areas of private law such as the law of restitution this new edition takes account of all relevant judicial and legislative developments since the third edition and expands discussion of key themes in current developments of the law the greatest contribution to english law has been the concept of a trust and equitable ownership and while its origins date back to the middle ages the use of trusts is alive and well forming the basis of many settlements equity has allowed the law in particular land law to grow and develop providing new rights and remedies allowing it to evolve and adapt to changing situations and new demands imposed by modern society this has led to a debatable fusion between the common law and equity giving rise to a single coherent body of law in reality it is best to think of two systems or streams of law sitting side by side and giving effect to the law as it stands today as the origin of the claim or right can affect the remedy available and through a process of evolution some equitable principles have been absorbed into the common law as distinct rights therefore thinking of law and equity as totally separate and distinct will only hinder the understanding of both and impede the development of english law this book is superbly outlined with clear learning outcomes it undoubtedly provides a practical overview of equity and trusts it will be an interlocutory injunctions within the context of patents this new edition remains an ideal book for undergraduate study covering all aspects of equity and trusts jurisprudence in an accessible comprehensive and up to date style spendthrift trusts which shield assets from creditors have been an ongoing problem for the law since their advent in the nineteenth century other very recent forms of trust are an even bigger problem they take the notion of asset protection much farther allowing settlors to protect not only the beneficiary's assets but their own from creditors these are called self settled asset protection trusts moreover more and more states allow so called dynasty trusts which allow settlors and beneficiaries to maintain assets in trust tax free for generations overturning long settled principles of the common law such as the rule against perpetuities all of these trusts represent bad public policy they disrupt contracts by allowing debtors to avoid their debts they disrupt the tort system by denying victims compensation and removing deterrents to high risk behavior and they withhold vast tax revenues from the public fisc most efforts to reform trust law to alleviate the problems of these trusts have been statutory and unsuccessful for reasons I explain below no one has looked to principles in the law itself for a brake on their proliferation this is a serious oversight because property law itself does offer a solution in the obscure but important doctrine of *numerus clausus* students in common law jurisdictions do not study this doctrine and few academics pay attention to it but it is nonetheless a foundational principle of the law and one which unequivocally bars the types of trusts discussed above this

## ***The Law of Trusts***

spendthrift trusts which shield assets from creditors have been an ongoing problem for the law since their advent in the nineteenth century other very recent forms of

trust are an even bigger problem they take the notion of asset protection much farther allowing settlors to protect not only the beneficiary's assets but their own from creditors these are called self settled asset protection trusts moreover more and more states allow so called dynasty trusts which allow settlors and beneficiaries to maintain assets in trust tax free for generations overturning long settled principles of the common law such as the rule against perpetuities all of these trusts represent bad public policy they disrupt contracts by allowing debtors to avoid their debts they disrupt the tort system by denying victims compensation and removing deterrents to high risk behavior and they withhold vast tax revenues from the public fisc most efforts to reform trust law to alleviate the problems of these trusts have been statutory and unsuccessful for reasons i explain below no one has looked to principles in the law itself for a brake on their proliferation this is a serious oversight because property law itself does offer a solution in the obscure but important doctrine of *numerus clausus* students in common law jurisdictions do not study this doctrine and few academics pay attention to it but it is nonetheless a foundational principle of the law and one which unequivocally bars the types of trusts discussed above
