under the patronage of university of florence accademia dei geogofili tuscanly region and livorno province it is the occasion in which scholars can illustrate and exchange their activities and innovative proposals with common aims to promote actions to preserve coastal marine environment considering symposium interdisciplinary nature the scientific committee underlining this holistic view of nature decided to celebrate alexander von humboldt a nature scholar that proposed the organic and inorganic nature s aspects as a single system it represents a sign of continuity considering that in presence symposium could not be carried out due to the covid 19 pandemic restrictions subjects are related to coastal topics morphology flora and fauna energy production management and integrated protection geography and landscape cultural heritage and environmental assets legal and economic aspects drug history from the renaissance through the nineteenth century the long tradition of kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of kierkegaard research the large and ever increasing number of publications on kierkegaard in the languages of the world can be simply bewildering even for experienced scholars the present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications the volume is divided into two large sections part i which covers tomes i v is dedicated to individual bibliographies organized according to specific language this includes extensive bibliographies of works on kierkegaard in some 41 different languages part ii which covers tomes vi vii is dedicated to shorter individual bibliographies organized according to specific figures who are in some way relevant for kierkegaard the goal has been to create the most exhaustive bibliography of kierkegaard literature possible and thus the bibliography is not limited to any specific time period but instead spans the entire history of kierkegaard studies although kierkegaard s reception was initially more or less limited to scandinavia it has for a long time now been a highly international affair as his writings were translated into different languages his reputation spread and he became read more and more by people increasingly distant from his native denmark while in scandinavia the attack on the church in the last years of his life became something of a cause célèbre later many different aspects of his work became the object of serious scholarly investigation well beyond the original northern borders

as his reputation grew he was co opted by a number of different philosophical and religious movements in different contexts throughout the world the three tomes of this volume attempt to record the history of this reception according to national and linguistic categories tome ii covers the reception of kierkegaard in southern central and eastern europe the first set of articles under the rubric southern europe covers portugal spain and italy a number of common features were shared in these countries reception of kierkegaard including a catholic cultural context and a debt to the french reception the next rubric covers the rather heterogeneous group of countries designated here as central europe hungary the czech republic slovakia and poland these countries are loosely bound in a cultural sense by their former affiliation with the habsburg empire and in a religious sense by their shared catholicism finally the orthodox countries of eastern europe are represented with articles on russia bulgaria serbia and montenegro macedonia and romania the long tradition of kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of kierkegaard research the large and ever increasing number of publications on kierkegaard in the languages of the world can be simply bewildering even for experienced scholars the present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications the volume is divided into two large sections part i which covers tomes i v is dedicated to individual bibliographies organized according to specific language this includes extensive bibliographies of works on kierkegaard in some 41 different languages part ii which covers tomes vi vii is dedicated to shorter individual bibliographies organized according to specific figures who are in some way relevant for kierkegaard the goal has been to create the most exhaustive bibliography of kierkegaard literature possible and thus the bibliography is not limited to any specific time period but instead spans the entire history of kierkegaard studies the long tradition of kierkegaard studies has made it impossible for individual scholars to have a complete overview of the vast field of kierkegaard research the large and ever increasing number of publications on kierkegaard in the languages of the world can be simply bewildering even for experienced scholars the present work constitutes a systematic bibliography which aims to help students and researchers navigate the seemingly endless mass of publications the volume is divided into

two large sections part i which covers tomes i v is dedicated to individual bibliographies organized according to specific language this includes extensive bibliographies of works on kierkegaard in some 41 different languages part ii which covers tomes vi vii is dedicated to shorter individual bibliographies organized according to specific figures who are in some way relevant for kierkegaard the goal has been to create the most exhaustive bibliography of kierkegaard literature possible and thus the bibliography is not limited to any specific time period but instead spans the entire history of kierkegaard studies there can be no doubt that most of the thinkers who are usually associated with the existentialist tradition whatever their actual doctrines were in one way or another influenced by the writings of kierkegaard this influence is so great that it can be fairly stated that the existentialist movement was largely responsible for the major advance in kierkegaard s international reception that took place in the twentieth century in kierkegaard s writings one can find a rich array of concepts such as anxiety despair freedom sin the crowd and sickness that all came to be standard motifs in existentialist literature sartre played an important role in canonizing kierkegaard as one of the forerunners of existentialism however recent scholarship has been attentive to his ideological use of kierkegaard indeed sartre seemed to be exploiting kierkegaard for his own purposes and suspicions of misrepresentation and distortions have led recent commentators to go back and reexamine the complex relation between kierkegaard and the existentialist thinkers the articles in the present volume feature figures from the french german spanish and russian traditions of existentialism they examine the rich and varied use of kierkegaard by these later thinkers and most importantly they critically analyze his purported role in this famous intellectual movement an account of european knowledge of the natural world c 1500 1700 the philosophy discussed in this volume covers a period of three hundred and fifty years from the middle of the fourteenth century to the early years of the eighteenth century the birth of modern philosophy the chief topics are renaissance philosophy and seventeenth century rationalism in particular descartes spinoza and leibniz the volume does not deal with these movements exclusively but places them within a wider intellectual context it considers the scholastic thought with which renaissance philosophy interacted it also considers the thought of seventeenth century philosophers such as bacon hobbes and gassendi who were not

rationalists but whose thought elicited responses from the rationalists it considers too the important topic of the rise of modern science in the sixteenth and seventeenth centuries and its relations to the philosophy of the period this volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors it includes a glossary of technical terms and a chronological table of philosophical scientific and other cultural events

vol 1 life giotto 1334 is the first european artist about whom it is possible to write following the schema of life and work the situation of the sources however is complicated on giotto s life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism renaissance ideology cult of the artist on the other there is extensive documentary material from giotto s lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman resolutely climbing the social ladder the present volume focuses on this second aspect of the giotto figure s double life relating it to the form of existence of the pre modern artist

vol 2 works the paintings examined and contextualised in this volume are those secured for giotto through early written sources these sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while giotto was spiritually and intellectually formed in the sphere of the florentine dominicans his artistic path began in rome in the shadow of the curia the breakthrough to his own artistic concept came immediately before and during his work in padua in addition to prominent churchmen ecclesiastical institutions and the king of naples his clients were predominantly members of italy s urban and financial elites the adoption and further development of his inventions by other especially sienese painters pressured him in his later years to try new approaches again

vol 3 survival giotto is considered by many to be the founder of modern painting this thesis is discussed and modified in the present volume on an empirical basis what emerges is that giotto s impact cannot be reduced simply to the introduction of the study of nature rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences the new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of

great complexity outside the media of language and text which not only changed the face of european art but certainly contributed to the intellectual opening of western societies early modern naples has been characterized as a marginal wild and exotic place on the fringes of the european world and as such an appropriate target of attempts by catholic missionaries and others to civilize the city historiographically bypassed in favour of venice florence and rome naples is frequently seen as emblematic of the cultural and political decline in the italian peninsula and as epitomizing the problems of southern italy yet as this volume makes plain such views blind us to some of its most extraordinary qualities and limit our understanding not only of one of the world's great capital cities but also of the wider social cultural and political dynamics of early modern europe as the centre of spanish colonial power within europe during the vicerealty and with a population second only to paris in early modern europe naples is a city that deserves serious study further as a habsburg dominion it offers vital points of comparison with non european sites which were subject to european colonialism while european colonization outside europe has received intense scholarly attention its cultural impact and representation within europe remain under explored too much has been taken for granted too few questions have been posed in the sphere of the visual arts investigation reveals that neapolitan urbanism architecture painting and sculpture were of the highest quality during this period while differing significantly from those of other italian cities for long ignored or treated as the subaltern sister of rome this urban treasure house is only now receiving the attention from scholars that it has so long deserved this volume addresses the central paradoxes operating in early modern italian scholarship it seeks to illuminate both the historiographical pressures that have marginalized naples and to showcase important new developments in neapolitan cultural history and art history those developments showcased here include bot comparative criticism addresses itself to the questions of literary theory and criticism this new volume looks at the humanist tradition in the twentieth century and articles will include the book in the totalitarian context lorenzo valla and changing perceptions of renaissance humanism hitler's berlin civilisation and barbarism an anthropological approach walter pater to adrian stokes psychoanalysis and humanism art history and humanist tradition in the stefan george circle the winning entries in the 1999 2000 bcla bclt translation

competition are also published principles of sustainable development is the component of encyclopedia of development and economic sciences in the global encyclopedia of life support systems eolss which is an integrated compendium of twenty one encyclopedias sustainable development is a term of differing definitions standing alone the term is abstract and ambiguous the meaning most often cited is that adopted by the world commission on environment and development meeting today s true needs and opportunities without jeopardizing the integrity of the planetary life support base the environment and diminishing its ability to provide for needs opportunities and quality of life in the future this definition may serve as a general principle but for a guide to action its components sustainability and development must be given substance what is to be sustained and what developed is development essentially economic or material growth and is sustainability mostly a means to keep economic growth growing consequently should development represent means toward ecologically sustainable ends the concept of ecological sustainability has been advanced as a restriction on economic development it follows therefore that principles of sustainable development depend upon how the term is understood and how it is put into practice even so the definition of the world commission on environment and development given the adequate definition of variable needs provides the most reliable principle for testing the qualitative and ecological sustainability of development proposals the theme on principles of sustainable development in three volumes deals with the diversity of points of view on this complex subject these three volumes are aimed at the following five major target audiences university and college students educators professional practitioners research personnel and policy analysts managers and decision makers and ngos the six volume set lncs 10404 10409 constitutes the refereed proceedings of the 17th international conference on computational science and its applications iccsa 2017 held in trieste italy in july 2017 the 313 full papers and 12 short papers included in the 6 volume proceedings set were carefully reviewed and selected from 1052 submissions apart from the general tracks iccsa 2017 included 43 international workshops in various areas of computational sciences ranging from computational science technologies to specific areas of computational sciences such as computer graphics and virtual reality furthermore this year iccsa 2017 hosted the xiv

international workshop on quantum reactive scattering the program also featured 3 keynote speeches and 4 tutorials peace studies public policy and global security is a component of encyclopedia of social sciences and humanities in the global encyclopedia of life support systems eolss which is an integrated compendium of twenty one encyclopedias the theme on peace studies public policy and global security provides the essential aspects and a myriad of issues of great relevance to our world such as processes of peace and security international security peace development and environment security threats challenges vulnerability and risks sustainable food and water security world economic order this 11 volume set contains several chapters each of size 5000 30000 words with perspectives issues on peace studies public policy and global security these volumes are aimed at the following five major target audiences university and college students educators professional practitioners research personnel and policy analysts managers and decision makers and ngos this book presents the second volume of piola s original italian text together with the english language translation and comments showing convincingly that gabrio piola s work must still be regarded as a modern theory gabrio piola s work has had an enormous impact on the development of applied mathematics and continuum mechanics as such a committee of scientific experts took it upon themselves to translate his complete works in a second step they commented on piola s work and compared it to modern theories in mechanics in order to stress piola s impact on modern science and prove and confirm that he achieved significant milestones in applied mathematics more than 970 rare books dating from 1479 to 1830 and covering such categories as gardening herbals botanical books and landscape architecture are catalogued in this bibliography this title explores the breadth of philosophical interest in life and death during the early modern period it connects debates in philosophy with the life sciences linking the study of organisms to the practical aspect of philosophy and reminding us that philosophers were concerned with learning how to live and how to die a study of an important work by the italian writer vincenzo gramigna dedicated to the quarrel between the ancients and the moderns that tore the seventeenth century apart filippo salvatore teaches at concordia university guernica editions this volume covers opera in italy france england and the americas during the long nineteenth century 1789 1914 the book is divided into four sections that are

thematically rather than geographically conceived places essays centering on contexts for operatic culture genres and styles studies dealing with the question of how operas in this period were put together critical studies of individual works exemplifying particular critical trends and performance horticultural reviews presents state of the art reviews on topics in horticultural science and technology covering both basic and applied research topics covered include the horticulture of fruits vegetables nut crops and ornamentals these review articles written by world authorities bridge the gap between the specialized researcher and the broader community of horticultural scientists and teachers all contributions are anonymously reviewed and edited by professor jules janick of purdue university usa and published in the form of one or two volumes per year recently published articles include artificial pollination in tree crop production v34 cider apples and cider making techniques in europe and north america v34 garlic botany and horticulture v33 controlling biotic factors that cause postharvest losses of fresh market tomatoes v33 taxus spp botany horticulture and source of anti cancer compounds v32 the invasive plant debate a horticultural perspective v32 this re issue first published in 1964 is the first of a seminal series analysing the development of the study of landforms from both the geographical and geological point of view with especial emphasis upon fluvial geomorphology volume 1 treats the subject up to the first important statement of the cycle of erosion by w m davis in 1889 and attempts to identify the most significant currents of geomorphic thought integrating them into the broader contemporary intellectual frameworks with which they were associated as well as dealing with such key figures as werner de saussure hutton playfair buckland lyell agassiz ramsay dana peschel powell gilbert and davis attention is also given to many less important contributions by american british and continental workers a spirited biographical treatment attractively set off by contemporary portraits diagrams and sketches will make this book of great interest to the historian of science and indeed to the general reader as well as to the student and scholar in geomorphology hydrology and any other earth science

Southern, Central and Eastern Europe 2017-03-16

vol 1 life giotto 1334 is the first european artist about whom it is possible to write following the schema of life and work the situation of the sources however is complicated on giotto s life there are on the one hand biographical accounts from the mid fourteenth century onwards that responded to various ideological requirements patriotism humanism renaissance ideology cult of the artist on the other there is extensive documentary material from giotto s lifetime which seems to reflect less the biography of an artist than that of a bourgeois businessman

resolutely climbing the social ladder the present volume focuses on this second aspect of the giotto figure s double life relating it to the form of existence of the pre modern artist vol 2 works the paintings examined and contextualised in this volume are those secured for giotto through early written sources these sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while giotto was spiritually and intellectually formed in the sphere of the florentine dominicans his artistic path began in rome in the shadow of the curia the breakthrough to his own artistic concept came immediately before and during his work in padua in addition to prominent churchmen ecclesiastical institutions and the king of naples his clients were predominantly members of italy s urban and financial elites the adoption and further development of his inventions by other especially sienese painters pressured him in his later years to try new approaches again vol 3 survival giotto is considered by many to be the founder of modern painting this thesis is discussed and modified in the present volume on an empirical basis what emerges is that giotto s impact cannot be reduced simply to the introduction of the study of nature rather his art was involved in the development of pictorial idioms that were attuned to the skills and interests of their audiences the new approaches in his painting contributed in particular to the possibility of examining and communicating psychological narrative and allegorical content of great complexity outside the media of language and text which not only changed the face of european art but certainly contributed to the intellectual opening of western societies

Volume 19, Tome IV: Kierkegaard Bibliography *2017-03-16*

early modern naples has been characterized as a marginal wild and exotic place on the fringes of the european world and as such an appropriate target of attempts by catholic missionaries and others to civilize the city historiographically bypassed in favour of venice florence and rome naples is frequently seen as emblematic of the cultural and political decline in the italian peninsula and as epitomizing the problems of southern italy yet as this volume makes plain such views blind us to some of its most extraordinary qualities and limit our

understanding not only of one of the world's great capital cities but also of the wider social cultural and political dynamics of early modern Europe as the centre of Spanish colonial power within Europe during the viceroyalty and with a population second only to Paris in early modern Europe. Naples is a city that deserves serious study further as a Habsburg dominion it offers vital points of comparison with non-European sites which were subject to European colonialism while European colonization outside Europe has received intense scholarly attention its cultural impact and representation within Europe remain underexplored too much has been taken for granted too few questions have been posed in the sphere of the visual arts investigation reveals that Neapolitan urbanism architecture painting and sculpture were of the highest quality during this period while differing significantly from those of other Italian cities for long ignored or treated as the subaltern sister of Rome this urban treasure house is only now receiving the attention from scholars that it has so long deserved this volume addresses the central paradoxes operating in early modern Italian scholarship it seeks to illuminate both the historiographical pressures that have marginalized Naples and to showcase important new developments in Neapolitan cultural history and art history those developments showcased here include bot

Scienze della natura. Volume unico. Per le Scuole superiori 2017-07-14

this re issue first published in 1964 is the first of a seminal series analysing the development of the study of landforms from both the geographical and geological point of view with especial emphasis upon fluvial geomorphology volume 1 treats the subject up to the first

important statement of the cycle of erosion by w m davis in 1889 and attempts to identify the most significant currents of geomorphic thought integrating them into the broader contemporary intellectual frameworks with which they were associated as well as dealing with such key figures as werner de saussure hutton playfair buckland lyell agassiz ramsay dana peschel powell gilbert and davis attention is also given to many less important contributions by american british and continental workers a spirited biographical treatment attractively set off by contemporary portraits diagrams and sketches will make this book of great interest to the historian of science and indeed to the general reader as well as to the student and scholar in geomorphology hydrology and any other earth science
