and treating drug dependence this includes individuals involved in drug treatment anthropological and cultural studies policy analyses basic psychological and pharmacological research research on the epidemiology of drug use and dependence and research on prevention this influence by specialists might be usefully distinguished from those influences first mentioned for two reasons first studies of drug use and dependence attempt to uncover empirical generalizations about drugs and second because these findings are empirical there is a hope that they guide at least to some extent the actions of other forces that more directly determine drug policy psychology as an empirical discipline has long been interested in the use of psychoactive drugs at the level of basic science in psychopharmacology a most important contribution has been the demonstration that drugs of abuse function as reinforcers and thus enter into the same psychological processes as do other appetitive stimuli

~~years since president nixon declared the war on drugs in on~~
drugs david lenson delivers a scathing indictment of this war as an effort based like all attempts to eradicate getting high on an incomplete understanding of human nature from lotus eaters to hippies to crackheads he contends history has shown the state s inability to legislate the bloodstreams of its citizens lenson ventures beyond conventional genres to view the drug debate from the largely forgotten perspective of those who use drugs in successfully walking the fine line between the antidrug hysteria of the 1980s and an advocacy of drug use lenson shatters the ban on debate regarding drugs enforced in the just say no campaign and reveals the myriad ways straight society demonizes the drug user after considering several specific issues associated with drug use including sex violence and money lenson concludes with his vision of the end of the drug war by questioning the sense in condemning millions of americans to lives of concealment and deceit
