upsc mains solved previous papers general studies paper 1 2 3 4 2013 onwards the united nations arms trade treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by states parties there exists controversy as to the meaning of certain key provisions furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function the arms trade treaty a commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms as states ratify and implement the treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions this volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the arms trade treaty regulates it covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors ontology began life in ancient times as a fundamental part of philosophical enquiry concerned with the analysis and categorisation of what exists in recent years the subject has taken a practical turn with the advent of complex computerised information systems which are reliant on robust and coherent representations of their subject matter the systematisation and elaboration of such representations and their associated reasoning techniques constitute the modern discipline of formal ontology which is now being applied to such diverse domains as artificial intelligence computational linguistics bioinformatics gis knowledge engineering information retrieval and the semantic researchers in all these areas are becoming increasingly aware of the need for serious engagement with ontology understood as a general theory of the types of entities and relations making up their respective domains of enquiry to provide a solid foundation for their work the conference series formal ontology in information systems fois provides a meeting point for researchers from these and other disciplines with an interest in formal ontology where both theoretical issues and concrete applications can be explored in a spirit of genuine interdisciplinarity this volume contains the proceedings of the sixth fois conference held in toronto canada during 11 14 may 2010 including invited talks by francis jeffrey pelletier john bateman and alan rector and the 28 peer reviewed submissions selected for presentation at the conference ranging from foundational issues to more application oriented topics ios press is an international science technical and medical publisher of high quality books for academics scientists and professionals in all fields some of the areas we publish in biomedicine oncology artificial intelligence databases and information systems maritime engineering nanotechnology geoenvironmental all aspects of physics e governance e commerce the knowledge economy urban studies arms control understanding and responding to terrorism medical informatics computer sciences this book addresses how core notions of information structure topic focus and contrast are expressed in syntax the authors propose that the syntactic effects of information structure come about as a result of mapping rules that are flexible enough to allow topics and foci to be expressed in a variety of positions but strict enough to capture certain cross linguistic generalisations about their distribution in particular the papers argue that only contrastive topics and contrastive foci undergo movement and that this is because such movement has the function of marking the scope of contrast several predications are derived from this proposal such as that a focus cannot move across a topic whether the latter is in situ or not syntactic and semantic evidence in support of this proposal is presented from a wide range of languages including dutch english japanese korean and russian and theoretical consequences explored the first chapter not only outlines its theoretical aims but also provides an introduction to information structure as a consequence the book is accessible to advanced students as well as professional linguists this is the latest updated edition of the university of cambridge s official statutes and ordinances software has become an essential enabler for science and the economy not only does it create new markets and the possibility of a more reliable flexible and robust society it also empowers our exploration of the world in ever increasing depth however software often falls short of our expectations with current methodologies tools and techniques remaining insufficiently robust and reliable for constantly changing and evolving needs this book

presents papers from the 15th international conference on new trends in intelligent software methodology tools and techniques somet 16 held in larnaca cyprus in september 2016 the somet conference focuses on exploring the innovations controversies and challenges facing the software engineering community bringing together theory and experience to propose and evaluate solutions to software engineering problems with an emphasis on human centric software methodologies end user development techniques and emotional reasoning for an optimally harmonized performance between the design tool and the user the book is divided into six chapters covering the following areas decision support systems software methodologies and tools requirement engineering software for biomedicine and bioinformatics software engineering models and formal techniques for software representation and intelligent software development and social networking the book explores new trends and theories which illuminate the direction of developments in the field and will be of interest to all in the software science community the 2009 10 volume of the formal governing regulations of the university of cambridge annually updated traditional contracting is primarily transactional rewarding contractors when deliveries are made or certain process milestones are met performance based logistic pbl contracting seeks to base contractor incentives on ongoing performance measures to achieve reliability and cost savings key to the success of these arrangements are the incentives that align the interests of the customer and the vendor this report describes the incentives used in pbl contracts identifies best practices and provides recommendations for effective incentives going forward the study team interviewed pbl practitioners including defense unique contractors defense commercial contractors and experts who are knowledgeable in the government perspective in the united states and abroad the team supplemented these interviews by analyzing a pbl dataset of u s department of defense contracts of the four identified categories of incentives time based financial scope and other interviews found that time based incentives stood out for their reliable appeal and relative underuse in the united states this is the latest updated edition of the university of cambridge s official statutes and ordinances the first comprehensive history of nato in the 1960s based on the systematic use of multinational archival evidence this new book is the result of a gathering of leading cold war historians from both sides of the atlantic including jeremi suri erin mahan and leopoldo nuti it shows in great detail how the transformation of nato since 1991 has opened up new perspectives on the alliance s evolution during the cold war viewed in retrospect the 1960s were instrumental to the strengthening of nato s political clout which proved to be decisive in winning the cold war even more so than nato s defense and deterrence capabilities in addition it shows that nato increasingly served as a hub for state institutional transnational and individual actors in that decade contributions to the book highlight the importance of nato s ability to generate soft power the scope and limits of alliance consultation the important role of common transatlantic values and the growing influence of small allies nato s survival in the crucial 1960s provides valuable lessons for the current bargaining on the purpose and cohesion of the alliance this book will be of much interest to students of international history cold war studies and strategic studies this book describes the fundamental scientific principles underlying high quality instrumentation used for environmental measurements it discusses a wide range of in situ sensors employed in practical environmental monitoring and in particular those used in surface based measurement systems it also considers the use of weather balloons to provide a wealth of upper atmosphere data to illustrate the technologies in use it includes many examples of real atmospheric measurements in typical and unusual circumstances with a discussion of the electronic signal conditioning data acquisition considerations and data processing principles necessary for reliable measurements this also allows the long history of atmospheric measurements to be placed in the context of the requirements of modern climate science by building the physical science appreciation of the instrumental record and looking forward to new and emerging sensor and recording technologies 32 ugc net previous papers teaching research aptitude paper 1 keywords kvs madaan 01 ugc net economics previous papers 02 ugc net
