sartre picks up diverging threads in the
phenomenological tradition weaves them together with
ideas from gestalt and behaviourist psychology and asks
what is consciousness what is its relationship to the
body to the external world and to other minds sartre
believes that the mind and its states are by products
of introspection created in the act that purports to
discover them how does this happen and how are we able
to perceive ourselves as persons physical objects with
mental states sartre s phenomenology reconstructs
sartre s answers to these crucial questions on sartre s
view consciousness originally apprehends itself in
terms of what it is consciousness of that is as an
activity of apprehending the world david reisman
the path from this minimal form of self-development is one
to the perception of oneself as a full blown person

society and the sierra club moral rights and their
grounds offers a novel theory of rights based on two
distinct views the first the value view of rights
argues that for a person to have a right is to be
valuable in a certain way or to have a value property
this special type of value is in turn identified by the
reasons that others have for treating the right holder
in certain ways and that correlate with the value in
question david alm then argues that the familiar agency
view of rights should be replaced with a different
version according to which persons rights and thus at
least in part their value are based on their actions
rather than their mere agency this view which alm calls
exercise based rights retains some of the most valuable
features of the agency view while also development in one

Kensington Museum 1891 the most comprehensive introduction to environmental ethics available environmental ethics offers students a current look at the issues and topics that dominate the field today organized into two main parts that take students seamlessly from theory to application this sixth edition of the pojmans popular anthology like its

predecessors includes numerous topic areas not covered in other anthologies featuring articles carefully selected for clarity and accessibility the text follows a dialogic pro con format presenting divergent positions on each topic ensuring that students are both exposed to and understand both sides of every topic so they can develop their own informed positions new selections include selections on food ethics and climate change and energy policy most of the royalties for this book are donated to groups dedicated to protecting the environment such as the wilderness society and the sierra club

A Companion to Ayn Rand 2021-11-08 moral rights and their grounds offers a novel theory of rights based on two distinct views the first the value view of rights argues that for a person to have a right is to be valuable in a certain way or to have a value property this special type of value is in turn identified by the reasons that others have for treating the right holder in certain ways and that correlate with the value in question david alm then argues that the familiar agency view of rights should be replaced with a different version according to which persons rights and thus at least in part their value are based on their actions rather than their mere agency this view which alm calls exercise based rights retains some of the most valuable features of the agency view while also defending it against common objections concerning right loss this book presents a unique conception of exercise based rights that will be of keen interest to ethicists legal philosophers and political philosophers interested in rights theory
