in July 2011 South Sudan was granted independence and became the world's newest country yet just two and a half years after this momentous decision the country was in the grips of renewed civil war and political strife. Hilde F. Johnson served as special representative of the secretary general and head of the United Nations mission in the Republic of South Sudan from July 2011 until July 2014 and as such she was witness to the many challenges which the country faced as it struggled to adjust to its new autonomous state. In this book she provides an unparalleled insider's account of South Sudan's descent from the ecstatic celebrations of July 2011 to the outbreak of the disastrous conflict in December 2013 and the early bloody phase of the fighting. Johnson's frequent personal and private contacts at the highest levels of government accompanied by her deep knowledge of the country and its history make this a unique eyewitness account of the turbulent first three years of the world's newest and yet most fragile country.

The conflict in Ukraine and Russia's annexation of Crimea has undoubtedly been a pivotal moment for policy makers and military planners in Europe and beyond. Many analysts see an unexpected character in the conflict and expect negative reverberations and a long-lasting period of turbulence and uncertainty. The delegitimation of international institutions and a declining role for global norms and rules: did these events bring substantial correctives and modifications to the extant conceptualization of international relations? Does the conflict significantly alter previous assumptions and foster a new academic vocabulary, or does it confirm the validity of well-established schools of thought in international relations? Has the crisis in Ukraine confirmed the vitality and academic vigour of conventional concepts? These questions are the starting points for this book, covering conceptualisations from rationalist to reflectivist and from quantitative to qualitative. Most contributors agree that many of the old concepts such as multi-polarity, spheres of influence, sovereignty, or even containment are still cognitively valid yet believe the eruption of the crisis means that they are now used in different contexts and thus infused with different meanings. It is these multiple conceptual languages that the volume puts at the centre of its analysis. This text will be of great interest to students and scholars studying international relations, politics, and Russian and Ukrainian studies.

Global growth is projected to slow significantly in the second half of this year with weakness continuing in 2024. Inflation pressures persist and tight monetary policy is expected to weigh substantially on activity. The possibility of more widespread bank turmoil and tighter monetary policy could result in even weaker global growth. Rising borrowing costs in advanced economies could lead to financial dislocations in the more vulnerable emerging market and developing economies. EMDEs in low-income countries in particular face precarious positions. Comprehensive policy action is needed at the global and national levels to foster macroeconomic and financial stability among many EMDEs and especially in low-income countries. Bolstering fiscal sustainability will require generating higher revenues, making spending more efficient and

improving debt management practices continued international cooperation is also necessary to tackle climate change support populations affected by crises and hunger and provide debt relief where needed in the longer term reversing a projected decline in emde potential growth will require reforms to bolster physical and human capital and labor supply growth
