral to the world health organization s structured and evidence based approach to regulatory systems strengthening rss mandated by world health assembly resolution wha 67 20 the manual serves to ensure a proper understanding of the global benchmarking tool gbt the processes and principles that govern its use the expectations of individuals and institutions involved and the information management systems that underpin the collection analysis and management of data and the generation of knowledge

Ensuring Safe Foods and Medical Products Through Stronger Regulatory Systems Abroad

2012-09-03

this paper assesses and measures regulatory governance in 21 infrastructure regulators in brazil regulatory governance is decomposed into four main attributes autonomy decision rules means and tools and accountability a ranking is proposed and the main areas for improvement identified a comparison of the proposed regulatory governance index and other indexes internationally available is performed section 2 sets up the analytical framework for the report identifying key components of regulatory governance namely autonomy political and financial procedures for decision making tools and means including personnel and accountability section 3 assesses each of these components in practice reporting the results of a survey with 21 regulatory agencies in brazil which was designed and implemented in 2005 section 4 measures regulatory governance based on three related indexes ranks the brazilian regulators among themselves and compares the proposed indexes with other two indicators available in the literature section 5 presents the conclusions

WHO Global Benchmarking Tool (GBT) for evaluation of national regulatory system of medical products

2024-02-29

this 2 volume set ccis 0269 ccis 0270 constitutes the refereed proceedings of the international conference on global trends in computing and communication ccis 0269 and the international conference on global trends in information systems and software applications ccis 0270 obcom 2011 held in vellore india in december 2011 the 173 full papers presented together with a keynote paper and invited papers were carefully reviewed and selected from 842 submissions the conference addresses issues associated with computing communication and information its aim is to increase exponentially the participants awareness of the current and future direction in the domains and to create a platform between researchers leading industry developers and end users to interrelate

Regulatory Governance in Infrastructure Industries

2006-01-01

the 1990s and 2000s have witnessed a spurt of energetic institution building in the developing world as regulatory agencies emerge to take over the role of the executive in key sectors this rise of the regulatory state of the south is barely noticed both by scholars of regulation and of development let alone adequately documented and theorized yet the consequences for the role of the state and modalities of governance in the south are substantial as politically charged decisions are handed over to formally technocratic agencies creating new arenas and forms of contestation over the gains and losses from development decisions moreover this shift in the developing world comes at a time when the regulatory state in the north is under considerable stress from the global financial crisis understanding the regulatory state of the south and particularly forms of accommodation to political pressures could stimulate a broader conversation around the role of the regulatory state in both north and south this volume seeks to provoke such a discussion by empirically exploring the emergence of regulatory agencies of a range of developing countries across asia africa and latin america the cases focus on telecommunications electricity and water sectors that have often been at the frontlines of this transition the central question for the volume is are there distinctive features of the regulatory state of the south shaped by the political economic context of the global south in the last two decades to assist in exploring this question the volume includes brief commentaries on the case studies from a range of disciplines development economics law and regulation development sociology and comparative politics collectively the volume seeks to shape the contours of a productive inter disciplinary conversation on the emergence of a significant empirical phenomenon the rise of regulatory agencies in the developing world with implications both for the study of regulation and the study of development

Global Trends in Information Systems and Software Applications

2012-08-01

this paper contributes to the literature that explores the link between regulatory governance and sector performance the paper develops an index of regulatory governance and estimates its impact on sector performance showing that indeed regulation and its governance matter the authors use two unique databases i the world bank performance database which contains detailed annual data for 250 private and public electricity companies in latin america and the caribbean and ii the electricity regulatory governance database which contains data on several aspects of the governance of electricity agencies

in the region the authors run different models to explain the impacts of change in ownership and different characteristics of the regulatory agency on the performance of the utilities the results suggest that the mere existence of a regulatory agency regardless of the utilities ownership has a significant impact on performance furthermore after controlling for the existence of a regulatory agency the ownership dummies are still significant and with the expected signs the authors propose an experience measure in order to identify the gradual impact of the regulatory agency on utility performance the results confirm this hypothesis in addition the paper explores two different measures of governance an aggregate measure of regulatory governance and an index based on principal components including autonomy transparency and accountability the findings show that the governance of regulatory agencies matters and has significant effects on performance

The Rise of the Regulatory State of the South

2013-06-27

text regulatory performance in india achievements constraints and future action contains the proceedings of six plenary sessions of an eponymous conference organized by teri it covers background papers presentations and the discussions held after each session

Regulatory Governance and Sector Performance

2012

this report aims to support the development of a sound economic regulatory system for the water supply and sanitation wss sector in the republic of moldova hereafter moldova the prevailing policy framework calls for drastic developments in wss to modernise and optimise wss systems and improve operational efficiency non revenue water staff output ratios etc in line with domestic and international commitments including the association agreement with the european union the sustainable development goals the paris agreement and the national wss strategy

Regulatory Performance in India

2008-01-01

abstract this paper focuses on an evaluation and benchmarking of the governance of regulatory agencies in the electricity sector in latin american countries lac using a unique database we develop an index of regulatory governance and rank all the agencies in the lac countries the index is an aggregate number of the evaluation of four key governance characteristics autonomy transparency accountability and regulatory tools including not only formal aspects of regulation but also indicators related to actual implementation based on 18 different indexes we analyze the positions of agencies with regard to different aspects of their regulatory governance considering not only performance in each variable but also scores in the different components of each category this evaluation allows for the identification of particular country shortcomings regarding governance and indicates needed improvements although the region shows an overall good governance design of their regulatory agencies the implementation of the independent regulator model still faces several challenges this is particularly evident in political autonomy and in the informal aspects of governance where the region shows the largest number of countries with the lowest scores trinidad and tobago and brazil show the best results and ecuador honduras and chile the poorest performances the rest of the countries vary according to the different indexes we give each governance variable equal weights and positively test the robustness of our approach using principal component analysis

OECD Studies on Water Enhancing the Economic Regulatory System for Moldova's Water Supply and Sanitation

2019-07-30

this series of publications presents studies on regulatory reform in the asia pacific area resulting from the asia pacific economic co operation apec oecd co operative initiative on regulatory reform most of the documents are conference proceedings with each proceeding including a summary of the discussions and the papers presented some of the papers

presented are country specific and others are issue specific

Assessing the Governance of Electricity Regulatory Agencies in the Latin American and Caribbean Region: a Benchmarking Analysis

2007

regulatory economics and quantitative methods comprises original contributions by leading researchers working on issues relating to regulation in latin america they focus on regulation in infrastructure industries and attempt to show how quantitative analysis can contribute to more effective regulation in particular they discuss central issues relating to the measures used for benchmarking natural monopolies incentives and contractual arrangements used in the regulatory environment and the impact of regulation and regulatory processes

Modernizing the U.S. Financial Regulatory System

2009

whether striving to protect citizens from financial risks climate change inadequate health care or the uncertainties of the emerging sharing economy regulators must routinely make difficult judgment calls in an effort to meet the conflicting demands that society places on them operating within a political climate of competing demands regulators need a lodestar to help them define and evaluate success achieving regulatory excellence provides that direction by offering new insights from law public administration political science sociology and policy sciences on what regulators need to do to improve their performance achieving regulatory excellence offers guidance from leading international experts about how regulators can set appropriate priorities and make sound evidence based decisions through processes that are transparent and participatory with increasing demands for smarter but leaner government the need for sound regulatory capacity for regulatory excellence has never been stronger

APEC-OECD Co-operative Initiative on Regulatory Reform Structural Reform and Capacity Building Proceedings of the Eighth APEC-OECD Workshop on Regulatory Reform, Gyeongju, Korea, September 2005

2008-07-31

a truly comparative introduction to the field of public sector management this is the perfect textbook for upper undergraduate and postgraduate students to explore the evolving landscape of public administration

Regulatory Economics and Quantitative Methods

2007-03-27

this publication explores the use of regulatory technology regtech in finance it discusses how to design an optimal architecture alongside policy considerations for an integrated regtech and supervisory technology ecosystem it highlights the interaction of industry use of technology in compliance and risk management regulator and supervisor use of technology for supervision monitoring and enforcement and use of technology to embed regulatory requirements and systems into financial infrastructure the publication introduces key policy frameworks that enable ecosystem relationships at national regional and international levels and showcases vital agile data management and standardization frameworks

Achieving Regulatory Excellence

2016-12-20

many developing countries have the capacity to develop broad development policy directions and formulate development programs that are logical and consistent but these do not obtain the desired or targeted results because of challenges in the

delivery system it is increasingly apparent that development efforts must be carefully crafted and targeted in the right way to achieve the most effective results in an efficient manner recent literature in development studies evidence the important role of delivery in actualizing positive and efficient development impact improving delivery and development impact requires a multidisciplinary approach development practitioners devoted to rule of law and justice must conjoin their efforts concepts tools and knowledge with experts from various disciplines so as to shape a delivery system that adds economic and social value to ultimate beneficiaries of development in the foregoing light the book brings together the diverse perspectives of development experts international lawyers academics researchers legal practitioners public and civil servants and other professionals in order to explore the values of voice social contract and accountability and thereby address the following issue how can law and justice tools concepts and knowledge when anchored in values such as voice social contract and accountability shape a delivery system that adds economic and social value to ultimate beneficiaries of development the book revolves around a discussion of the three values of voice social contract and accountability as they relate to the role and function of law rule of law justice judicial systems and other related areas in delivering development impact additionally the book departs from the legal and includes other multidisciplinary approaches in its discussion of the three values and their impact on delivery in development the range of issues covered by the book include those relating to human rights government policy urban development resource management gender social rights economic reforms financial empowerment opportunity creation governance urban law sustainable development and anti corruption

Public Sector Management

2024-04-27

ensuring the safety of food and the quality and safety of medicines in a country is an important role of government made more complicated by global manufacturing and international trade by recent estimates unsafe food kills over 400 000 people a year a third of them children under 5 mostly in low and middle income countries every year poor quality medicines cause about 70 000 excess deaths from childhood pneumonia and roughly 8 500 to 20 000 malaria deaths in sub saharan africa alone the federal drug administration fda office of global policy and strategy is charged with improving capacity of the agency s foreign counterpart offices and increasing understanding of the importance of regulatory systems for public health

development and trade at the request of the fda this study sets out a strategy to support good quality wholesome food and safe effective medical products around the world its goal is to build on the momentum for strengthening regulatory systems and to set a course for sustainability and continued progress the 2012 report ensuring safe food and medical products through stronger regulatory systems abroad outlined strategies to secure international supply chains emphasized capacity building and support for surveillance in low and middle income countries and explored ways to facilitate work sharing among food and medical product regulatory agencies this new study assess progress made and the current regulatory landscape

Building Regulatory and Supervisory Technology Ecosystems

2022-08-01

this book is the product of a unique collaboration by experts from leading international regional and national agencies and professional organizations discussing on the current hot issue on the judicious use and safety of radiation in radiology there have been several cases involving radiation overexposure that have received international attention strategies and solutions to guide readers how to maximize the benefits and minimize the risks when using radiation in medicine are covered

Modernizing the American Financial Regulatory System: Recommendations for Improving Oversight, Protecting Consumers, and Ensuring Stability, February 2009, *

2009

the field of endeavors known as regulatory science has grown out of the need to link and integrate knowledge within and among basic science research clinical research clinical medicine and other specific scientific disciplines whose focus aggregation and ultimate implementation could inform biomedical product development and regulatory decision making substantial efforts have been devoted to defining regulatory science and communicating its value and role across the

scientific and regulatory ecosystems investments are also being made in technology infrastructure regulatory systems and workforce development to support and advance this burgeoning discipline in october 2015 the national academies of sciences engineering and medicine held a public workshop to facilitate dialogue among stakeholders about the current state and scope of regulatory science opportunities to address barriers to the discipline s success and avenues for fostering collaboration across sectors participants explored key needs for strengthening the discipline of regulatory science including considering what are the core components of regulatory science infrastructure to foster innovation in medical product development this report summarizes the presentations and discussions from the workshop

The World Bank Legal Review Volume 6 Improving Delivery in Development

2015-03-09

this monograph provides a coherent and systematic explanation of china s regional economic development from the perspective of regional government competition it gives an almost unknown exposition of the mechanisms of china s regional economic development with numerous supporting cases drawn from both china and elsewhere this book is an invaluable resource for anyone interested to learn more particularly the development and transformation of china s regional economy from both the chinese and global perspectives

Stronger Food and Drug Regulatory Systems Abroad

2020-04-09

this report describes how regulators around the world adapted to the confusion brought by the covid 19 crisis to ensure the supply of food while maintaining food safety and security it brings together examples of regulatory responses at regional national and international levels

Radiological Safety and Quality

2013-11-22

this book investigates how a shift to a completely urban global world woven together by ubiquitous and mobile icts changes the ontological meaning of space and how the use of these technologies challenges the social and political construction of territories and the cultural appropriation of places provided by publisher

Technical Assistance to Malaysia for Strengthening the Regulatory System for Private Sector Infrastructure

1995

this study is a contribution to albania s trade development efforts it provides action oriented recommendations which draw on extensive primary information collected during face to face interviews using unece evaluation methodology and consultations with public and private stakeholders

Advancing the Discipline of Regulatory Science for Medical Product Development

2016-08-11

this review of regulatory reform in russia covers the overall economic context the government s capacity to manage regulatory reform competition policy and enforcement and market openness it also examines the electricity and railroad sectors

Regional Government Competition

2018-12-07

part i of this publication provides information on regulatory systems and experiences from different stakeholders in the water supply and sanitation sector part ii contains an overview of regulatory systems around the world 10 case studies 8 country report summaries and the summary of a stakeholders survey

WHO Global Benchmarking Tool (GBT) for evaluation of national regulatory systems of medical products, revision VI

2021-05-10

this review explores the opportunities for better regulation within the swiss institutional framework

US Privatization Yearbook Volume 1 Important Projects and Developments

2021-10-25

discussion at this roundtable focused on how to achieve effective independent regulation and how to reconcile independence with the legitimate control of policy by the executive part of government

Improving Regulatory Delivery in Food Safety Mitigating Old and New Risks, and Fostering Recovery

2010-10-31

drawing on the oecd s expertise in comparing country experiences and identifying best practices this book tailors the oecd s policy advice to the specific and timely priorities of india focusing on how its government can make reform happen
