## **Reframing Biblical Studies 2009-06-23**

until recently biblical studies and studies of the written and material culture of the ancient near east have been fragmented governed by experts who are confined within their individual disciplines methodological frameworks and patterns of thinking the consequence has been that at present concepts and the terminology for examining the interaction of textual and historical complexes are lacking however we can learn from the cognitive sciences until the end of the 1980s neurophysiologists psychologists pediatricians and linguists worked in complete isolation from one another on various aspects of the human brain then beginning in the 1990s one group began to focus on processes in the brain thereby requiring that cell biologists neurologists psychiatrists psychologists linguists and other relevant scientists collaborate with each other their investigation revealed that the brain integrates all kinds of information if this were not the case we would not be able to catch even a glimpse of the brain s processing activity by analogy van wolde s proposal for biblical scholarship is to extend its examination of single elements by studying the integrative structures that emerge out of the interconnectivity of the parts this analysis is based on detailed studies of specific relationships among data of diverse origins using language as the essential device that links and permits expression this method can be called a cognitive relational approach van wolde bases her work on cognitive concepts developed by ronald langacker with these concepts biblical scholars will be able to study emergent cognitive structures that issue from biblical words and texts in interaction with historical complexes van wolde presents a method of analysis that biblical scholars can follow to investigate interactions among words and texts in the hebrew bible material and nonmaterial culture and comparative textual and historical contexts in a significant portion of the book she then exemplifies this method of analysis by applying it to controversial concepts and passages in the hebrew bible the crescent moon the in law family the city gate differentiation and separation genesis 1 34 levticus 18 20 numbers 5 35 deuteronomy 21 and ezeziel 18 22 33

was adam a real historical person and if so who was he and when did he live william lane craig sets out to answer these questions through a biblical and scientific investigation he begins with an inquiry into the genre of genesis 1 11 determining that it can most plausibly be classified as mytho history a narrative with both literary and historical value he then moves into the new testament where he examines references to adam in the words of jesus and the writings of paul ultimately concluding that the entire bible considers adam the historical progenitor of the human race a position that must therefore be accepted as a premise for christians who take seriously the inspired truth of scripture working from that foundation of biblical truth craig embarks upon an interdisciplinary survey of scientific evidence to determine where adam could be most plausibly located in the evolutionary history of humankind ultimately determining that adam lived between 750 000 and 1 000 000 years ago as a member of the archaic human species homo heidelbergensis he concludes by reflecting theologically on his findings and asking what all this might mean for us as human beings created in the image of god literally descended from a common ancestor albeit one who lived in the remote past

the role of representation in religion is complex while often perceived as essential it is also associated in many traditions with the liability of idolatry and provokes iconoclasm the essays in this volume examine the nuances of representation in religion and the debate concerning its place across a variety of traditions from the three abrahamic faiths to those of antiquity and the east this

volume consists of presentations made at an international conference held in honor of moshe barasch art historian and cultural critic who has done much to elucidate the light which representation and religion shed on each other it pays tribute to barasch by expanding the base of understanding and insight he has erected it should be of interest to students of religion and of art history

encapsulating as it does research that has been undertaken on the sociological anthropological and political aspects of the history of ancient israel this important book is designed to follow in the tradition of works in the series sponsored by the society for old testament study which began with the publication of the people and the book in 1925 the world of ancient israel is especially concerned to explore in greater depth than comparable studies the areas and degrees of overlap between approaches to the subject of old testament research adopted by scholars and students of theology and the social sciences increasing numbers of scholars have recognised the valuable insights that can be gained from a cross disciplinary approach and it is becoming clear that the early biblical traditions about the formation of the israelite state must be examined in the light of comparative anthropology if useful historical conclusions are to be drawn from them
