disarmament demobilization and reintegration ddr and security sector reform SSR have emerged in recent years as promising though generally poorly understood mechanisms for consolidating stability and reasserting state sovereignty after conflict despite the considerable experience acquired by the international community the critical interrelationship between ddr and SSR and the ability to use these mechanisms with consistent success remain less than optimally developed the chapters in this book reflect a diversity of field experience and research in ddr and SSR which suggest that these are complex and interrelated systems with underlying political attributes successful application of ddr and SSR requires the setting aside of preconceived assumptions or formulas and should be viewed flexibly to restore to the state the monopoly of force page 4 of cover

in an age when cross border business transactions are increasingly effected without the transference of physical products revenue concerns of states have led to a multitude of tax disputes based on the concept of nexus this important and timely book is the most authoritative to date to discuss one of the major tax topics of our time the question of how taxing rights on income generated from cross border activities in the digital age should be allocated among jurisdictions demonstrating in prodigious depth that it is the economic nexus of the tax entity or activity with the state and not the physical nexus which meets the jurisdictional requirement the author a leading authority on this area who is a senior commissioner of income tax and a member of the dispute resolution panel of the government of india addresses such dimensions of the subject as the following whether a strict territorial nexus as a normative principle is ingrained in source rule jurisprudence detailed scrutiny of such classical doctrines as benefit theory neutrality theory and international equity comparative critique of the organisation for economic co operation and development oecd and united nation un model tax treaties whether international law and customary principles mandate a strict territorial link with the source state for the assumption of tax jurisdiction whether the economic nexus based tax jurisdiction and absence of a physical presence breach the constitutional doctrine of extraterritoriality or due process and whether retrospective tax legislation breaches the principle of constitutional fairness the book offers

a politically informed analysis of the nexus principle and balances the dynamics of physical presence and economic nexus standards based on an in depth survey of the historical evolution of judicial pronouncements and international practices in this regard dr singh s book exposes an urgently needed missing link in the international source rule literature and takes a giant step towards solving the thorny question of appropriate tax apportionment it sheds brilliant light on the policies states may adopt when signing new tax treaties so that unintended results may be foreseen and avoided tax practitioners taxation authorities and academic researchers in the field of international tax law and policy will greatly appreciate the book s forthright enhancement of the ability to defend challenges based on the nexus doctrine

global trends such as urbanization demographic and climate change that are currently underway pose serious challenges to sustainable development and integrated resources management the complex relations between demands resource availability and quality and financial and physical constraints can be addressed by knowledge based policies and reform of professional practice the nexus approach recognizes the urgent need for this knowledge and its interpretation in a policy relevant setting that is guided by the understanding that there is a lack of blueprints for development based on integrated management of water soil and waste resources in the member states generation and application of knowledge is both a priority for individual but also institutional capacity development

this book discusses a range of planning and management issues related to building urban resiliency it covers such topics as urban environmental and transportation planning historical preservation emergency relief and management geographic information systems gis and other technological applications the book includes case studies of several cities and districts in china including shanghai and a number of cities in the united states of america urban resiliency in the face of uncertainty is a priority for planning and governance in communities worldwide in china which has suffered many of the world s most devastating floods earthquakes and typhoons preparing

for the threat of disaster has long been an important planning objective recent calamities such as the 2008 winter storms the 2008 wenchuan earthquake and the 2012 beijing floods have only made planning for resiliency more urgent as planners work to prepare for such events interdisciplinary collaboration becomes increasingly important planners need the tools and insights offered by other fields including both the natural and social sciences at the same time these interdisciplinary relationships help shape the identity of urban rural planning in its new role as one of china s primary academic disciplines thus the nexus between planning and science is critically important in building resilient cities in china and the chinese planning experience can serve as an example to and benefit countries around the world

this edited book brings together a diverse group of researchers to address the challenges posed by global mass poisoning caused by lead contamination of soil and plants lead is among the elements that have been most extensively used by man over time this has led to extensive pollution of surface soils on the local scale mainly associated with mining and smelting of the metal and addition of organic lead compounds to petrol release of lead to the atmosphere from various high temperature processes has led to surface contamination on the regional and even global scale lead is particularly strongly bound to humic matter in organic rich soil and to iron oxides in mineral soil and is rather immobile in the soil unless present at very high concentrations in addition plants grown on lead rich soils incorporate lead and thus the concentration of lead in crop plants may be increased lead enters in the food chain through consumption of plant material a high concentration of lead has been found to be harmful to vegetation as the lead concentration increases it adversely affects several biological parameters and eventually renders the soil barren the book sheds light on this global environmental issue and proposes solutions to contamination through multi disciplinary approaches this book contains three sections first section describes the different sources and distribution of lead in soil and plant ecosystems second section explains the health risks linked to lead toxicity third section addresses sustainable lead toxicity mitigation strategies using the potential applications of recent biological technology this book is a valuable resource to students academics researchers and environmental professionals doing field work on contamination throughout the world

over the last few years and with the collapse of the bipolar world order new and complex conflicts have emerged which in some cases have ignited into larger and devastating regional wars in the very midst of peacekeeping operations for such conflicts experts claim the requirements of peace building should be considered a priority as well it is for this reason that the united nations even as it deploys military and civilian forces in the four corners of the globe seeks to set the foundations for sustainable peace the task is daunting but the challenge impossible to ignore against such a background and even as events were unfolding in east timor and kosovo the fourth in a series of prestigious conferences organised on lessons learnt from peacekeeping operations was held under the auspices of the united nations institute for training and research unitar the institute of policy studies ips of singapore and the japan institute of international affairs jiaa throughout two intense days in singapore in november of 1999 an eminent group of academics government officials

representatives of international organisations and military scholars gathered behind closed doors to reflect upon what has been coined the nexus between peacekeeping and peace building this volume contains all the papers commissioned for that event it also includes a summary of the many animated debates that took place during the conference the broad range of opinions and perspectives it contains provides insights into a difficult and important topic and demonstrates how dangerous it would be for the international community to ignore it four past cases angola haiti mozambique and cambodia and two ongoing operations kosovo and east timor were analysed the findings should give policy makers researchers and international affairs analysts a candid review and critique of past experiences that is essential for the comprehension of current peacekeeping missions and the requirement of peace building strategies
