the two volume set lncs 9172 and 9173 constitutes the refereed proceedings of the human interface and the management of information thematic track held as part of the 17th international conference on human computer interaction hci 2015 held in los angeles ca usa in august 2015 jointly with 15 other thematically similar conferences the total of 1462 papers and 246 posters presented at the hci 2015 conferences were carefully reviewed and selected from 4843 submissions these papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems the papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas this volume contains papers addressing the following major topics information visualization information presentation knowledge management haptic tactile and multimodal interaction service design and management user studies

Android 2011-03-16

energy consumption and its management have been clearly identified as a challenge in computing and communication system design where energy economy is obviously of paramount importance for battery powered devices this thesis addresses the energy efficiency of mobile communication at the user end in the context of cellular networks we argue that energy efficiency starts by energy awareness and propose energybox a parametrised tool that enables accurate and repeatable energy quantification at the user end using real data traffic traces as input energybox offers an abstraction of the underlying states for operation of the wireless interfaces and allows to estimate the energy consumption for different operator settings and device characteristics the tool is used throughout the thesis to quantify and reveal inefficient data communication patterns of widely used mobile applications we consider two different perspectives in the search of energy efficient solutions from the application perspective we show that systematically quantifying the energy consumption of design choices e g communication patterns protocols and data formats contributes to a significantly smaller energy footprint from the system perspective we devise a cross layer solution that schedules packet transmissions based on the knowledge of the network parameters that impact the energy consumption of the handset these attempts show that application level decisions require a better understanding of possible energy apportionment

Portable Design 2001

With the wide variety of devices touch points and channels in use your ability to control how people navigate your well crafted experiences is fading yet it is still important to understand where people are in their journey if you re to deliver the right content and interactions at the right time and on the right device this practical guide shows you how storytelling can make a powerful difference in product design author anna dahlström details the many ways you can use storytelling in your projects and throughout your organization by applying tried and tested principles from film and fiction to the context of design and business you ll learn to create great product experiences learn how the anatomy of a great story can make a difference in product design explore how traditional storytelling principles tools and methods relate to key product design aspects understand how purposeful storytelling helps tell the right story and move people into action use storytelling principles to tell sell and present your work

this book constitutes the refereed proceedings of the 19th australian joint conference on artificial intelligence ai 2006 held in hobart australia december 2006 coverage includes foundations and knowledge based system machine learning connectionist ai data mining intelligent agents cognition and user interface vision and image processing natural language processing and intelligence neural networks robotics and ai applications

KI 2003: Advances in Artificial Intelligence 2003-09-09

local area networks lans play a larger role in our lives today than ever before for example lans provide us with the capability to realize automated banking services with instant credit checking and numerous other diverse access and manipulation services users and developers of lan products must understand the architecture of the hardware and software mechanisms to effectively design and use such systems most gains in lan productivity will come from future software developments in systems management and applications this book provides an introduction to the technology associated with local area networks emphasizing software aspects which have been secondary considerations to hardware in most existing texts the book also provides a review of the technology needed to realize full service software products such as computer aided design and manufacturing systems large publication systems and integrated data service networks and includes an exhaustive review of the products available today

KI 2003: Advances in Artificial Intelligence 2003-09-09

this book constitutes the proceedings of the 14th international conference on engineering psychology and cognitive ergonomics epce 2018 held as part of the 20th international conference hci international 2018 which took place in las vegas nevada in july 2018 the total of 1171 papers and 160 posters included in the 30 hcii 2018 proceedings volumes was carefully reviewed and selected from 4346 submissions epce 2018 includes a total of 57 papers they were organized in topical sections named mental workload and human error situation awareness training and team working psychophysiological measures and assessment interaction cognition and emotion and cognition in aviation and space

Computerworld 1982-10-18

for more than 20 years network world has been the premier provider of information intelligence and insight for network and it executives responsible

for the digital nervous systems of large organizations readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce
