in post war britain left wing policy maker and sociologist michael young played a major role in shaping british intellectual political and cultural life using his study of the social sciences to inform his political thought in the mid twentieth century the social sciences significantly expanded and played a major role in shaping british intellectual political and cultural life central to this intellectual shift was the left wing policy maker and sociologist michael young as a labour party policy maker in the 1940s young was a key architect of the party's 1945 election manifesto let us face the future he became a sociologist in the 1950s publishing a classic study of the east london working class family and kinship in east london with peter willmott in 1957 which he followed up with a dystopian satire the rise of the meritocracy about a future society in which social status was determined entirely by intelligence young was also a prolific social innovator founding or inspiring dozens of organisations including the institute of community studies the consumers association which magazine the social science research council and the open university moving between politics social science and activism young believed that disciplines like sociology psychology and anthropology could help policy makers and politicians understand human nature which in turn could help them to build better political and social institutions this book examines the relationship between social science and public policy in left wing politics between the end of the second world war and the end of the first wilson government through the figure of michael young drawing on young's prolific writings and his intellectual and political networks it argues that he and other social scientists and policy makers drew on contemporary ideas from the social sciences to challenge key labour values like full employment and nationalisation and to argue that the labour party should put more emphasis on relationships family and community showing that the social sciences were embedded in the project of social democratic governance in post war britain it argues that historians and scholars should take their role in british politics and political thought seriously
