

Download free Dying words endangered languages and what they have to tell us Full PDF

an endangered language or moribund language is a language that is at risk of disappearing as its speakers die out or shift to speaking other languages language loss occurs when the language has no more native speakers and becomes a dead language this peer reviewed collection brings together the latest research on language endangerment and language rights it creates a vibrant interdisciplinary platform for the discussion of the most pertinent and urgent topics central to vitality and equality of languages in today s globalised world two fifths of the world s languages are poised to die out the un says learning languages could help promote peace of the more than 7 000 different languages in use around the world today 41 are endangered some languages still thrive however when given the right conditions something like half are thought likely to disappear over the next few decades as speakers of endangered languages turn to more widely spoken ones the languages of the world are grouped into perhaps 430 language families based on their origin as determined by comparing similarities among languages and deducing how they evolved from earlier ones languages play a crucial role in our daily lives they also make up our unique cultural identities yet of the about 6 700 languages spoken in the world today 40 percent are at risk of disappearing of the nearly 7 000 languages in the world today some 3 000 43 are endangered many others will make their way into this catalogue in the near future experts have predicted that in the worst case scenario 90 of all languages will be extinct within 100 years in the best case scenario only 50 will survive and just 10 are considered 2021 julia sallabank of the approximately 7 000 languages in the world at least half may no longer be spoken by the end of the twenty first century languages are endangered by a number of factors including globalization education policies and the political economic and cultural marginalization of minority groups endangered language communities also stand to lose valuable cultural practices such as oral histories traditional songs and poetry and other art forms that are tied to language linguistics on the other hand is at risk for losing half of the subject matter it studies about us we unlock the potential of millions of people worldwide our assessments publications and research spread knowledge spark enquiry and aid understanding around the world dr anna belew who graduated with a doctorate from the university of hawai'i at mānoa department of linguistics in 2020 is
