this book presents the background that led to kosovo s success in separating

from serbia and explains the reasons for its failure to achieve uncontested statehood both internally and externally it sheds light to the process of kosovo s secession starting from its first unsuccessful attempt to secede in 1991 and continuing to the present day it shows how long and at the same time how lucky its secession was kosovo was eventually at the right place and the right time being geographically located in europe and having secured the support of the us at the time of its absolute supremacy in the international affairs however as this supremacy declined kosovo s progress in international affairs declined too ten years after its unilateral declaration of independence it has yet to achieve un membership and uncontested statehood and kosovo also faces shortcomings in its internal function as a state this book provides a holistic approach towards kosovo s secession from an international relations point of view it takes into consideration events that happened in different times and different places and shows that secession is not merely an act that takes place in one specific time and place it is rather a process that spans over time and events at different levels of analysis shape its outcome
