this book is about the reinvention of the roman empire during the eighty years between the accession of diocletian and the death of julian how had it changed the emperors were still warriors and expected to take the field rome was still the capital at least symbolically there was still a roman senate though with new rules brought in by constantine there were still provincial governors but more now and with fewer duties in smaller areas and military command was increasingly separated from civil jurisdiction and administration the neighbours in persia germania

and on the danube were more assertive and better organised which had a knock on effect on roman institutions the achievement of diocletian and his successors down to julian was to create a viable apparatus of control which allowed a large and at times unstable area to be policed defended and exploited the book offers a different perspective on the development often taken to be the distinctive feature of these years namely the rise of christianity imperial endorsement and patronage of the christian god and the expanded social role of the church are a significant prelude to the byzantine state the author argues that the reigns of the christian supporting constantine and his sons were a foretaste of what was to come but not a complete or coherent statement of how church and state were to react with each other

this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1901 edition excerpt son of marcus anneus paulus which gives us the proof of the bond of sympathy and esteem established between the annei seneca the consul sufeectus at the time of the first trial of st paul his brother gallio governor of achaia and the founders of the church in rome no wonder that tertullian de anima xx should call the first seneca saepe noster seneca very often one of ours 1 and he abode two years in his own hired dwelling and received all that went unto him xxviii 30 and preached the kingdom of god and taught what concerned the lord jesus christ

with boldness none forbidding him xxviii 31 we infer therefore canon farrar says that paul s hired apartment was within close range of the pnetorian camp 2 in the excavations which the american school of athens carried on in 1898 at corinth a marble lintel was found among the ruins of a house of the roman period upon which the letters liiwiarrdl h khi lniwc were engraved the thought arose that the stone belonged to the very synagogue where paul reasoned every sabbath and persuaded the jews and the greeks the inscription however is much later than the apostolic age it simply proves that the meeting place made famous by the preaching of paul continued to flourish down to a very late period compare dr richardson s article in the century 1899 p 864 how strange it seems that students and visitors in general should pay so little attention to the grave of this remarkable man remains of which have been found at the fourth milestone of the via appia on the left or east side of the road l annaeus seneca son of the rhetorician marcus a spaniard by birth a roman by residence

from one of the world's leading authorities on the subject an innovative and comprehensive account of religion in the ancient roman and mediterranean world in this ambitious and authoritative book jörg rüpke provides a comprehensive and strikingly original narrative history of ancient roman and mediterranean religion over more than a millennium from the late bronze age through the roman imperial period and up to late antiquity while focused primarily on the city of rome pantheon fully integrates the many religious traditions found in the mediterranean world including judaism and christianity this generously illustrated book is also distinguished by its unique emphasis on lived religion a perspective that stresses how individuals experiences and practices transform religion into something different from its official form the result is a radically new picture of roman religion and of a crucial period in western religion one that influenced judaism christianity islam and even the modern idea of religion itself

may perhaps seem unnecessary to add another history of rome to those now in use but so far as the author is aware none has appeared since the writings of the greatest living historian of rome have opened new and important fields of thought to the student much light has also been thrown by modern comparative philology on the origin and primitive history of the latin race the present work is based in the main upon the römische geschichte of theodor mommsen and its chief aim is to bring the latest results of german research and criticism within the reach of english schools the writer was not aware until the work had made some progress that a translation in extenso of professor mommsen s history by professor dickson of glasgow university was being issued which has since been completed but it is evident that the two works are addressed to different classes of readers this history is intended for the use of higher forms in schools and candidates for appointments in the civil service but it is hoped that it may not prove devoid of interest to the general reader the writer has endeavoured not merely to relate facts but to impart life and suggestiveness to the story of the great republic to excite interest and sympathy and to suggest thought may not be the least important of the teacher s functions about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing

from a bold new historian comes a vibrant history of rome as seen through its most influential persona throughout the centuries the pope rome is a city of echoes where the voice of the people has chimed and clashed with the words of princes emperors and insurgents across the centuries in this authoritative new history jessica wärnberg tells the story of rome s longest standing figurehead and interlocutor the pope revealing how his presence over the centuries has transformed the fate of the city of rome emerging as the anonymous leader of a marginal cult in the humblest quarters of the city the pope began as the pastor of a maligned and largely foreign flock less than 300 years later he sat enthroned in a lofty heavily gilt basilica a religious leader

endorsed and financed by the emperor himself eventually the roman pontiff would supplant even the emperors as de facto ruler of rome and pre eminent leader of the christian world by the nineteenth century it would take an army to wrest the city from the pontiff s grip as the first ever account of how the popes presence has shaped the history of rome city of echoes not only illuminates the lives of the remarkable and unremarkable men who have sat on the throne of saint peter but also reveals the bold and curious actions of the men women and children who have shaped the city with them from antiquity to today in doing so the book tells the history of rome as it has never been told before during the course of this fascinating story city of echoes also answers a compelling question how did a man and institution whose authority rested on the blood and bones of martyrs defeat emperors revolutionaries and fascists to give rome its most enduring identity
