

journal article analysis assignments require you to summarize and critically assess the quality of an empirical research study published in a scholarly academic peer reviewed journal there isn't research in the traditional sense for this article but the author does include many examples of work written by those who have written on this subject in the past pesch cites people like locke montesquieu and machiavelli these are good well known examples summary and analysis of scientific research articles being able to summarize and analyze a research article is important not only for showing your professor that you have understood your assigned reading but it also is the first step to learning how to write your own research papers and literature reviews this article seeks to describe a systematic method of data analysis appropriate for undergraduate research theses where the data consists of the results from available published research we present a step by step guide with authentic examples and practical tips as you read be sure to note important items like the thesis purpose research questions hypotheses methods evidence key findings major conclusions tone and publication information depending on your writing context some of these items may not be applicable questions to consider article analysis example you may be asked to critique different types of articles as a writer some common examples include journal articles research articles and news articles each type has its way of analysis which you should be aware of as a writer scientific article review summaries and critiques are two ways to write a review of a scientific journal article both types of writing ask you first to read and understand an article from the primary literature about your topic article analysis assignment due dates see summary sheet read this handout carefully you must do this analysis by answering the specific questions listed keep your answers as brief as possible using an outline style rather than an elaborate writing style whenever possible criteria for article selection 10 scholarly journal article analysis anatomy of a scholarly article watch this video to learn about the structure of scholarly articles knowing this structure will help you to quickly find the type of information you want to read about to conduct content analysis you systematically collect data from a set of texts which can be written oral or visual books newspapers and magazines speeches and interviews content and social media posts photographs and films saunders and rojon 2011 explained that being critical in reviewing the literature is therefore a combination of our knowledge and understanding of what has been written our evaluation and judgement skills and our ability to structure these clearly and logically in writing p 159 the difference between process and product this assignment contains three main parts a rhetorical analysis of the conventions language audience intent and content of a specific journal from the humanities the analysis of an essay of your choice from the journal a discussion of what you believe it takes to be published in that journal this assignment is intended to raise your critical analysis is a process of examining a piece of work or an idea in a systematic objective and analytical way it involves breaking down complex ideas concepts or arguments into smaller more manageable parts to understand them better for the journal article analysis assignment you will find two 2 peer reviewed journal articles follow the instructions on the find articles page and summarize select analyze and cite them you will use these to develop your research question and build your arguments for your literature review or the discussion section of your lab report 1 identify how and why the research was carried out read the article s carefully and use the questions below to help you identify how and why the research was carried out look at the following sections introduction what was the objective of the study methods thematic analysis is a good approach to research where you re trying to find out something about people s views opinions knowledge experiences or values from a set of qualitative data for example interview transcripts social media profiles or survey responses some types of research questions you
