Business Solutions on Demand 2005

it argues convincingly that companies should look at what solutions they can provide consumers with rather than looking at what products they can foist upon them this is an effective guide to delivering real value to the customer through genuine innovative thinking the marketer one of the most successful business solutions tomes ever published pcp plus business based partly on ibm s own transformation and partly on the transformations that ibm has helped its clients to achieve this ground breaking book shows how companies can increase sales and improve margins by introducing a range of solutions highly readable motivational and fast paced business solutions on demand is packed with examples from many diverse industries the authors emphasize that for today s business to compete and survive it has to exceed the expectations of its customers technological advancement globalization increased competition market saturation and easy access to information are all conspiring to make traditional business models redundant

Shelby Foote and the Art of History 2004

panabaker examines several key influences on foote s development as a writer and historian from his upbringing in the progressive southern town of greenville mississippi and his relationship with william alexander percy to the inescapable shadow of faulkner jacket

Teaching Geographic Information Science and Technology in Higher Education 2011-11-29

geographic information science and technology gisc t has been at the forefront of education innovation in geography and allied sciences for two decades teaching geographic information science and technology in higher education is an invaluable reference for educators and researchers working in gisc t providing coverage of the latest innovations in the field and discussion of what the future holds for gi science education in the years to come this book clearly documents teaching innovations and takes stock of lessons learned from experience in the discipline the content will be of interest both to educators and researchers working in gisc t and to educators in other related fields more importantly this book also anticipates some of the opportunities and challenges in gi science and technology education that may arise in the next decade as such it will be of interest to chairs deans administrators faculty in other subfields and educators in general innovative book taking a look at recent innovations and teaching developments in the course provision of gi science and technology in higher education edited by leaders in the field of gisc t who have been at the forefront of education innovation in gi science and allied science subjects provides coverage of gisc technology in a range of institutional settings from an international perspective at all levels of higher education an invaluable text for all educators within the field of gisc t and allied subjects with advice from experts in the field on best practice includes coverage and practical advice on curriculum design teaching with gis technology distance and elearning with global examples from leading academics in the field

Shaping the IT Organization – The Impact of Outsourcing and the New Business Model 2006-04-20

more and more the shape of the it organization is critical to business systems delivery yet all too often this definition is approached in a haphazard fashion often based on old theory and out dated experiences rather than being moulded to the realities of the world in which we work shaping the it organization considers how one should go about the moulding of an it function in order to ensure effective output from the resources within that organization it focuses on understanding precisely the elements and challenges within such a definition key topics covered what is an organization issues and key considerations for it from an organizational perspective including the idea of the organization lifecycle and the very real impact this can have within the it environment why change the impact of generic business approaches demanded by current business models and pressures solutions vs products the it organizational impact of moving from a product based to a solutions based business model outsourcing the increasing trend to place critical elements of it s delivery capability outside the core business means that it functions are often poorly aligned to both manage these relationships and rise to the challenges that outsourcing offers resource management fundamental questions about people and the need to adapt resource management approaches to take a radical approach to how we both manage and empower the people within those models in order to deliver what is required

Applications of Fracture Mechanics to Reinforced Concrete 2018-10-08

emphasises the most recent advances in fracture mechanics as specifically applied to steel bar reinforced concrete extensive expert opinions in four selected areas size effects anchorage and bond minimum reinforcement for elements in flexure and shear resistance logically addresses themes and demonstrate the unique ability of fracture mechanics to capture all the experimentally observed characteristics

Resilience in Energy, Infrastructure, and Natural Resources Law 2022-03-11

the number of severe and sometimes catastrophic disruptive events has been rapidly increasing extreme weather events including floods wildfires hurricanes and other natural disasters have become both more frequent and more severe whilst events such as the covid 19 pandemic represent a global threat to public health with huge economic effects that recovery packages tried to address these disruptive events alone and in combination have dramatic consequences on nature human life and the economy calling for urgent action to mitigate their causes and adapt to their impacts in response to discourses of collapsology and end of growth theories this monograph offers an analytical approach to developing legal responses that can help ensure the needs of present and future generations can be met through energy systems infrastructure development and natural resources management in these times of disruption resilience is therefore seen as a common framework for the interpretation and development of energy infrastructure and natural resources law with a mix of thematic chapters and case studies from multiple jurisdictions resilience in energy infrastructure and natural resources law maps and assesses legal responses to disruptive nature based events and examines possible legal pathways for more sustainable outcomes based on its engagement with this concept of resilience and social ecological thinking

The Real Problem Solvers 2012-11-28

today social entrepreneurship describes a host of new initiatives and often refers to approaches that are breaking from traditional philanthropic and charitable organizational behavior nowhere is this more true than in the united states where from 1995 2005 the number of non profit organizations registered with the irs grew by 53 but what types of change have these social entrepreneurial efforts brought to the world of civil society and philanthropy what works in today s environment and what barriers are these new efforts breaking down as they endeavor to make the world a better place the real problem solvers brings together leading entrepreneurs funders investors thinkers and champions in the field to answer these questions from their own first person perspectives contributors include marquee figures such as nobel laureate muhammad yunus ashoka founder bill drayton jacqueline novogratz founder of the acumen fund and sally osberg ceo of the skoll foundation the core chapters are anchored by an introduction a conclusion and question and answers sections that weave together the voices of various contributors in no other book are so many leaders presented side by side therefore this is the ideal accessible and personal introduction for students of and newcomers to social entrepreneurship

The Bona Fide Investor 2021-12-03

international arbitration law library volume 63 iall 63 many corporations engage in treaty shopping or nationality planning to procure investment treaty protection by attainment of a nationality of convenience this book is the first in depth exploration of a substantive legal basis by which to assess the bona fides of a corporate investor s identity in a convenient jurisdiction i e examination of the purpose for which a corporate exists in the ownership structure of the relevant investment in a comprehensive review of the concept of treaty shopping the author examines the degree to which manipulation of corporate nationality is consistent with the objects and purposes of the investment treaty regime and analyses its effect on the legitimacy of investor state dispute mechanisms to evaluate a substantive test for a bona fide investor the book looks to analogous areas of international law such as the law of diplomatic protection and double tax treaties and reviews in detail the relevance in investment treaty law of such pertinent issues and topics as the following the concept of separate legal personality abuse of the corporate form at municipal law the role of article 25 of the icsid convention the approach to the nationality of natural persons the approach to the jurisdictional concept of an investment criteria used to connote corporate nationality the concept of the commercial purpose of the corporate investor claimant the concept and limits of the principle of abuse of right at international law and the application of and the relationship between the four tenets of article 31 1 of the vienna convention ordinary meaning good faith context and object and purpose the effectiveness of substantive criteria presently used to mitigate illegitimate or undesirable treaty shopping are examined and compared with the purpose to exist test and the prospective legal mechanisms that may be utilised to implement a substantive approach are canvassed in detail this incomparable book brings coherence and indeed a solution to the debate about the attribution and use of nationality by corporations in the field of investment treaty law it is a giant step towards legal certainty as to the need for and the means by which limits can be placed on investment treaty jurisdiction for corporate entities it will be of immense interest to practitioners who advise on jurisdictional issues for clients whether states or investors and debate jurisdictional concepts and corporate nationality issues before international tribunals it will also be a useful resource and a challenge to arbitrators regarding the extent to which investment treaty tribunals tolerate manipulation of corporate nationality and circumscribe jurisdiction to protect the legitimacy of the investment treaty system

expanding on the editors award winning article evolving to a new dominant logic for marketing this book presents a challenging new paradigm for the marketing discipline this new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing it moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process the editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary the result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice

The Service-Dominant Logic of Marketing 2014-12-18

in economic downturns the marketing budget is often the first to get slashed why because many ceos believe that marketing is unable to deliver results where it counts the bottom line nirmalya kumar argues that marketing s future depends on altering its function and mindset to address the burning questions ceos care about most kumar who counsels top executives at multinational corporations challenges marketers to change their role from tactical implementers of traditional marketing functions like advertising and promotion to strategic coordinators of organization wide transformational initiatives aimed at profitably delivering value to customers kumar outlines seven strategy focused cross functional and bottom line oriented initiatives that can put marketing back on the ceo s agenda and elevate its role in shaping the destiny of the firm

Marketing As Strategy 2004-05-05

this volume explores the changing nature of community in modern corporations community within and between firms the fabric of trust so essential to contemporary business has long been based on loyalty this loyalty has been largely destroyed by three decades of economic turbulence downsizing and restructuring yet community is more important than ever in an increasingly complex knowledge intensive economy the thesis of this volume is that a new form of community is slowly emerging one that is more flexible and wider in scope than the community of loyalty and that transcends the limitations of both traditional gemeinschaft and modern gesellschaft we call this form collaborative community the trend towards collaborative community is difficult to detect amidst the ferocious forces of market and bureaucratic rationalization but close analysis of some of america s most successful corporations reveals three dimensions of the emerging form a shared ethic of interdependent contribution distinct from the uneasy mix of loyalty and individualism that prevailed for so long a formalized set of norms of interdependent process management that include iterative co design metaphoric search and systematic mutual understanding distinct from both rigid authority hierarchies and informal log rolling an interdependent social identity that supports these

organizational features distinct from both dependent traditionalistic identities and the independence of the autonomous self that is often associated with western culture this volume is a collaborative effort of leading scholars in organization studies to delineate the new form of community and the forces encouraging and constraining its growth the contributors combine sociology and psychology theory with detailed analysis of business cases at the firm and inter firm level

in the most advanced service economies services create up to three quarters of the wealth and 85 of employment and yet we know relatively little about managing innovation in this sector the critical role of services in the broadest sense has long been recognized but is still not well understood most research and management prescriptions have been based on the experience of manufacturing and high technology sectors there is a clear need to distinguish which if any of what we know about managing innovation in manufacturing is applicable to services what must be adapted and what is distinct and different such is the goal of this book this unique collection brings together the latest academic research and management practice on innovation in services and identifies a range of successful organizational responses to current technological opportunities and market imperatives the contributors include leading researchers consultants and practitioners in the field who provide rigorous yet practical insights into managing and organizing innovation in services two themes help to integrate the contributions in this book oco that generic good practices exist in the management and organization of innovation in services which the authors seek to identify but that these must be adapted to different contexts specifically the scale and complexity of the tasks the degree of customization of the offerings and the uncertainty of the environment oco that innovation in services is much more than the application of information technology it in fact the disappointing returns to it investments in services have resulted in a widespread debate about the causes and potential solutions oco the so called oc productivity paradoxoco in services instead here the authors adopt a broader notion of innovation including technological organizational and market change the key is to match the configuration of organization and technology to the specific market environment sample chapter s introduction 35 kb chapter 1 managing service innovation variations of best practice 490 kb contents conceptual and analytical frameworks for service innovation services and the knowledge based economy i miles service innovation aiming to win t clayton sector and national studies of innovation in services innovation in healthcare delivery d j bower product development in financial services picking the right leader for success e chortatsiani applying innovation management good practice to services a composite framework of product development and delivery effectiveness in services f m hull j tidd product development in service enterprises case studies of good practice f m hull and other articles readership graduate students and researchers in management programs managers

knowledge integration the purposeful combination of specialized and complementary knowledge to achieve specific tasks is becoming increasingly important for organizations facing rapidly changing institutional environments globalized markets and fast paced technological developments the need for knowledge integration is driven by knowledge specialization and its geographic and organizational distribution in the global economy the increasing complexity and relevance of the knowledge integration problem is apparent in emerging new fields of research such as open innovation or the merging of existing ones e g organizational learning and strategy in global competition the successful management of knowledge integration underpins firms ability to innovate generate profit grow and ultimately survive this book provides conceptual contributions as well as empirical studies that examine knowledge integration essentially as a boundary problem knowledge integration becomes a problem when boundaries between knowledge fields and the institutions that preside over those fields are not clear or become fluid and contestable this fluidity and the competitive pressures this fluidity generates are persistent and permanent features of the world we live in this book put forward a consistent set of ideas methods and tools useful to interpret analyze and act upon the processes of knowledge integration across boundaries
