Hearings Before and Special Reports Made by Committee on Armed Services of the House of Representatives on Subjects Affecting the Naval and Military Establishments

1992

the revised edition of this practical hands on book discusses the launch vehicles in use today throughout the world and includes the latest details on advanced systems being developed such as electric and nuclear propulsion the author covers the fundamentals from the basic principles of rocket propulsion and vehicle dynamics through the theory and practice of liquid and solid propellant motors to new and future developments he provides a serious exposition of the principles and practice of rocket propulsion from the point of view of the user who is not an engineering specialist

Army RD & A.

1965

this book tells the story of the soviet and russian lunar programme from its origins to the present day federal russian space programme brian harvey describes the techniques devised by the ussr for lunar landing from the lk lunar module to the lok lunar orbiter and versions tested in earth s orbit he asks whether these systems would have worked and examines how well they were tested he concludes that political mismanagement rather than technology prevented the soviet union from landing cosmonauts on the moon the book is well timed for the return to the moon by the united states and the first missions there by china and india

Rocket and Spacecraft Propulsion

2008-11-05

this absorbing book describes the long development of the soviet space shuttle system its infrastructure and the space agency s plans to follow up the first historic unmanned mission the book includes comparisons with the american shuttle system and offers accounts of the soviet test pilots chosen for training to fly the system and the operational political and engineering problems that finally sealed the fate of buran and ultimately of nasa s shuttle fleet
