ACL Injury and Its Treatment 2016-06-30 this volume presents detailed information on surgically relevant anatomy and histology of the anterior cruciate ligament acl biomechanics diagnostics and acl reconstruction in light of the growing body of evidence demonstrating the advantages of anatomic acl reconstruction over traditional methods there are also discussions of single anteromedial bundle reconstruction and anatomic acl reconstruction with abundant descriptions of experimental and clinical studies in addition particular attention is given not only to techniques such as acl augmentation bone patella tendon bone reconstruction and computer assisted navigation but it also presents expert analysis of revision of acl reconstruction complications and the future perspectives of acl reconstruction edited by authoritative orthopedic surgeon from the japanese orthopaedic society of knee arthroscopy and sports medicine joskas this book provides up to date information for orthopedic surgeons and physical therapists specializing in the acl the research evidence will broaden readers understanding and enable them to optimize outcomes for patients as acl rupture is a common injury especially for high level athletes it will also attract sports trainers and team physicians who are interested in a recent update on this field

Bitterroot National Forest (N.F.), Bass Lake Dam Reconstruction 1995 first published in 2005 the author s intention was to write a history of the greatest economic boom in european history of that unique ugly and triumphant experience of the 1950s and 1960s which changed so utterly the scope of human existence and expectations as well as the consciousness of the people of western europe but it became clear that this extraordinary boom had one other attribute as unique as the remarkable length of time over which the growth of output incomes and wealth lasted

The Reconstruction of Western Europe 1945-1951 2013-11-05 first published in 2005 routledge is an imprint of taylor francis an informa company

The Financial Reconstruction of Austria 1926 the science of crash reconstruction enables engineers to determine the most probable scenario for how and why traffic collisions occur ongoing research has continually enhanced crash reconstructionists knowledge of the application of physical laws in this field crash reconstruction research 20 years of progress 1988 2007 features 47 papers that have presented significant steps forward focusing on the following areas within the field of crash reconstruction that have experienced major advances planar impact mechanics stiffness modeling crash pulse analysis structural restitution lateral deformation and override underride bev v delta v rear and side impacts pole impacts uncertainty analysis pedestrian crashes braking performance

The Reconstruction of Western Europe 1945-51 2005-11-03 examining the southern memory of reconstruction in all its forms is an essential element in understanding the society and politics of the twentieth century south

Crash Reconstruction Research 2008-03-17 this book provides the reader with the best available evidence on the most pressing issues relating to reconstruction of the anterior cruciate ligament acl with the goal of supporting surgical reconstruction of the acl and improving outcomes for patients key topics for which evidence based information is presented include selection of graft material and source the use of different surgical techniques graft rupture in relation to surgical technique and progression to osteoarthritis the book will aid the surgeon in making decisions with respect to fixation devices and tensioning the bundles to be reconstructed and whether to preserve remnants or partial bundle ruptures an evidence based stance is taken on evolving topics such as the anatomy of the tibial insertion site of the acl and the role of the anterolateral capsule and posteromedial corner in high grade rotatory instability furthermore novel technical developments for measurement of knee laxity and soft tissue navigation are discussed the reader will also find useful information on general issues concerning physical examination arthroscopic setup timing of reconstruction anesthesia and anticoagulation

What Reconstruction Meant 2007 woodworth compiles and presents brief biographies of individuals important to the civil war and reconstruction era relying on biographical detail and historical correspondence to give a humanistic perspective to the age

Controversies in the Technical Aspects of ACL Reconstruction 2017-03-21 written on the occasion of the 50th anniversary of the publication of piero sraffa's production of commodities by means of commodities the papers selected and contained in sraffa and the reconstruction of economic theory account for the work completed around the two central aspects of his contribution to economic analysis namely the criticism of the neoclassical or marginalist theory of value and distribution and the reconstruction of economic theory along the lines of the classical approach divided into three volumes sraffa and the reconstruction of economic theory debates the most fruitful routes for advancement in this field and their implications for applied and policy analysis this second volume focuses on the theory of output and growth as developed in the modern classical approach on the basis of the extension to the long run of the keynesian principle of effective demand and on the implications of the revival of the classical approach for policy analysis and for understanding the evolution of the international economic order in the last few decades

Death Valley National Park, Reconstruction of the Furnace Creek Water Collection System 2005 this book contains a selection of communications presented at the third international meeting on fully three dimensional image reconstruction in radiology and nuclear medicine held 4-6 july 1995 at domaine d aix marlioz aix les bains france this nice resort provided an inspiring environment to hold discussions and presentations on new and developing issues roentgen discovered x ray radiation in 1895 and becquerel found natural radioactivity in 1896 a hundred years later this conference was focused on the applications of such radiations to explore the human body if the physics is now fully understood 3d imaging techniques based on ionising radiations are still progressing these techniques include 3d radiology 3d x ray computed tomography 3d ct single photon emission computed tomography spect positron emission tomography pet radiology is dedicated to morphological imaging using transmitted radiations from an external x ray source and nuclear medicine to functional imaging using radiations emitted from an internal radioactive tracer in both cases new 3d tomographic systems will tend to use 2d detectors in order to improve the radiation detection efficiency taking a set of 2d acquisitions around the patient 3d acquisitions are obtained then fully 3d image reconstruction algorithms are required to recover the 3d image of the body from these projection measurements

STH 131 and 33 Relocation/reconstruction, Rockton to Ontario, Vernon County 1999 winner of the 2016 esse junior scholar book award in literatures in the english language the literature of reconstruction argues for the term and concept of postmillennial reconstruction to fill the gap left by the decline of postmodernism and deconstruction as useful cultural and literary categories wolfgang funk shows how this notion emerges from the theoretical and philosophical development that led to the demise of postmodernism by relating it to the idea of authenticity immediate experience that eludes direct representation in addition he provides a clear formal framework with which to identify and classify the features of reconstructive literature by updating the narratological category of metafiction originally established in the 1980s based on werner wolf's observation of a metareferential turn in contemporary arts and media he illustrates how the specific use of metareference results in a renegotiation of the specific patterns of literary communication and claims that this renegotiation can be profitably described with the concept of reconstruction to substantiate this claim in the second half of the book funk discusses narrative texts that illustrate this transition from postmodern deconstruction to postmillennial reconstruction the analyses take in distinguished and prize winning writers such as dave eggers julian barnes jennifer egan and jasper fforde the broad scope of authors featuring writers from the us as well as the uk underlines the fact that the reconstructive tendencies and strategies funk diagnoses are of universal significance for the intellectual and cultural self image of the global north

Relocation/ Reconstruction of the US 222 and Construction of the Warren St Extension, Berks County 1997 on sunday 26 december 2004 a tsunami of up to 30 metres high hit the northern tip of sumatera in indonesia causing immediate destruction and the deaths of at least 130 000 in indonesia alone the scale of the devastation and ensuing human suffering prompted the biggest response endeavour to any natural disaster in history post disaster reconstruction will be the first major book that analyses the different perspectives and experiences of the enormous post tsunami reconstruction effort it looks specifically at the reconstruction efforts in aceh one of the regions most heavily hit by the tsunami and a province that has until recently suffered nearly three decades of armed conflict positioning the reconstruction efforts within aceh's multi layered historical cultural socio political and religious contexts the authors explore diverse experiences and assessments of the reconstruction it considers the importance of the political and religious settings of the reconstruction the roles of communities and local non government organisations and the challenges faced by indonesian and international agencies from the in depth examination of this important case study of disaster reconstruction significant not only because of the huge scale of the

natural disaster and response but also the post conflict issues the editors draw together the lessons learned for the future of aceh and make general recommendations for post disaster and post conflict reconstruction making

The Human Tradition in the Civil War and Reconstruction 2000 the best selling guide to mastectomy and reconstruction has been rewritten and updated this new second edition retains all the comprehensive information of the original issue along with new information about the latest implant and flap reconstruction procedures how to find a surgeon who specializes in these new techniques and much more no woman wants to lose her breasts but having a mastectomy doesn't have to mean living without them how do you find answers about mastectomy and reconstruction when you're still overwhelmed by your diagnosis and treatment how real will your new breasts look and feel what if you don't want implants how painful and how long is the process will your insurance cover all the costs what is recovery like the breast reconstruction guidebook has all the answers easy to read and easily understood the text explains mastectomy and demystifies reconstructive options readers will understand the benefits and risks of different procedures so they can determine which technique if any is right for them

Sraffa and the Reconstruction of Economic Theory: Volume Two 2013-12-17 the international community has donated nearly one trillion dollars during the last four decades to reconstruct post conflict countries and prevent the outbreak of more civil war yet reconstruction has eluded many of these countries and 19 million people have been killed in reignited conflict where did the money go this book documents how some leaders do bring about remarkable reconstruction of their countries using foreign aid but many other post conflict leaders fail to do so offering a global argument that is the first of its kind desha girod explains that post conflict leaders are more likely to invest aid in reconstruction when they are desperate for income and thus depend on aid that comes with reconstruction strings attached leaders are desperate for income when they lack access to rents from natural resources or to aid from donors with strategic interests in the country using data on civil wars that ended between 1970 and 2009 and evidence both from countries that succeeded and from countries that failed at post conflict reconstruction girod carefully examines the argument from different perspectives and finds support for it the findings are important for theory and policy because they explain why only some leaders have the political will to meet donor goals in the wake of civil war the findings also shed light on state building processes and on the political economy of postconflict countries paradoxically donors are most likely to achieve reconstruction goals in countries where they have the least at stake

Three-Dimensional Image Reconstruction in Radiology and Nuclear Medicine 2013-03-09 this book covers the restoration and reconstruction process and activities undertaken in japan in the first five years since the 2011 earthquake and tsunami a period widely considered to be the most intensive reconstruction phase within the 10 year restoration plan drawn up by the japanese government the respective chapters explore technical scientific social and non scientific policy related aspects including reconstruction and restoration policies infrastructure and designs for tsunami coastal defence resilient urban areas and affected communities housing and relocation schemes disaster mitigation and evacuation measures reactivation of the economy revitalization of fisheries and coastal agriculture and industry and tourism the book also illustrates some of the achievements and failures in a broad range of projects and initiatives intended to address the above mentioned issues making it particularly relevant for experts decision makers students and other interested scholars

Route 9A Reconstruction Project, Battery Place to 59th St., New York County 1994 this book written by leading international experts in the field offers a comprehensive overview of the latest developments in breast reconstruction a particular feature is the presentation of a multitude of new clinical techniques with high quality supporting illustrations the opening sections document the history of breast reconstruction describe the anatomy of the pectoral muscles pectoral nerves and perforator flaps and provide guidance on preoperative imaging and planning after full documentation of techniques including use of autogenous tissues and prosthetic implants further sections are devoted to the effects of chemotherapy and radiation the role of angiography and thermography monitoring quality of life outcomes and complications and their management the book will be invaluable both for residents and fellows and for practicing and highly experienced cosmetic surgeons plastic surgeons general surgeons and those in cosmetic surgical subspecialties

CO-7 (Forest Hwy 26) Reconstruction 1987 crime reconstruction is a guide to the interpretation of physical evidence it was developed to aid forensic reconstructionists with the formulation of

hypotheses and conclusions that stay within the known limits of forensic evidence the book begins with chapters on the history and ethics of crime reconstruction and then shifts to the more applied subjects of general reconstruction methods and practice standards it concludes with chapters on courtroom conduct and evidence admissibility to prepare forensic reconstructionists for what awaits them when they take the witness stand this book is a watershed collaborative effort by internationally known qualified and respected forensic science practitioners with generations of case experience forensic pioneers such as john d dehaan john i thornton and w jerry chisum contribute chapters on arson reconstruction trace evidence interpretation advanced bloodstain interpretation and reconstructionist ethics other chapters cover the subjects of shooting incident reconstruction interpreting digital evidence staged crime scenes and examiner bias rarely have so many forensic giants collaborated and never before have the natural limits of physical evidence been made so clear this book is ideal for forensic examiners forensic scientists crime lab personnel and special victim and criminal investigators others who will benefit from this book are law enforcement officials forensic medical personnel and criminal lawyers contains the first practice standards ever published for the reconstruction of crime provides a clear ethical canon for the reconstructionist includes groundbreaking discussions of examiner bias and observer effects as they impact forensic evidence interpretation ideal for applied courses on the subject of crime reconstruction as well as those teaching crime reconstruction theory within criminology and criminal justice programs

The Literature of Reconstruction 2015-09-24 the aim of this book is to establish a basis for resolving the various issues facing modern society by exploring the field of computational social science which fuses the social and natural sciences today society is threatened by problems concerning the environment population growth hunger and epidemics all of which could lead to the extinction of humankind however attempting to resolve these issues is extremely difficult because of the complex intertwined factors involved and because these issues are not just matters related to nature and the environment but also to society in this book we investigate this aporia of the social sciences with the help of big data which has gained considerable attention in recent years and techniques such as agent based simulation our aim is to resolve the complex system problems characteristic of the present age in this regard the book focuses on specific issues such as the reconstruction of public character in our social media saturated modern lifestyle the current state of social capital and the resultant social changes

Post-Disaster Reconstruction 2010 collision reconstruction methodologies volume 6a the last ten years have seen explosive growth in the technology available to the collision analyst changing the way reconstruction is practiced in fundamental ways the greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis the widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data create 3d models and visualize and analyze crash vehicles and environments the introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction because of the technological changes occurring in the industry many sae papers have been written to address the validation and use of new tools for collision reconstruction collision reconstruction methodologies volumes 1 12 bring together seminal sae technical papers surrounding advancements in the crash reconstruction field topics featured in the series include night vision study and photogrammetry vehicle event data recorders motorcycle heavy vehicle bicycle and pedestrian accident reconstruction the goal is to provide the latest technologies and methodologies being introduced into collision reconstruction appealing to crash analysts consultants and safety engineers alike

The Breast Reconstruction Guidebook 2005 accident reconstruction utilizes principles of physics and empirical data to analyze the physical electronic video audio and testimonial evidence from a crash to determine how and why the crash occurred how the crash could have been avoided or to determine whose description of the crash is most accurate this process draws together aspects of mathematics physics engineering materials science human factors and psychology and combines analytical models with empirical test data different types of crashes produce different types of evidence and call for different analysis methods still the basic philosophical approach of the reconstructionist is the same from crash type to crash type as are the physical principles that are brought to bear on the analysis this book covers a basic approach to accident reconstruction including the underlying physical principles that are used then details how this approach and the principles are applied when reconstructing motorcycle crashes this second edition of motorcycle accident reconstruction presents a thorough systematic and scientific overview of the available

methods for reconstructing motorcycle crashes this new edition contains additional theoretical models examples case studies and test data an updated bibliography incorporating the newest studies in the field expanded coverage of the braking capabilities of motorcyclists updated refined and expanded discussion of the decelerations of motorcycles sliding on the ground a thoroughly rewritten and expanded discussion of motorcycle impacts with passenger vehicles updated coefficients of restitution for collisions between motorcycles and cars a new and expanded discussion of using passenger car edr data in motorcycle accident reconstruction a new section covering recently published research on post collision frozen speedometer readings on motorcycles a new section on motorcycle interactions with potholes roadway deterioration and debris and expanded coverage of motorcycle falls this second edition of motorcycle accident reconstruction is a must have title for accident reconstructionists forensic engineers and all interested in understanding why and how motorcycle crashes occur

Green innovation and industrial ecosystem reconstruction in achieving environmental sustainability 2023-02-02 this key text brings together a team of leading contributors to address the complex issues of security reconciliation and reconstruction in post conflict societies security reconstruction and reconciliation is organized into four main sections the social political and economic dimensions of conflict the impact of conflict on women and children reconstruction and past human rights violations disarmament demobilization reintegration post war reconstruction and the building of a capable state and the

Explaining Post-Conflict Reconstruction 2015 there is an increasing interest in the influence of religious fundamentalism upon people s motivation identity and decision making leaving christian fundamentalism and the re construction of identity details the stories of those who have left christian fundamentalist churches and how they change after they have left it considers how the previous fundamentalist identity is shaped by aspects of church teaching and discipline that are less authoritarian and coercive and more subtle and widely spread throughout the church body that is individuals are understood as not only subject to a form of judgment but also exercise it with everyone seemingly complicit in maintaining the stability of the church organisation this book provocatively illustrates that the reasons for leaving an evangelical christian church may be less about what happens outside the church in terms of the lures and attractions of the secular world and more about the experience within the community itself

The 2011 Japan Earthquake and Tsunami: Reconstruction and Restoration 2017-07-12 most observers and historians rarely acknowledge the history of civil rights predating the twentieth century the book black rights in the reconstruction era pays significant scholarly attention to the intellectual ferment legal and political of the nineteenth century by tracing the history of black americans civil rights to the postbellum era by revisiting its faulty foundational history this book lends itself to show that after emancipation national and local struggles for racial equality had led to the encoding of racism in the political order in the american south and the proliferation of racism as an american institution vanessa holloway draws upon a host of historical legal and philosophical studies as well as legislative histories to construct a coherent theory of the law s relevance to the era questioning how the nexus of race and politics should be interpreted during reconstruction anchored in the reconstruction amendments supreme court decisions and landmark statutes of the 1860s and 1870s the black codes the freedmen s bureau the civil rights act of 1866 the reconstruction acts the enforcement acts and the civil rights act of 1875 black rights in the reconstruction era offers a new perspective on the political history of law between the years 1865 and 1877 it is predominant in the ongoing debates on social justice and racial inequality

Breast Reconstruction 2015-10-30 this investigation of v2 movement addresses the question which role the lexical content of the moved element plays during sentence processing it draws on original theoretical arguments empirical data and results from psycholinguistic experiments the main finding is that the lexical content of the v2 verb is interpreted only at the end of the clause i e at the base position of the finite verb

NYS-13 Reconstruction, Lansing to Cortlandville 1973 this collection of original essays and commentary considers not merely how history has shaped the continuing struggle for racial equality but also how backlash and resistance to racial reforms continue to dictate the state of race in america informed by a broad historical perspective this book focuses primarily on the promise of reconstruction and the long demise of that promise it traces the history of struggles for racial justice from the post us civil war reconstruction through the jim crow era the civil rights and voting

rights decades of the 1950s and 1960s to the present day

Crime Reconstruction 2006-10-27 over the past 25 years harold and darren franck have investigated hundreds of accidents involving vehicles of almost every shape size and type imaginable in mathematical methods for accident reconstruction a forensic engineering perspective these seasoned experts demonstrate the application of mathematics to modeling accident reconstructions
