In 1802 Jean-François Champollion was eleven years old that year he vowed to be the first person to read Egyptian's ancient hieroglyphs. Champollion's dream was to sail up the Nile in Egypt and uncover the secrets of the past and he dedicated the next twenty years to the challenge. James Rumford introduces the remarkable man who deciphered the ancient Egyptian script and fulfilled a lifelong dream. In the process, stunning watercolors bring Champollion's adventure to life in a story that challenges the mind and touches the heart. This is the most up-to-date treatment of ancient Egyptian as a spoken language. Middle Egyptian introduces the reader to the writing system of ancient Egypt and the language of hieroglyphic texts. It contains twenty-six lessons, exercises with answers, a list of hieroglyphic signs, and a dictionary. It also includes a series of twenty-five essays on the most important aspects of ancient Egyptian history, society, religion, and literature. The combination of grammar lessons and cultural essays allows users to not only read hieroglyphic texts but also to understand them, providing readers with the foundation to understand texts on monuments and to read great works of ancient Egyptian literature in the original text. This second edition contains revised exercises and essays providing an up-to-date account of current research and discoveries. New illustrations enhance discussions and examples. These additions combine with the previous edition to create a complete grammatical description of the classical language of ancient Egypt for specialists in linguistics and other fields. The first comprehensive study of how the phonology and grammar of ancient Egyptian changed over four millennia of language history. This volume provides original texts as well as translations of the major works of Middle Kingdom literature, completely revised and updated. James P. Allen provides a translation of the oldest corpus of ancient Egyptian religious texts from the six royal pyramids of the Fifth and Sixth Dynasties, ca. 2350-2150 BCE. Allen's revisions take into account recent advances in the understanding of Egyptian grammar. Features sequential translations based on all

the hebrew patriarchs joseph moises and solomon and the queen of sheba is incorrect there are unmistakable hieroglyphic texts the nation of khumry who are misnamed as the welsh are reliably traced back in time and distance as the lost ten tribes of israel their deportation from israel to armenia around 720 700 bc was followed by their march west through asia minor to the dardanelles half the nation went to found etruscia around 650 bc and the remainder sailed for britain in c 504 bc this means that before they arrived in canaan to found israel they were in egypt a strange khumric triad notation of around 100 years ago indicates the egyptian connection and specifically refers to the hieroglyphic writings the clear inference is that khumric is the basic language of the hieroglyphics professor sir john morris jones wrote a thesis in 1898 that demonstrated the identicality of the complex khumric syntax and that of ancient egypt plus the fact that the same seven vowels a e i o u w y were used in ancient egypt and the khumry other 19th century scholars including bunsen were alert to this ancient language connection as there are well known huge chronological mismatches scattered all through the histories of the ancient nations of the near east and the mediterranean and considerable confusions in the ancient history of egypt it appears logical that there must be something wrong with the historical data as there are thousands of egyptian hieroglyphic texts there should be no problem with the order and chronology of the history if these texts are read correctly the fact that there is confusion indicates that the texts have not been properly read and automatically this means that the present accepted method of reading the ancient egyptian history is used as the yardstick to establish the dates and full chronology of all the other ancient nations wars royal intermarriages treaties of alliance and trade agreements and so on are all dated by reference directly or indirectly to ancient egypt as the present accepted order and grotesquely distorted historical gaps and dark ages of five six and even eight hundred centuries litter the scenario and every investigator who has dared to step into this arena has pointed the finger directly at egyptian chronology basic analysis shows that the concept that the hieroglyphs were written in coptic is not correct and the system of decipherment mainly involves guesswork and speculation using a strange cocktail mix of coptic hamitic and hebrew the indications are that j f champollion claimed much more than he actually achieved if the texts are not deciphered and read correctly then the information in the texts is not correctly understood it is a simple task to test the possibility that the ancient language of the khumry in britain that can be traced back through etruscia the aegean asia minor and assyria to old israel is the basic language of the ancient egyptian hieroglyphics as a number of scholars have

attempted to raise the issue of the chaos existing in the chronology of ancient egyptian history and in 1990 peter james and four other academic archaeologists published centuries of darkness and pointed out the historical mismatches and later david rohl published hi pharaohs kings and made his tv series and the problem of incorrect dates and order were clearly illustrated between 1950 and 1970 immanuel velikovsky published a series of books outlining the problems in ages in chaos in rameses ii his time oedipus ahkenaten the peoples of the sea etc velikovsky was viciously attacked in a disgraceful exhibition of academic barbarism peter james et al and david rohl were quietly ignored nothing positive was done by the entrenched establishment who are willingly deaf dumb and blind to the situation the pre 307 bc hieroglyphic texts can be read using the khumric language as their foundation the results are consistent coherent and much more accurate than the egyptospeak invented by champollion the order of the egyptian dynasties as currently presented is chaotic and there are also many clear duplications the indisputable fact is that the alleged 21st dynasty of egypt that is currently misdated at c 1050 950 bc is one and the same with the family dynasty of alexander the great in the 332 307 bc era on this there can be no argument the notion that there are no hieroglyphic texts that identify joseph benjamin moses and solomon and the queen of sheba is a patent absurdity these patriarchal figures have been shunted back in time from c 1550 bc to 2600 bc from c 1350 bc to 22400 bc and from c 950 bc to 1450 bc and so on and as a result they have been obscured much of this disorder could and should have been resolved many years ago and there was a major scientific tool available to assist in this necessary process with the discovery of the radio carbon 14 dating techniques instead of putting their house in order the denizens of the colleges and museums laboured mightily to discredit the radio carbon 14 dating methods and it still is the common practice to discard and ignore the multitude of radio carbon 14 results that highlight the problems and to claim that these readings must be contaminated or otherwise aberrant the researchers of this project made their findings 20 years ago beginning in 1984 when correct information cascaded out from readings of hieroglyphic texts using khumric and only khumric as the base language the savage treatment that was accorded to velikovsky totally deterred them from making any of their work public it is a sad fact that censorship does exist and persists as it has for centuries nonetheless there are clear texts on joseph on moses and on solomon sheba and others the rush to publish of the 19th century has left a legacy of muddles and stagnation and it is time to allow a defence to be heard against the unchallenged allegation and prosecution the hieroglyphenkunde by karl

scenario and every investigator who has dared to step into this arena has pointed the finger directly at egyptian chronology basic analysis shows that the concept that the hieroglyphs were written in coptic is not correct and the system of decipherment mainly involves guesswork and speculation using a strange cocktail mix of coptic hamatic and hebrew the indications are that j f champollion claimed much more than he actually achieved if the texts are not deciphered and read correctly then the information in the texts is not correctly understood it is a simple task to test the possibility that the ancient language of the khumry in britain that can be traced back through etruria the aegean asia minor and assyria to old israel is the basic language of the ancient egyptian hieroglyphics as a number of scholars have attempted to raise the issue of the chaos existing in the chronology of ancient egyptian history and in 1990 peter james and four other academic archaeologists published centuries of darkness and pointed out the historical mismatches and later david rohl published hi pharaohs kings and made his tv series and the problem of incorrect dates and order were clearly illustrated between 1950 and 1970 immanuel velikovsky published a series of books outlining the problems in ages in chaos in rameses ii his time oedipus ahkenaten the peoples of the sea etc velikovsky was viciously attacked in a disgraceful exhibition of academic barbarism peter james et al and david rohl were quietly ignored nothing positive was done by the entrenched establishment who are willingly deaf dumb and blind to the situation the pre 307 bc hieroglyphic texts can be read using the khumric language as their foundation the results are consistent coherent and much more accurate than the egyptospeak invented by champollion the order of the egyptian dynasties as currently presented is chaotic and there are also many clear duplications the indisputable fact is that the alleged 21st dynasty of egypt that is currently misdated at c 1050 950 bc is one and the same with the family dynasty of alexander the great in the 332 307 bc era on this there can be no argument the notion that there are no hieroglyphic texts that identify joseph benjamin moses and solomon and the queen of sheba is a patent absurdity these patriarchal figures have been shunted back in time from c 1550 bc to 2600 bc from c 1350 bc to 22400 bc and from c 950 bc to 1450 bc and so on and as a result they have been obscured much of this disorder could and should have been resolved many years ago and there was a major scientific tool available to assist in this necessary process with the discovery of the radio carbon 14 dating techniques instead of putting their house in order the denizens of the colleges and museums laboured mightily to discredit the radio carbon 14 dating methods and it still is the common practice to discard and ignore the multitude of radio carbon 14

results that highlight the problems and to claim that these readings must be contaminated or otherwise aberrant the researchers of this project made their findings 20 years ago beginning in 1984 when correct information cascaded out from readings of hieroglyphic texts using khumric and only khumric as the base language the savage treatment that was accorded to velikovsky totally deterred them from making any of their work public it is a sad fact that censorship does exist and persists as it has for centuries nonetheless there are clear texts on joseph on moses and on solomon sheba and others the rush to publish of the 19th century has left a legacy of muddles and stagnation and it is time to allow a defence to be heard against the unchallenged allegation and prosecution

**Catalogue of the Very Interesting Collection of Egyptian Antiquities, Formed by James Burton, ... During His Travels in Egypt** 1836 the egyptian language with its written documentation spreading from the early bronze age ancient egyptian to christian times coptic has rarely been the object of typological studies grammatical analysis mainly serving philological purposes this volume offers now a detailed analysis and a diachronic discussion of the non verbal patterns of the egyptian language from the pyramid texts earlier egyptian to coptic later egyptian based on an extensive use of data especially for later phases by providing a narrative contextualisation and a linguistic glossing of all examples it addresses the needs not only of students of egyptian and coptic but also of a linguistic readership after an introduction into the basic typological features of egyptian the main book chapters address morphology syntax semantics and pragmatics of the three non verbal sentence types documented throughout the history of this language the adverbial sentence the nominal sentence and the adjectival sentence these patterns also appear in a variety of clausal environments and can be embedded in verbal constructions this book provides an ideal introduction into the study of egyptian historical grammar and an indispensable companion for philological reading

*Cleopatra's Needle* 1884 fraud and fallible judgment is both an exploration of fraud and an examination of the nature of truth in social relations and experience the essays in this volume are concerned with deception in the social and behavioral sciences and conditions that elicit deceptive behavior among scientists whatever then discipline the issue of fraud in the social sciences moves far beyond a simple dictionary definition of duplicity errors in experimentation are less definite and less concrete than they are in the physical sciences fraud in the social sciences ranges from simple plagiarism of data and ideas to quiet suppression of information the essays in fraud and fallible judgment raise issues of professional judgment from self policing to academic policy

episodes of misconduct in research once resolved within the academic or scientific community are now commanding media attention on an unprecedented scale one net effect over the long term may prove to be that public confidence in the research enterprise has been irretrievably weakened likewise perhaps public willingness to invest tax dollars in the support of that enterprise allegations of fraud can also be used to destroy careers once maligned a reputation may never be repaired the very act of writing on the subject with candor and intelligence is itself an act of rare courage contributions to this volume include david goodstein the fading myth of the noble scientist j phillipe rushton cyril hurt as the victim of scientific hoax del thiesen and robert young investigating sexual coercion and marcel lafollette the silence of the social sciences this volume is an ideal text for students and scientists in all areas of the social and behavioral sciences particularly psychologists and sociologists
