Covid-19 and Business Law 2021-09-07 harmonisation of law a term that refers to an effort to bring two different legal traditions in harmony with one another has developed a rather negative connotation over time when mentioned in the context of shari ah and common law harmonisation began to be looked at as an attempt by one legal system to impose its values on the other a major reason for that is the lack of understanding of the scope to which these two legal traditions converge one of the principal findings of this book is that shari ah and common law have many more commonalities than differences as a result the need for harmonisation between the two might have been exaggerated the similarities do not need to be harmonised rather they need to be acknowledged and appreciated if the differences between shari ah and common law which undoubtedly exist as evidenced in this book are approached from the position of appreciation for commonalities the ambiance to reconcile the differences would be more conducive to the harmonisation process which would in that case be reflective of compromise this book is intended to help readers better understand shari ah and common law and aid harmonization efforts when needed

From Corporate Social Responsibility to Corporate Social Liability 2021-05-20 this book provides a critical socio legal study that brings together the latest scholarly advances on corporate social responsibility and at the same time addresses the pressing issue of corporate liability for harmful acts across the supply and production chains corporations have seldom been held responsible and virtually never liable for the acts of their subsidiaries and subcontractors actors as different as workers investors individual consumers and shareholder activists claim that corporations should accept greater responsibility for communities and environments affected by their activities the book argues that a global value chain s head corporations remain immune to any liability because of the economically dependent legally independent relationships between core corporations and their periphery suppliers and subcontractors to tackle this problem globally the author acknowledges that we as a society need to reduce the economic dependence as described above which is far too excessive by ensuring a level playing field both economically and socially more concretely she argues that in order to realise transnational corporate liability we as lawyers need to find a way or ways to establish legally effective relationships between head corporations and their economically dependent entities readers of this book will be able to export the concept of corporate social liability developed in the context of value chains and apply it to other contexts involving corporate activities where they need to tackle unrestrained corporate freedom and make global businesses responsible and socially useful

Reconceptualising Corporate Compliance 2021-02-25 this book offers a comprehensive examination of the issues surrounding corporate compliance should corporations comply with the spirit or the letter of the law what role does compliance play in a capitalist market economy why is it that otherwise law abiding citizens are willing to implement corporate compliance strategies that are seemingly at odds with their personal values dr donovan responds to these questions and more providing a persuasive argument for the legitimate role of spirited compliance within a market economy in doing so she employs the lens of classical liberal ideology challenging the widespread view that technical compliance is simply capitalism in an examination that has relevance beyond the compliance arena the author also explores how the architecture of the firm facilitates the often atypical compliance decisions that individuals make when acting within a corporate setting the book draws on social psychology to offer important insights into how the often elusive goal of corporate behavioural change can be achieved for the benefit of both the market and society as a whole

Investment Law's Alibis 2022-08-04 once more we were delighted to take on the task of updating this text for its 14th edition having taken over editorial responsibilities from the late john adams from the 13th edition in our preface to the previous edition we recorded the sudden passing of professor adams sadly in this preface we must note another passing on 30 march 2018 patrick atiyah who wrote the 1st 8th editions of this book and continues to give the book its name passed away at the age of 87 patrick was one of those giants of academic contract law whose contributions continue to be read and to inspire scholars everywhere we are both mindful of our task to maintain the scholarly rigour which he gave to this book as we take it into the future this edition is also the first time since the 9th edition without a scottish editor professor hector macqueen had been responsible for adding scottish content since the 10th edition 2001 but decided that he would discontinue this role after the 13th editio n was published in 2016 we are very grateful for hector s contributions to the work on the advice of the book s publishers this edition has been put together without the benefit of a scottish editor although we have of course continued to take decisions from the scottish courts into account in updating the various chapters since the last edition was published there have been few major developments in the law on the sale of goods aside from the difficult ruling by the supreme court in pst energy 7 shipping llc v ow bunker malta ltd 2016 uksc 23 which arrived too late for proper consideration in the previous edition we have updated the text in light of recent cases and academic writings where appropriate furthermore we have continued our task of streamlining the running order of the chapters and we have sought to make gentle updates to the language of the book preserving its rigour but ensuring it remains accessible to a contemporary audience in some instances we have curtailed or removed altogether the detailed discussion of the pre 1994 case law which had become redundant as a result of the changes made to the sale of goods act at that time the rise of digital technology and new business models in the digital economy will invariably have an impact on the law concerning the sale of goods but at this point the real impact is not yet known in some places we have alluded to the possible significance of digital technology and this could well become a more
