Getting MAD 2004 getting mad nuclear mutual assured destruction its origins and practice is the first critical history of the intellectual roots and actual application of the strategic doctrine of nuclear mutual assured destruction or mad written by the world s leading french british and american military policy planners and analysts this volume examines how mad and its emphasis on the military targeting of population centers influenced the operational plans of the major nuclear powers and states such as pakistan india and israel given america s efforts to move away from mad and the continued reliance on mad thinking by smaller nations to help justify further nuclear proliferation getting mad is a timely must read for anyone eager to understand our nuclear past and future

Getting MAD: Nuclear Mutual Assured Destruction, Its Origins and Practice 2004 nearly 40 years after the concept of finite deterrence was popularized by the johnson administration nuclear mutual assured destruction mad thinking appears to be in decline the united states has rejected the notion that threatening population centers with nuclear attacks is a legitimate way to assure deterrence most recently it withdrew from the anti ballistic missile treaty an agreement based on mad american opposition to mad also is reflected in the bush administration s desire to develop smaller more accurate nuclear weapons that would reduce the number of innocent civilians killed in a nuclear strike still mad is influential in a number of ways first other countries like china have not abandoned the idea that holding their adversaries cities at risk is necessary to assure their own strategic security nor have u s and allied security officials and experts fully abandoned the idea at a minimum acquiring nuclear weapons is still viewed as being sensible to face off a hostile neighbor that might strike one s own cities thus our diplomats have been warning china that japan would be under tremendous pressure to go nuclear if north korea persisted in acquiring a few crude weapons of its own similarly israeli officials have long argued without criticism that they would not be second in acquiring nuclear weapons in the middle east indeed given that israelis surrounded by enemies that would not hesitate to destroy its population if they could washington finds israel s retention of a significant nuclear capability totally understandable
