the term digital divide is still used regularly to characterize the injustice associated with inequalities in access to information and communication technologies icts as the debate continues and becomes more sophisticated more and more aspects of the distribution of icts are singled out as relevant to characterizations of the digital divide and of its moral status the best way to articulate the digital divide is to relate it to other aspects of social and distributive justice using a mixture of pre existing theories within moral and political philosophy these theories are complemented with contributions from sociology communication studies information systems and a range of other disciplines information technology and

social justice presents conceptual frameworks for understanding and tackling digital divides it includes information on access and skills access and motivation and other various levels of access it also presents a detailed analysis of the benefits and value of access to icts

## Attract Visitors to Your Site: The Mini Missing Manual

the definitive resource for a new generation of freelancers freelance writer internet marketer and mobile entrepreneur Yuwanda Black specializes in helping young freelancers build a business and live the freelance life and in the ultimate freelancer's guidebook she gives you the tools you need to be successful in the ever growing freelance market whether you're just starting out or looking to grow and expand you'll learn how to break into the freelance market find the best paying jobs negotiate a contract build a

brand create a strong online presence and portfolio you  
ll also learn how to build your reputation in the  
freelance market form long lasting professional  
relationships and start taking control of your own  
employment destiny and success

## Proceedings of the Ocean Drilling Program

1999

introduces students to the basics of bioinorganic  
chemistry this book provides the fundamentals for  
inorganic chemistry and biochemistry relevant to  
understanding bioinorganic topics it provides essential  
background material followed by detailed information on  
selected topics to give readers the background tools  
and skills they need to research and study bioinorganic  
topics of interest to them to reflect current practices  
and needs instrumental methods and techniques are  
referred to and mixed in throughout the book  
bioinorganic chemistry a short course third edition  
begins with a chapter on inorganic chemistry and  
biochemistry essentials it then continues with chapters  
on computer hardware software and computational  
chemistry methods important metal centers in proteins  
myoglobins hemoglobins superoxide dismutases  
nitrogenases hydrogenases carbonic anhydrases and  
nitrogen cycle enzymes the book concludes with chapters  
on nanobioinorganic chemistry and metals in medicine  
readers are also offered end of section summaries  
conclusions and thought problems reduces size of the  
text from previous edition to match the first keeping  
it appropriate for a one semester course offers primers  
and background materials to help students feel  
comfortable with research level bioinorganic chemistry  
emphasizes select and diverse topics using extensive

references from current scientific literature with more emphasis on molecular biology in the biochemistry section leading to a discussion of crispr technology adds new chapters on hydrogenases carbonic anhydrases and nitrogen cycle enzymes along with a separate chapter on nanobioinorganic chemistry features expanded coverage of computer hardware and software metalloenzymes and metals in medicines supplemented with a companion website for students and instructors featuring powerpoint and jpeg figures and tables arranged by chapter appropriate for one semester bioinorganic chemistry courses bioinorganic chemistry a short course third edition is ideal for upper level undergraduate and beginning graduate students it is also a valuable reference for practitioners and researchers in need of a general introduction to the subject as well as chemists requiring an accessible reference

the newly emerging field of theoretically informed but simultaneously empirically based syntax is dynamic but little represented in the literature this volume addresses this need while there has previously been something of a gulf between theoretical linguists in the generative tradition and those linguists who work with quantitative data types this gap is narrowing in the light of the empirical revolution in the study of syntax even people whose primary concern is grammatical theory take note of processing effects and attribute certain effects to them correspondingly workers focusing on the surface evidence can relate more to the concepts of the theoreticians because the two layers of

explanation have been brought into contact and these workers too must account for the data gathered by the theoreticians an additional innovation is the generative analysis of historical data this is now seen as psycholinguistic theory relevant data like any other these papers are thus a snapshot of some of the work currently being done in evidence based grammar using both experimental and historical data

## Machine Learning for Business

ionic liquids have attracted considerable interest in recent years in this book the bulk and interfacial physico chemical characteristics of various fluid systems dominated by coulomb interactions are treated which includes molten salts ionic liquids as well as metal molten salt mixtures and expanded fluid metals of particular interest is the comparison of the different systems topics in the bulk phase concern the microscopic structure the phase behaviour and critical phenomena and the metal nonmetal transition interfacial phenomena include wetting transitions electrowetting surface freezing and the electrified ionic liquid electrode interface with regard to the latter 2d and 3d electrochemical phase formation of metals and semi conductors on the nanometer scale is described for a number of selected examples the basic concepts and various experimental methods are introduced making the book suitable for both graduate students and researchers interested in coulombic fluids

this special issue presents the work of 30 scientists from 11 countries it confirms that the impacts of global change resulting from both climate change and increasing anthropogenic pressure are huge on worldwide coastal areas and critically so on some islands in the pacific ocean with highly negative effects on coastal groundwater resources which are widely affected by seawater intrusion some improved research methods are proposed in the contributions using innovative hydrogeological geophysical and geochemical monitoring assessing impacts of the changing environment on the coastal groundwater resources in terms of quantity and quality and using modelling especially to improve management approaches the scientific research needed to face these challenges must continue to be deployed by different approaches based on the monitoring modelling and management of groundwater resources novel and more efficient methods must be developed to keep up with the accelerating pace of global change

these are the conference proceedings of the 4th international conference on discovery science ds 2001 although discovery is naturally ubiquitous in science and scientific discovery itself has been subject to scientific investigation for centuries the term discovery science is comparably new it came up in connection with the japanese discovery science project cf arikawa s invited lecture on the discovery science project in japan in the present volume some time during

the last few years setsuo arikawa is the father in spirit of the discovery science conference series he led the above mentioned project and he is currently serving as the chairman of the international steering committee for the discovery science conference series the other members of this board are currently in alphabetical order klaus p jantke masahiko sato ayumi shinohara carl h smith and thomas zeugmann colleagues and friends from all over the world took the opportunity of meeting for this conference to celebrate arikawa's 60th birthday and to pay tribute to his manifold contributions to science in general and to learning theory and discovery science in particular algorithmic learning theory alt for short is another conference series initiated by setsuo arikawa in japan in 1990 in 1994 it amalgamated with the conference series on analogical and inductive inference aii when alt was held outside of japan for the first time
