The Patient Will See You Now

2013-01-01

the essential guide by one of america s leading doctors to how digital technology enables all of us to take charge of our health a trip to the doctor is almost a guarantee of misery you ll make an appointment months in advance you ll probably wait for several hours until you hear the doctor will see you now but only for fifteen minutes then you ll wait even longer for lab tests the results of which you ll likely never see unless they indicate further and more invasive tests most of which will probably prove unnecessary much like physicals themselves and your bill will be astronomical in the patient will see you now eric topol one of the nation s top physicians shows why medicine does not have to be that way instead you could use your smartphone to get rapid test results from one drop of blood monitor your vital signs both day and night and use an artificially intelligent algorithm to receive a diagnosis without having to see a doctor all at a small fraction of the cost imposed by our modern healthcare system the change is powered by what topol calls medicine s guttenberg moment much as the printing press took learning out of the hands of a priestly class the mobile internet is doing the same for medicine giving us unprecedented control over our healthcare with smartphones in hand we are no longer beholden to an impersonal and paternalistic system in which doctor knows best medicine has been digitized topol argues now it will be democratized computers will replace physicians for many diagnostic tasks citizen science will give rise to citizen medicine and enormous data sets will give us new means to attack conditions that have long been incurable massive open online medicine where diagnostics are done by facebook like comparisons of medical profiles will enable real time real world research on massive populations there s no doubt the path forward will be complicated the medical establishment will resist these changes and digitized medicine inevitably raises serious issues surrounding privacy nevertheless the result better cheaper and more human health care will be worth it provocative and engrossing the patient will see you now is essential reading for anyone who thinks they deserve better health care that is for all of us

Hidden and Devalued Feminized Labour in the Digital Humanities

2014-12-02

hidden and devalued feminized labour in the digital humanities examines the data driven labour that underpinned the index thomisticus a preeminent project of the incunabular digital humanities and advanced the data foundations of computing in the humanities through oral history and archival research nyhan reveals a hidden history of the entanglements of gender in the intellectual and technical work of the early digital humanities setting feminized keypunching in its historical contexts from the history of concordance making to the feminization of the office and humanities computing this book delivers new insight into the categories of work deemed meritorious of acknowledgement and attribution and thus how knowledge and expertise was defined in and by this field focalizing the overlooked yet significant data driven labour of lesser known individuals this book challenges exclusionary readings of the history of computing in the humanities contributing to ongoing conversations about the need for alternative genealogies of computing this book is also relevant to current debates about diversity and representation in the academy and the wider computing sector hidden and devalued feminized labour in the digital humanities will be of interest to researchers and students studying digital humanities library and information science the history of computing oral history the history of the humanities and the sociology of knowledge and science
