2000-05-08

australia s food nutrition 2012 highlights the key components of the food and nutrition system it describes the system from paddock to plate and how food choices affect our health and the environment publisher website

The Australian Policy Handbook

2018

agriculture mining and related rural industries have been central to the development of australia s economy this book

details the role that the Australian government has played in the making of rural and regional Australia particularly since World War II. The book reviews these policies and evaluates them with regards to the commitments undertaken by the government to contribute towards vibrant rural communities. Policy areas addressed include agriculture, water, education, welfare, and population, natural resource management, resource extraction, indigenous and affairs, localism, rural research, and regional innovation, youth affairs, and the devolution of regional governance. Overall, two distinct policy strategies can be observed: one wherein the government saw its role as part of the entrepreneurial state and a sector wherein government has increasingly taken itself out of industry development, leaving this role to the market. Having considered these strategies and their impacts, the book concludes that policy over the past 40 years has not, in fact, contributed to a more vibrant, prosperous rural and regional Australia. Rural and regional futures concludes with several chapters looking to the future: one chapter explores what the role of the state can be within a social market economy, while the final chapter gives consideration to the initial steps rural communities will need to take to begin the process of revitalisation. While these materials present as a case study of developments in Australia, the policy shift from the government as entrepreneur to a focus on markets is an international one, and as such, the insights offered by this book will have wide appeal.

The Australian Welfare State

1996

Climate change is one of the most serious global challenges facing humankind. Climate change has enormous environmental and economic implications, and finding a solution is a daunting task. The purpose of this book is to look at the global problem of climate change through the prism of an individual country's attempt to tackle this problem. This book begins with a discussion of the origins of climate change and the evolution of the international response to climate change. Key climate change mitigation actions and policies are considered to provide the necessary framework for analysing Australia's approach to climate change. Australia's climate change policy development is considered from a historical perspective. The book traces the evolution of the response to climate change, focusing on Australia as one of the federal countries unable to adequately reduce greenhouse gas emissions due to the systematic failure of the Australian government to develop a common and effective approach to the problem of climate change. The book will be of interest to scholars and students of environmental law and the contemporary international and Australian climate change law.

The Australian Jurist

1871

deals with the development of prevention policies and approaches that involve intervention early in the lives of children, young people, and their families. This book explores evidence that has been emerging from longitudinal and developmental prevention research.

Age-Friendly Cities and Communities

2018-01-17

population ageing is projected to affect all countries across the world in coming decades the current rate of population ageing is unprecedented in human history with population projections indicating that this will be an enduring trend moreover population ageing is spatially pervasive affecting every man woman and child this has considerable implications for policy responding to the economic social and healthcare outcomes of population ageing the potential economic implications have been likened to those of the 2008 global financial crisis this book examines the patterns and causes of uneven population ageing it identifies those countries and localities most likely to experience population ageing and the reasons for this attention is also given to the role that youth migration labour force migration retirement migration and ageing in place have in influencing the spatial concentrations of older people the book brings together a range of diverse international case studies to illustrate the importance of understanding the causes of population ageing case studies include a review of ageing in florida s usa labour force an investigation into the housing arrangements for the elderly in northern ireland and an assessment of the environmental stewardship activities of grey nomads on western australia s remote north coast
