Proceedings of the 8th International Conference on Computational Science and Technology

2022-03-25

this book gathers the proceedings of the seventh international conference on computational science and technology iccst 2021 held in labuan malaysia on 28 29 august 2021 the respective contributions offer practitioners and researchers a range of new computational techniques and solutions identify emerging issues and outline future research directions while also showing them how to apply the latest large scale high performance computational methods

Introduction to Financial Models for Management and Planning

2017-05-30

a properly structured financial model can provide decision makers with a powerful planning tool that helps them identify the consequences of their decisions before they are put into practice introduction to financial models for management and planning second edition enables professionals and students to learn how to develop and use computer based models for financial planning this volume provides critical tools for the financial toolbox then shows how to use them tools to build successful models

Research Methods in Public Administration and Nonprofit Management

2017-09-11

now in a thoroughly revised and refreshed fourth edition research methods in public administration and nonprofit management is beloved by students and professors alike for its exceptional clarity and accessibility and plentiful illustrations this new edition integrates quantitative qualitative and mixed methods approaches as well as specific up to date instruction in the use of statistical software programs such as excel and spss changes to this edition include a new section featuring two new

chapters to explore mixed methods approaches to research including fundamentals research design data collection and analyzing and interpreting findings a new dedicated chapter on big data research updated exhibits and examples throughout the book a new companion website to accompany the book containing powerpoint slides for each chapter new exhibits tables figures and exercises as well as key terms and discussion questions at the end of each chapter research methods in public administration and nonprofit management 4e is an ideal textbook for use in all research methods courses in undergraduate and graduate public administration public affairs and nonprofit management courses

Artificial Intelligence and Bioinspired Computational Methods

2020-08-08

this book gathers the refereed proceedings of the artificial intelligence and bioinspired computational methods section of the 9th computer science on line conference 2020 csoc 2020 held on line in april 2020 artificial intelligence and bioinspired computational methods now represent crucial areas of computer science research the topics presented here reflect the current discussion on cutting edge hybrid and bioinspired algorithms and their applications

Principles of Managerial Statistics and Data Science

2020-02-05

introduces readers to the principles of managerial statistics and data science with an emphasis on statistical literacy of business students through a statistical perspective this book introduces readers to the topic of data science including big data data analytics and data wrangling chapters include multiple examples showing the application of the theoretical aspects presented it features practice problems designed to ensure that readers understand the concepts and can apply them using real data over 100 open data sets used for examples and problems come from regions throughout the world allowing the instructor to adapt the application to local data with which students can identify applications with these data sets include assessing if searches during a police stop in san diego are dependent on driver s race visualizing the association between fat percentage and moisture percentage in canadian cheese modeling taxi fares in chicago using data from millions of rides analyzing mean sales per unit of legal marijuana products in washington state topics covered in principles of managerial statistics and data

science include data visualization descriptive measures probability probability distributions mathematical expectation confidence intervals and hypothesis testing analysis of variance simple linear regression and multiple linear regression are also included in addition the book offers contingency tables chi square tests non parametric methods and time series methods the textbook includes academic material usually covered in introductory statistics courses but with a data science twist and less emphasis in the theory relies on minitab to present how to perform tasks with a computer presents and motivates use of data that comes from open portals focuses on developing an intuition on how the procedures work exposes readers to the potential in big data and current failures of its use supplementary material includes a companion website that houses powerpoint slides an instructor s manual with tips a syllabus model and project ideas r code to reproduce examples and case studies and information about the open portal data features an appendix with solutions to some practice problems principles of managerial statistics and data science is a textbook for undergraduate and graduate students taking managerial statistics courses and a reference book for working business professionals

Research Methods for Tourism Students

2017-12-12

this introductory guide offers innovative ideas and strategies to students undertaking their first social science research work academically rigorous yet accessible it uses a systematic step by step approach to illustrate the research process and its applications to the tourism industry students are presented with numerous examples and case studies linking theory with practice the textbook provides a balanced coverage of both qualitative and quantitative methods accompanying students throughout the process of selecting a research topic and specifying research questions aims and objectives a range of pedagogical features such as discussion questions practical tips and examples enable students to review the literature understand models and methodologies analyse and interpret data quantitative and qualitative and ultimately write up their findings featuring contributions by a group of academics with expertise in their respective fields the book provides a comprehensive and engaging introduction to research methods this is an essential resource to tourism students and will also be of interest to researchers in any social science subject
