## **Soccer Formation Masterclass: 9 Modern Formations with Training Sessions 2019-02-26**

this book takes an in depth look at nine of the most popular modern soccer formations used today each formation is explained in all the phases of the game and ready to use training sessions are provided for teaching the formations it does no good to teach defending shape in a low block if you ignore training defending in the middle and attacking thirds of the field if you teach attacking in the attacking third but neglect to teach the build up play from the back what are you really teaching if you are a ball possession oriented team the coach should understand that it takes between 15 25 passes to transition from building up the attack to complete attacking organization shape in the attacking 1 3 this means the team must be instructed on how the overall shape will change during the 15 25 pass build up and how the team shape will transition and change if the ball is lost the coach must teach the formation in all the phases of play the players should understand the formation the game model and their exact responsibility in all phases of play ultimately formations are simply starting points it is up to the coach to create the game model and tactics filling in all the blanks formations serve as the general structure like an artists blank canvas as the bulk of the work is yet to come the old saying the devil is in the details couldn t be more true especially when speaking about formations hopefully this book will provide you with some valuable ideas when it comes to coaching formations and you can take those ideas to become a more effective coach the major european soccer leagues used around 17 different formations in the 2017 2018 season the leagues with the widest variety of formations were the german bundesliga and the italian serie a using 15 different formations each the most conservative league was the french ligue 1 with just 9 formations used by far the most popular formations used were the 4 4 2 22 of all games 4 2 3 1 21 of all games and the 4 3 3 13 of all games a four person defense was featured in 75 of all formations while a three person defense was featured in 19 of formations

### ***Playing the Modern 3-5-2 Soccer Formation 2016-10-08***

the 3 5 2 is a very dynamic and flexible system it can be an ultra attacking formation or solid defensive formation depending on how it is deployed in attack the 3 5 2 is numerically strong in the midfield and comes with the benefit of two strikers creating width in the attack is never a problem with two wingers and strikers that could also run the channels the formation is naturally set up to encourage movement off the ball with the interchanging of positions when in possession the interchanging of positions and movement off the ball allows different players the opportunity to fill different spaces making the 3 5 2 more dynamic and difficult for the opponent to predict and deal with in the modern game i personally find many advantages to playing the 3 5 2 formation due to its fluid attacking potential and less focus on keeping numbers back the defensive side of the 3 5 2 presents the formations biggest challenges yet it can also be seen as a strength if the players understand how to form a back four or five in the correct situations with only three defenders in the back covering space in deep wide areas must be addressed and dealt with effectively in order to offset the possible defensive weakness that come with three players not being

able to cover the entire width of the field the coach must choose player personnel and more importantly the formations tactics wisely in this book i will cover multiple ways the 3 5 2 can be played to maximize its strengths while turning the formations possible negatives into positives when breaking down and analyzing any formation it is important to note that the difference between formations is about 10 yards in player positioning you can make an argument that most formations are similar and difficult to identify once the game has started the transition from defending to attacking and attacking to defending creates totally new shapes from the original formation the game of soccer is a free flowing game but inside that flow there must be a structure which drives individual and team decisions the coach is the one who will lay out the important tactical guidelines for the execution of the formation so it is important to note that the same formation can be carried out in many different ways depending on the coach tactics that will influence the way the formation played include things like setting a line of restraint establishing a line of confrontation identifying pressing zones outlining counter attacking areas realizing when to press or drop off addressing the overall style of soccer to be played player personnel work load location of the game weather conditions field conditions and much more all these factors will directly influence the way a formation is played

## ***Coaching the Modern 2-6-2 Soccer Formation 2017-09-24***

the game of soccer is perpetually in a constant state of change as new tactical trends appear each and every season some of the changes are adaptations and variations from the past while others are completely original if we roll back the clock to the first international friendly match ever played in 1872 you would have witnessed england playing a 1 2 7 formation against the scottish 2 2 6 soccer s early formations were built with few players in the back and many up top fast forward to the 1920 s and things began to change this is when the 3 2 2 3 w m formation made its debut introduced by herbert chapman at arsenal then jump ahead to the 1966 world cup as england played the first diamond 4 4 2 formation change continued to come in 1974 when the dutch coach rinus michels lined the team up in a 4 3 3 formation introducing the world to clockwork orange the 2000 s has been responsible for the emergence of the 4 2 3 1 formation along with the 4 6 0 false 9 introduced by the spanish however the question every top coach is constantly pursuing is what is the next major trend or change in the game we have already seen some signs of change with the inverted wingbacks of guardiola at manchester city and the deterioration of the classic back four even arsenal have changed to a 3 back system as we look at the history of soccer the changes in formations are pronounced the original formations have been compared to inverted or upside down pyramids with 7 attacking players up top and only 2 in the back as the game progressed the pyramid completely turned around as seen with the 4 2 3 1 formation which took on a realistic pyramid type of shape and now the shape appears to be changing again this book focuses on what very well may be one of the formations of the future the 2 6 2 formation we saw the 2 6 2 formation used when guardiola s bayern dismantled roma in a champions league match 7 1 argentina recently played a 2 3 4 1 in a friendly match against singapore the reality is that the modern game is seeing the pyramid shape turning more into a rhombus small on the bottom large in the middle and small on top

obviously simply talking about general shapes is an over simplification of formations but this type of rhombus idea seems to be where the formation trend is heading how many teams have switched to a 3 5 2 in the last 24 months many more than a few years ago that s for sure arsenal who rarely change anything went to 3 at the back last spring along with many others the new trend in formations also points to need for developing more intelligent players in order to effectively play with 2 3 players in the back an overloaded midfield and two forwards players must be excellent decision makers and possess high soccer iq s today s new formations demand players be smart and skillful while the older bunker in and counter attack systems 4 2 3 1 or 4 4 2 can more easily accommodate the simple disciplined and hard working player it s my opinion that the modern player must be technical creative smart have a high soccer iq and be an active problem solver as formations become more expansive and more dangerous they also become more vulnerable the player of the future must be a different breed they must possess a complete soccer brain
