

Free ebook The detection of ether ether aether home page .pdf

part 1 aether is the father of the universe and the all vivifying spirit of cosmic matter myths always speak to those who listen in kosmos there are three higher principles chthonia chaos Æther zeus and chronos time Æther is the spirit of cosmic matter represented by zeus osiris and other androgynous deities astral light is their shadow on earth fire is the unity of Æther in its universality but there are two kosmic fires and a distinction is made between them in the occult teachings Æther and hemera are the light of the superior and the light of the inferior or terrestrial regions Æther chaos akasha is deity the Æther of the greeks is the akasha of the hindus the ether of modern physics is one of Æther s subdivisions on our plane Æther and chaos plato s mind and matter are the two primeval and eternal principles of the universe utterly independent of anything else Æther is the all vivifying intellectual principle chaos a shapeless liquid principle without form or sense from the union of which two sprung into existence the universe the first androgynous deity the chaotic matter becoming its body and æther its soul chaos theos kosmos are aspects of the unknown space deity in the shape of Æther chaos akasha soul of the universe and noumenon of astral light pervades all things the theurgists called it the living fire and the spirit of light the science of physics and of metaphysics for that matter know nothing of Æther yet father Æther is re welcomed with open arms and wedded to gravitation Æther is the source and cause of all forces whether cohesive chemical thermal electric or magnetic Æther is septenary whether akasha is meant by the term or its lower principle ether akasha is the matrix of the universe and the mysterium magnum from which all that exists is born by separation or differentiation it is the cause of existence it fills the infinite space and is space itself in one sense but as the finite within the infinite this light must have its shadowy side the astral light which is no light individual human beings can overpower that fatal light but only by the holiness of their lives and by acts of kindness and brotherly love in buddhism there are no compulsory beliefs we are to believe only when the writing doctrine or teaching is corroborated by our own reason and consciousness but then we have to act accordingly and abundantly nihil is synonym for the impersonal divine principle the infinite all which is neither being nor thing it is the parabrahman of the vedantist the one life of the buddhist that of the chhandogya upanishad the ain soph of the kabbalah the absolute of hegel lord buddha taught that the primitive substance is eternal and unchangeable its vehicle is the pure luminous Æther boundless infinite space still a creation of maya mastery of buddhist dogmas can be attained only by following the platonic deductive method i e proceeding from universals to particulars in buddhist philosophy annihilation implies only a dispersion of matter in whatever form or semblance of form it may be even our astral bodies pure ether are but illusions of matter so long as they retain their terrestrial outline Æther is incorruptible the spirits of creatures who are emanations of the most sublimated portions of Æther are breaths not forms the body of jesus was abandoned to the earth while christos the inner man was clothed with a luminous body made up of Æther part 2 ether is the mother of differentiated matter vivified by the formless fire of aether when we recall pictures from the ether the returning current meeting the outgoing wave of crystallised sound takes it up by magnetic attraction and returns to us simultaneously the images of the past and the vibrations of its sounds each particle of matter is the register of all that has happened and previsionally apprehends even unspoken thought which once conceived displaces the particles of the brain by setting them in motion and scatters its ideas throughout the universe thus impressing them indelibly upon the eternal and boundless expanse of ether the divine intellect is veiled in man his animal brain alone philosophizes when astral light circulates in harmony with the divine spirit the occult powers of plants animals and minerals magically sympathize with the superior natures and the divine soul of man attunes with the inferior ones but during the barren periods the latter lose their magic sympathy and the spiritual sight of the majority of mankind is so blinded as to lose every notion of the innate powers of its divine lineage and essence spirit is the personal god of each mortal and his only divine element the dual soul on the contrary is semidivine i e potentially divine it is only when the human individuality soiled with earthly impurities overcomes separateness and identifies itself with the divine intelligence within that the aroma of personal experience can become immortal although invisible thought is a material force let the least cerebral motion reverberate in the ether of space and it will produce a disturbance reaching to infinity akasha is not the holy ghost because it would then be shekh nah m laprakriti akasha is the noumenon of the cosmic septenary whose soul is ether ether is the lining of akasha and akasha is the anima mundi and mother of kosmos akasha whose lowest form is the ether of space is entirely different from the medium of science

fire is the spirit of deity the active male generative principle and ether the soul of matter is the light of the fire the passive female principle from which everything in this universe emanated hence ether or water is mother and fire is father sound is the characteristic of akasha ether it generates air the property of which is touch and which by friction generates colour and light the ether of science is the grossest manifestation of akasha though on our plane it is the seventh principle of the astral light and three degrees higher than radiant matter when ether penetrates or informs something it may be molecular because it takes on the form of the latter and its atoms inform the particles of that something we may perhaps call matter crystallised ether there is no such things as light heat sound or electricity there is nothing but radiant energy due to one thing motion of ether modern science may divide its hypothetically conceived ether in as many ways as it likes the real ether of space i e Æther will remain as it is throughout ether is the vibrating sound board in nature in all of her seven differentiations where there was no ether there would be no sound the astral light or ether of space preserves the images of all beings and things on its sensitised waves an occult explanation of spirit photographs is that they are objective copies from subjective photographs impressed upon the ether and constantly thrown out by our thoughts words and deeds there exists an infinite ocean of ether in which all material substance floats and through which are transmitted all forces in the physical universe so long as spirit photography instead of being regarded a science is presented to the public as a new revelation from the god of israel and jacob the jury will go on deliberating much longer the mediumistic rapping is a correlation of vital force emitted from the person of the rapper with the potential energy of the ether cyprianus the reformed sorcerer of antioch confessed that he knew of the chaldæan division of ether into parts part 3 the seven cosmic elements with their numberless sub elements are modifications of one element there is but one element in nature and at its rootless root is deity the so called seven elements of which five have already manifested and asserted their existence are the fabric veiling deity father Æther has pre eminence over and is the synthesis of all elements chaos theos kosmos is unknown space producing the four primary elements which are known on the terrestrial plane as seven cosmic elements the attempt to derive god from the anglo saxon word good is an abandoned idea god is jod a phallic hook he may be the creator of physical man out of nothing but not the spark of divine intelligence that fell in order to make animal man divine the seven immortal gods who give birth and life to all are constantly forming matter under the never ceasing impulse of the one element the seven cosmic elements with their numberless sub elements are modifications and aspects of the one and only element four are entirely physical and the fifth ether semi material akasha of which ether is the grossest form is the fifth cosmic principle which corresponds to and from which unfolds the human manas the first four numbers in german are named after four elements but the ancients represented the world by five elements had they been ignorant of the heterogeneity of the elements they would have had no personifications of fire air water earth and Æther of the seven elements on our earth four are now fully manifested while the fifth ether is only partially so as we are hardly in the second half of the fourth round and consequently the fifth element will manifest fully only in the fifth round it will only be in the next or fifth round that ether the gross body of akasha will become a familiar fact of nature to all men as air is familiar to us now cosmic elements are the noumena of the terrestrial elements water is matter in its precosmic state ether contains all other states of matter and their properties the waters of creation are not the liquid we know but Æther the fiery waters of invisible space fohat is the son of Æther in its highest aspect from mahat intelligence proceeds ether from ether air from air heat from heat water and from water earth with everything on her Æther is universal fire imponderable power and potency ether is one of seven cosmic principles akasha is the synthesis of Æther and ether an aspect of akasha the astral light is no light it is the dark side of ether teeming with conscious semi conscious and unconscious entities the ethereal aether is a historical narrative of one of the great experiments in modern physical science the fame of the 1887 michelson morley aether drift test on the relative motion of the earth and the luminiferous aether derives largely from the role it is popularly supposed to have played in the origins and later in the justification of albert einstein s first theory of relativity its importance is its own as a case history of the intermittent performance of an experiment in physical optics from 1880 to 1930 and of the men whose work it was this study describes chronologically the conception experimental design first trials repetitions influence on physical theory and eventual climax of the optical experiment michelson morley and their colleague miller were the prime actors in this half century drama of confrontation between experimental and theoretical physics the issue concerned the relative motion of spaceship earth and the universe as measured against the background of a luminiferous medium supposedly filling all interstellar space at stake it seemed were the phenomena of astronomical aberration the wave theory of light and the newtonian concepts of absolute space and time james clerk maxwell s suggestion for a test of his electromagnetic theory was translated by

michelson into an experimental design in 1881 redesigned and reaffirmed as a null result with morley in 1887 thereafter modified and partially repeated by morley and miller finally completed in 1926 by miller alone then by michelson s team again in the late 1920s meanwhile helmholtz kelvin rayleigh fitzgerald lodge larmor lorentz and poincaré most of the great names in theoretical physics at the turn of the twentieth century had wrestled with the anomaly presented by michelson s experiment as the relativity and quantum theories matured wave particle duality was accepted by a new generation of physicists the aether drift tests disproved the old and verified the new theories of light and electromagnetism by 1930 they seemed to explain einstein relativity and space time but in historical fact the aether died only with its believers

nineteenth century aether theories focuses on aether theories the selection first offers information on the development of aether theories by taking into consideration the positions of christiaan huygens thomas young and augustin fresnel the text then examines the elastic solid aether concerns include green s aether theory maccullagh s aether theory and kelvin s aether theory the text also reviews lorentz aether and electron theory the development of lorentz ideas of the stagnant aether and electrons lorentz theorem of corresponding states and its development and lorentz response to the michelson morley experiment are discussed the book discusses the relative motion of the earth and the luminiferous aether and laws of the reflection and refraction of light at the common surface of two non crystallized media the text also focuses on the electrical and optical phenomena in moving bodies simplified theory of electrical and optical phenomena in moving systems and rotational aether in its application to electromagnetism the selection is a dependable reference for readers wanting to study aether theories the following book is a pamphlet discussing the discovery of an all purpose medicinal fluid called aether by the surgeon m turner the author claims that the medicine can be used to alleviate the following conditions gout epilepsy headaches and rheumatism

oliver joseph lodge 1851 1940 studied at the royal college of science and at university college london and in 1881 became professor of physics at liverpool a pioneer of radio telegraphy lodge s early experiments of 1888 showed that radio frequency waves could be transmitted along electric wires and in 1894 he demonstrated a radiotelegraphic set in which he had perfected the coherer a radio wave detector and the heart of the early radiotelegraph receiver also in 1894 he hypothesized that the sun emitted radio waves a fact not proven until 1942 in 1900 he was appointed first principal of the new university at birmingham he was knighted in 1902 marconi said he is one of our greatest physicists and thinkers but it is particularly in regard to his pioneering in wireless which should never be forgotten in the very early days after the experimental confirmation of maxwell s theory as to the existence of electric waves and their propagation through space it was given to only a very few persons to possess clear insight in regard to what was considered to be one of the most hidden mysteries of nature sir oliver lodge possessed that insight in a far greater degree than perhaps any of his contemporaries william george hooper c1865 was the british author of aether and gravitation 1903 and the universe of ether and spirit 1913 the author in this work endeavours to solve the greatest scientific problem that has puzzled scientists for the past two hundred years the question has arisen over and over again since the discovery of universal gravitation by sir isaac newton as to what is the physical cause of the attraction of gravitation author david thomson and jim bourassa have founded the quantum aetherdynamics institute an organization dedicated to understanding the aether for the first time in human history the aether is fully quantified based upon empirical data through a very simple observation noted nearly 200 years ago by charles coulomb the electromagnetic units have been corrected of an error that has led physics astray for so long now electrodynamics expresses in simple dimensional equations the neurosciences unite with quantum and classical physics and we can precisely model the geometry of subatomic particles ether lipids chemistry and biology provides the major research breakthroughs in the chemistry and biology of ether lipids this book contains 16 chapters and begins with the history of studies of ether lipids the subsequent chapters deal with the chemical syntheses analytical procedures biological effects and metabolic pathways of these lipids considerable chapters are devoted to the biochemical aspects of ether lipids in diverse species such as mammals birds marine organisms mollusks protozoal bacteria and plants these chapters also illustrate the suitability and usefulness of the various tissues to elucidate the role of these lipids in living systems this text will be of value to chemists biologists biomedical scientists and researchers and graduate students hardcover reprint of the original 1910 edition beautifully bound in brown cloth covers featuring titles stamped in gold 8vo 6x9 no adjustments have been made to the original text giving readers the full antiquarian experience for quality purposes all text and images are printed as black and white this item is printed on demand book information whittaker e t edmund taylor a history

An Account of the Extraordinary Medicinal Fluid, Called Aether

1743

part 1 aether is the father of the universe and the all vivifying spirit of cosmic matter myths always speak to those who listen in kosmos there are three higher principles chthonia chaos Æther zeus and chronos time Æther is the spirit of cosmic matter represented by zeus osiris and other androgynous deities astral light is their shadow on earth fire is the unity of Æther in its universality but unlike some other reproductions of classic texts 1 we have not used ocr optical character recognition as this leads to bad quality books with introduced typos 2 in books where there are images such as portraits maps sketches etc we have endeavoured to keep the quality of these images so they represent accurately the original artefact although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy

if a child wants proof we can think of 10 different ways to show that we are surrounded by air but we are of course normally unaware that we live at the bottom of an ocean of air it is claimed in this book that we are unaware similarly that we are surrounded by an atmosphere of aether there is one major difference however we have not been able to detect the aether nevertheless the aether provides a solution to the following mystery how can light or any electromagnetic wave travel for billions of years across the vastness of the universe without losing any energy the answer is that the universe is filled with a light transmitting medium the aether the proof that there is an aether is the subject of the present book
