Restructuring in the New EU Member States

2008

the eu is under stress many believe in the euro s demise because they blame it for the 2008 financial crisis and the unwelcome austerity measures many resent the immigrants from the new eu member states threatening the survival of the single european market many complain of a brussels diktat seeking an escape from joint eu decisions several member states want to unilaterally deal with the enhanced competition from the emerging markets especially china

undermining the eu's common commercial policy run by a single eu commissioner and many in the uk want its exit from the eu diluting eu unity and reducing its global influence these concerns are either misguided or require a stronger eu to deal with them this book aims to address these issues by considering the nature importance and future of the european union

the increasing importance attached to the economic and social cohesion of the european union since the 1980s and the role of competition policy in achieving this objective has special significance for the control of regional aids given the general ban on state aid regional aids are considered to have the potential to contribute to economic and social cohesion and to undermine its attainment the notion of competition policy as an instrument of economic and social cohesion has become a standard part of commission rhetoric in defence of its actions this

book is concerned with the influence of eu competition policy on the regional policies of the member states it focuses on how the european commission has interpreted the derogations from the state aid ban to enable the conduct of regional aid policies the book takes both a historical perspective tracing the evolution of policy and a thematic one examining in particular the relationship between eu competition and cohesion policies and the treatment of aid to very large projects the author clearly demonstrates that in reality the competition policy control of regional aids is of much longer standing than the community s explicit regional aid policy and in many respects of arguably greater influence she shows how competition policy has for almost thirty years shaped the design scope and implementation of national regional aid policies in no eu country has regional policy been unaffected by commission intervention in the name of competition policy moreover the policy principles developed for the eu now apply extraterritorially to members of the european economic area and to the current applicant countries the study s overall perspective is policy oriented it considers both the impact of commission intervention in the past and the implications of policy for the future especially in the context of enlargement and a wider europe it will be an invaluable resource for all policymakers and practitioners active in the fields of economic development regional policy and state aid law at european national and subnational levels

the establishment of banking union represents a major development in european economic

governance and european integration history more generally banking union is also significant because not all european union eu member states have joined which has increased the trend towards differentiated integration in the eu posing a major challenge to the eu as a whole and to the opt out countries this book is informed by two main empirical questions why was banking union presented by proponents as a crucial move to complete economic and monetary union emu proposed only in 2012 over twenty years after the adoption of the maastricht treaty why has a certain design for banking union been agreed and some elements of this design prioritized over others a two step explanation is articulated in this study first it explains why euro area member state governments moved to consider banking union by building on the concept of the financial trilemma and examining the implications of the single currency for euro area member state banking systems second it explains the design of banking union by examining the preferences of member state governments on the core components of banking union and developing a comparative political economy analysis focused on the configuration of national banking systems and varying national concern for the moral hazard facing banks and sovereigns created by euro level support mechanisms
