

# Read free 1 identification chemical product and company (Download Only)

search and share chemistry matches any text strings used to describe a molecule search by systematic name synonym trade name registry number smiles or inchi pubchem is the world's largest collection of freely accessible chemical information search chemicals by name molecular formula structure and other identifiers find chemical and physical properties biological activities safety and toxicity information patents literature citations and more a cas registry number is a unique and unambiguous identifier for a specific substance that allows clear communication and with the help of cas scientists links together all available data and research about that substance typically the identity of a substance can be described by a chemical name for example benzene number for example ec number 200 753 7 and chemical composition for example 99 benzene and 1 toluene the composition is determined by chemical analysis safety data sheets formerly called material safety data sheets communicate hazard information about chemical products need a safety data sheet now go to sds sources appendix d to hcs 2012 requires the product identifier that is used on the label to be listed in section 1 of the sds product identifier is defined as the name or number used for a hazardous chemical on a label or in the sds it provides a unique means by which the user can identify the chemical

## chemical identifier search chemspider

May 23 2024

search and share chemistry matches any text strings used to describe a molecule search by systematic name synonym trade name registry number smiles or inchi

## pubchem

Apr 22 2024

pubchem is the world s largest collection of freely accessible chemical information search chemicals by name molecular formula structure and other identifiers find chemical and physical properties biological activities safety and toxicity information patents literature citations and more

## cas registry cas

Mar 21 2024

a cas registry number is a unique and unambiguous identifier for a specific substance that allows clear communication and with the help of cas scientists links together all available data and research about that substance

## substance identification echa

Feb 20 2024

typically the identity of a substance can be described by a chemical name for example benzene number for example ec number 200 753 7 and chemical composition for example 99

benzene and 1 toluene the composition is determined by chemical analysis

## **safety data sheets sds explained blink**

Jan 19 2024

safety data sheets formerly called material safety data sheets communicate hazard information about chemical products need a safety data sheet now go to sds sources

## **correct use of product identifiers on safety data sheets and**

Dec 18 2023

appendix d to hcs 2012 requires the product identifier that is used on the label to be listed in section 1 of the sds product identifier is defined as the name or number used for a hazardous chemical on a label or in the sds it provides a unique means by which the user can identify the chemical
